Nautical Astronomy In New Zealand The Voyages Of James Cook:

Exploring the History of New Zealand Astronomy Wayne Orchiston, 2015-12-08 Dr Orchiston is a foremost authority on the subject of New Zealand astronomy and here are the collected papers of his fruitful studies in this area including both those published many years ago and new material The papers herein review traditional Maori astronomy examine the appearance of nautical astronomy practiced by Cook and his astronomers on their various stopovers in New Zealand during their three voyages to the South Seas and also explore notable nineteenth century New Zealand observatories historically from significant telescopes now located in New Zealand to local and international observations made during the 1874 and 1882 transits of Venus and the nineteenth and twentieth century preoccupation of New Zealand amateur astronomers with comets and meteors New Zealand astronomy has a truly rich history extending from the Maori civilization in pre European times through to the years when explorers and navigators discovered the region up to pioneering research on the newly emerging field of radio astronomy during WWII and in the immediate post war years A complete survey of a neglected but rich national astronomical history this does the subject full and comprehensive justice *Nautical Astronomy in New Zealand* Wayne Orchiston, D. Wayne Orchiston, 1998 The aim of this study is to describe the various astronomers involved in Cook's three voyages to the South Seas their scientific instruments and their New Zealand based astronomical observations before placing eighteenth century New Zealand astronomy in historical perspective In Chapter 5 we show the other face of New Zealand astronomy during the 1770s by briefly examining Maori astronomy Introduction p 12 **Highlighting the History of Astronomy in the Asia-Pacific Region** Wayne Orchiston, Tsuko Nakamura, Richard G. Strom, 2011-08-27 With just 400 pages this title provides readers with the results of recent research from some of the world's leading historians of astronomy on aspects of Arabic Australian Chinese Japanese and North and South American astronomy and astrophysics Of particular note are the sections on Arabic astronomy Asian applied astronomy and the history of Australian radio astronomy and the chapter on Peruvian astronomy This title is of particular appeal to those with research interests in applied historical astronomy archaeoastronomy calendars manuscripts and star charts historical instruments and observatories and the history of radio astronomy *History of Oriental Astronomy* S.M. Ansari, 2013-06-29 Proceedings of the Joint Discussion 17 at the 23rd IAU General Assembly organised by the Commission 41 held in Kyoto Japan August 25 26 1997 **Astronomy Across Cultures** Helaine Selin, 2012-12-06 Astronomy Across Cultures A History of Non Western Astronomy consists of essays dealing with the astronomical knowledge and beliefs of cultures outside the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Polynesian Egyptian and Tibetan astronomy among others the book includes essays on Sky Tales and Why We Tell Them and Astronomy and Prehistory and Astronomy and Astrology The essays address the connections between science and culture and relate astronomical practices to the cultures which produced them Each essay is well illustrated and contains an extensive bibliography Because the geographic range is global

the book fills a gap in both the history of science and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups **Science and Exploration in the Pacific** Margarette Lincoln,1998 This volume contains studies of scientific and cultural discoveries made on Cook's 1768-7 voyage to the South Sea in Endeavour and issues emerging from this and successive Pacific voyages

Transits of Venus (IAU C196) International Astronomical Union. Colloquium,2005-06-30 IAU C196 coincided with the 8 June 2004 transit of Venus producing the exciting eclectic mix that can be found in these proceedings the amazing history of the English North country astronomers of the seventeenth century the AU at a precision of 1.4 m the explanation for the infamous black drop effect a possible Mayan observation of a transit of Venus in the thirteenth century the vexed question of leap seconds and time scales history distances parallaxes the solar system at exquisite precision and future space missions that will revolutionise astronomy *The New Astronomy: Opening the Electromagnetic Window and Expanding our View of Planet Earth* Wayne Orchiston,2006-01-17 This is an unusual book combining as it does papers on astrobiology history of astronomy and sundials but after all Woody Sullivan is an unusual man In late 2003 I spent two fruitful and enjoyable months in the Astronomy Department at the University of Washington UW working on archival material accumulated over the decades by Woody for a book we will co-author with Jessica Chapman on the early development of Australian astronomy The only serious intellectual distraction I faced during this period was planning for an IAU colloquium on transits of Venus scheduled for June 2004 in England where I was down to present the Cook paper I knew Woody was also interested in transits and indeed anything remotely connected with shadows see his paper on page 3 and in discussing the Preston meeting with him it transpired that his 60th birthday was timed to occur just one week later This was where the seed of Woodfest began to germinate Why not invite friends and colleagues to join Woody in Seattle and celebrate this proud event I put the idea to Woody and others at UW they liked it and Woodfest was born **The Transits of Venus** William

Sheehan,2010-12 In this unique and fascinating history of science acclaimed popular science writer Sheehan and award-winning geographer Westfall take readers back through the centuries to chronicle the intrepid explorations of scientists and adventurers who studied the transits of Venus in the quest for scientific understanding Maps tables **The Wide Wide Sea** Hampton Sides,2025-05-27 NEW YORK TIMES BESTSELLER A thrilling and superbly crafted The Wall Street Journal account of the most momentous voyage of the Age of Exploration which culminated in Captain James Cook's death in Hawaii and left a complex and controversial legacy still debated to this day One of The New York Times Book Review's 10 Best Books of the Year A BEST BOOK OF THE YEAR THE NEW YORK TIMES TIME THE ECONOMIST NPR THE NEW YORKER THE SMITHSONIAN AND KIRKUS REVIEWS In this masterly history Sides tracks the 18th century English naval officer James Cook's third and final voyage across the globe painting a vivid and propulsive portrait The New York Times Book Review On July 12th 1776 Captain James Cook already lionized as the greatest explorer in British history set off on his third voyage in

his ship the HMS Resolution Two and a half years later on a beach on the island of Hawaii Cook was killed in a conflict with native Hawaiians How did Cook who was unique among captains for his respect for Indigenous peoples and cultures come to that fatal moment Hampton Sides bravura account of Cook s last journey both wrestles with Cook s legacy and provides a thrilling narrative of the titanic efforts and continual danger that characterized exploration in the 1700s Cook was renowned for his peerless seamanship his humane leadership and his dedication to science On previous expeditions Cook mapped huge swaths of the Pacific including the east coast of Australia and initiated first European contact with numerous peoples He treated his crew well and endeavored to learn about the societies he encountered with curiosity and without judgment Yet something was different on this last voyage Cook became mercurial resorting to the lash to enforce discipline and led his two vessels into danger time and again Uncharacteristically he ordered violent retaliation for perceived theft on the part of native peoples This may have had something to do with his secret orders which were to chart and claim lands before Britain s imperial rivals could and to discover the fabled Northwest Passage Whatever Cook s intentions his scientific efforts were the sharp edge of the colonial sword and the ultimate effects of first contact were catastrophic for Indigenous people around the world The tensions between Cook s overt and covert missions came to a head on the shores of Hawaii His first landing there was harmonious but when Cook returned after mapping the coast of the Pacific Northwest and Alaska his exploitative treatment of the Hawaiians led to the fatal encounter At once a ferociously paced story of adventure on the high seas and a searching examination of the complexities and consequences of the Age of Exploration *THE WIDE WIDE SEA* is a major work from one of our finest narrative nonfiction writers *New Insights From Recent Studies in Historical Astronomy: Following in the Footsteps of F. Richard Stephenson* Wayne Orchiston, David A. Green, Richard Strom, 2014-11-24 This book contains papers from a conference held to celebrate the 70th birthday of one of the world s foremost astronomical historians Professor F Richard Stephenson the latest recipient of the American Astronomical Society s highest award for research in astronomical history the LeRoy Doggett Prize Reflecting Professor Stephenson s extensive research portfolio this book brings together under one cover papers on four different areas of scholarship applied historical astronomy which Stephenson founded Islamic astronomy Oriental astronomy and amateur astronomy These papers are penned by astronomers from Canada China England France Georgia Iran Japan Lebanon the Netherlands Portugal Thailand and the USA Its diverse coverage represents a wide cross section of the history of astronomy community Under discussion are ways in which recent research using historical data has provided new insights into auroral and solar activity supernovae and changes in the rotation rate of the Earth It also presents readers with results of recent research on leading historical figures in Islamic and Oriental astronomy and aspects of eighteenth and nineteenth century Australian British German and Portuguese amateur astronomy including the fascinating amateur turned professional syndrome *John Tebbutt* Wayne Orchiston, 2016-11-15 This book marks the centennial of Tebbutt s death with a major biographical account surveying his scientific contributions to astronomy prefaced with a

foreword by Sir Patrick Moore During the second half of the nineteenth century Tebbutt was Australia's foremost astronomer He devoted his time and funds to astronomy and built a truly international reputation that far surpassed Australia's leading professional astronomers of the day This book marks the centennial of Tebbutt's death with a major biographical account Tebbutt's remarkable record of achievement extends over more than half a century Orchiston's book covers the whole of Tebbutt's career from his yearly observatory reports and comet discoveries to his time as the first president of Sydney's branch of the British Astronomical Association

The Captain Cook Encyclopaedia John Robson, 2004 The ultimate reference work on Britain's greatest navigator and explorer The book aims to provide answers on all aspects of the life and voyages of Captain James Cook and the people places events and ships associated with the great explorer

The Emergence of Astrophysics in Asia Tsuko Nakamura, Wayne Orchiston, 2017-11-03 This book examines the ways in which attitudes toward astronomy in Australia China India Indonesia Japan South Korea New Zealand Taiwan Thailand and Uzbekistan have changed with the times The emergence of astrophysics was a worldwide phenomenon during the late nineteenth and early twentieth centuries and it gradually replaced the older style positional astronomy which focused on locating and measuring the movements of the planets stars etc Here you will find national overviews that are at times followed by case studies of individual notable achievements Although the emphasis is on the developments that occurred around 1900 later pioneering efforts in Australian Chinese Indian and Japanese radio astronomy are also included As the first book ever published on the early development of astrophysics in Asia the authors fill a chronological and technological void Though others have already written about earlier astronomical developments in Asia and about the recent history of astronomy in various Asian nations no one has examined the emergence of astrophysics the so called new astronomy in Asia during the late nineteenth and early twentieth centuries

Celestial Shadows John Westfall, William Sheehan, 2014-11-19 Much of what is known about the universe came from the study of celestial shadows This book looks in detail at the way eclipses and other celestial shadows have given us amazing insights into the nature of the objects in our solar system and how they are even helping us discover and analyze planets that orbit stars other than our Sun A variety of eclipses transits and occultations of the moons of Jupiter and Saturn Pluto and its satellite Charon asteroids and stars have helped astronomers to work out their dimensions structures and shapes even the existence of atmospheres and structures of exoplanets Long before Columbus set out to reach the Far East by sailing West the curved shadow of the Earth on the Moon during a lunar eclipse revealed that we inhabit a round world a globe More recently comparisons of the sunlit and Earthlit parts of the Moon have been used to determine changes in the Earth's brightness as a way of monitoring possible effects in cloud coverage which may be related to global warming Shadows were used by the Greek mathematician Eratosthenes to work out the first estimate of the circumference of the Earth by Galileo to measure the heights of the lunar mountains and by eighteenth century astronomers to determine the

scale of the Solar System itself Some of the rarest and most wonderful shadows of all are those cast onto Earth by the lovely Evening Star Venus as it goes between the Earth and the Sun These majestic transits of Venus occur at most two in a century after the 2012 transit there is not a chance to observe this phenomenon until 2117 while the more common sweep of a total solar eclipse creates one of the most dramatic and awe inspiring events of nature Though it may have once been a source of consternation or dread solar eclipses now lead thousands of amateur astronomers and eclipse chasers to travel the globe in order to experience the dramatic view under totality These phenomena are among the most spectacular available to observers and are given their full due in Westfall and Sheehan s comprehensive study **Transactions of the**

International Astronomical Union ,1922 Journal for the History of Astronomy ,2000 Organizations and Strategies in Astronomy 6 Andre Heck,2006-10-14 When I was a child growing up in South America I often went camping in the wild and hence had direct access to the wondrous Southern sky the Southern Cross was all mine at the time Little did I know then that the study of the sky would take such a huge importance in my life and that in the end astronomy and astrophysics would in many ways become my country and my religion I have lived in several different countries and when asked my nationality I am always very tempted to reply astronomer I started as a theorist and my only dream in my youth was to spend nights thinking and calculating with paper and pencil and to have the impression by dawn that I had understood something new So at the time astronomy was seen or dreamt by me as a solitary endeavour with periodic encounters with my wise adviser and professors it is this model that I adopted when doing my PhD work My generation has lived through many revolutions of all kinds Those in astronomy I believe remain particularly remarkable and I am a true product of them Now I elect to live and work in large organizations and to share my endeavours with many people And I relish the series of Andre Heck on Organizations and Strategies in Astronomy which help us recover our memories reconstitute our own story and read with glee about our neighbouring or far away colleagues **The Observatory** ,1910 A review of astronomy varies
