Nauka Vremia Liudi:

Stalin's Folly Konstantin Pleshakov, 2006 Reassessing the Soviet response to the Nazi invasion of Russia the author portrays Stalin as an ineffective military leader who allowed hundreds of thousands of his soldiers to be slaughtered in the first ten days of the invasion **The Private World of Soviet Scientists from Stalin to Gorbachev** Maria

Rogacheva, 2017-07-10 Rogacheva sheds new light on the complex transition of Soviet society from Stalinism into the post Stalin era Using the case study of Chernogolovka one of dozens of scientific towns built in the USSR under Khrushchev she explains what motivated scientists to participate in the Soviet project during the Cold War Rogacheva traces the history of this scientific community from its creation in 1956 through the Brezhnev period to paint a nuanced portrait of the living conditions political outlook and mentality of the local scientific intelligentsia Utilizing new archival materials and an extensive oral history project this book argues that Soviet scientists were not merely bought off by the Soviet state but that they bought into the idealism and social optimism of the post Stalin regime Many shared the regime's belief in the progressive development of Soviet society on a scientific basis and embraced their increased autonomy material privileges and elite status **Myth, Memory, Trauma** Polly Jones, 2013-08-27 DIV Drawing on newly available materials from the Soviet archives Polly Jones offers an innovative comprehensive account of de Stalinization in the Soviet Union during the Khrushchev and early Brezhnev eras Jones traces the authorities' initiation and management of the de Stalinization process and explores a wide range of popular reactions to the new narratives of Stalinism in party statements and in Soviet literature and historiography div DIV div DIV Engaging with the dynamic field of memory studies this book represents the first sustained comparison of this process with other countries' attempts to rethink their own difficult pasts and with later Soviet and post Soviet approaches to Stalinism div DIV div Editing Turgenev, Dostoevsky, and Tolstoy Susanne Fusso, 2021-07-15 In

Editing Turgenev Dostoevsky and Tolstoy Susanne Fusso examines Mikhail Katkov's literary career without vilification or canonization focusing on the ways in which his nationalism fueled his drive to create a canon of Russian literature and support its recognition around the world In each chapter Fusso considers Katkov's relationship with a major Russian literary figure In addition to Turgenev Dostoevsky and Tolstoy she explores Katkov's interactions with Vissarion Belinsky Evgeniia Tur and the legacy of Aleksandr Pushkin This groundbreaking study will fascinate scholars students and general readers interested in Russian literature and literary history **The Bear Watches the Dragon** Alexander Lukin, 2016-09-16 China

and Russia two giants dominating the Eurasian landmass share a history of understanding and misunderstanding whose nuances are not well appreciated by outsiders In his interpretation of this relationship from the Russian point of view Alexander Lukin shows how over the course of three centuries China has seemed alternately to threaten mystify imitate mirror and rival its northern neighbor Lukin traces not only the changing dynamics of Russian-Chinese relations but the ways in which Russia's images of China more profoundly reflected Russia's self-perception and its perceptions of the West as well

As both Russia and China take distinctive approaches to political and economic development and integration in the twenty first century global economy this reinterpretation of their relationship is timely and valuable not only to historians but to all students of international affairs

The House of Government Yuri Slezkine, 2017-08-07 On the 100th anniversary of the Russian Revolution the epic story of an enormous apartment building where Communist true believers lived before their destruction The House of Government is unlike any other book about the Russian Revolution and the Soviet experiment Written in the tradition of Tolstoy's War and Peace Grossman's Life and Fate and Solzhenitsyn's The Gulag Archipelago Yuri Slezkine's gripping narrative tells the true story of the residents of an enormous Moscow apartment building where top Communist officials and their families lived before they were destroyed in Stalin's purges A vivid account of the personal and public lives of Bolshevik true believers the book begins with their conversion to Communism and ends with their children's loss of faith and the fall of the Soviet Union Completed in 1931 the House of Government later known as the House on the Embankment was located across the Moscow River from the Kremlin The largest residential building in Europe it combined 505 furnished apartments with public spaces that included everything from a movie theater and a library to a tennis court and a shooting range Slezkine tells the chilling story of how the building's residents lived in their apartments and ruled the Soviet state until some eight hundred of them were evicted from the House and led one by one to prison or their deaths Drawing on letters diaries and interviews and featuring hundreds of rare photographs The House of Government weaves together biography literary criticism architectural history and fascinating new theories of revolutions millennial prophecies and reigns of terror The result is an unforgettable human saga of a building that like the Soviet Union itself became a haunted house forever disturbed by the ghosts of the disappeared

Science and Technology in the Global Cold War Naomi Oreskes, John Krige, 2014-10-31 Investigations of how the global Cold War shaped national scientific and technological practices in fields from biomedicine to rocket science The Cold War period saw a dramatic expansion of state funded science and technology research Government and military patronage shaped Cold War technoscientific practices imposing methods that were project oriented team based and subject to national security restrictions These changes affected not just the arms race and the space race but also research in agriculture biomedicine computer science ecology meteorology and other fields This volume examines science and technology in the context of the Cold War considering whether the new institutions and institutional arrangements that emerged globally constrained technoscientific inquiry or offered greater opportunities for it The contributors find that whatever the particular science and whatever the political system in which that science was operating the knowledge that was produced bore some relation to the goals of the nation state These goals varied from nation to nation weapons research was emphasized in the United States and the Soviet Union for example but in France and China scientific independence and self reliance dominated The contributors also consider to what extent the changes to science and technology practices in this era were produced by the specific politics anxieties and aspirations of the Cold War
