## Naval War In The Mediterranean 1940-1943:

**The Naval War in the Mediterranean, 1940-1943** Jack Greene, Alessandro Massignani, 1998 *The Path to Victory* Douglas Porch, 2005-06-22 From the Publisher The Mediterranean theater in World War II has long been overlooked by those who believe it was little more than a string of small scale battles sideshows that were of minor importance in a war whose outcome was decided in the clashes of mammoth tank armies in northern Europe But in this groundbreaking new book one of our finest military historians argues that the Mediterranean was in fact World War II's pivotal theater In *The Path to Victory* Porch examines the Mediterranean as an integrated arena one in which events in Syria and Suez influenced the survival of Gibraltar Churchill's controversial decision in 1940 to contest the Axis in the Mediterranean followed by Roosevelt's insistence two years later that his service chiefs undergo a Mediterranean initiation laid the foundation for Allied victory in Europe Although conventional wisdom argues that Hitler could not have won World War II in the Mediterranean Porch believes that the Allies might well have lost had they not elected to fight there Decisions made in this theater matured the Western Alliance seriously damaged and dispersed the formidable Axis military machine and forged the combined Anglo American effort that was to be unstoppable when transferred to Northern Europe in June 1944 The Middle Sea constituted a strategic piece of a global war it was a passage that linked far flung theaters protected scarce Allied shipping became an essential conduit for lend lease aid to the USSR offered France a testing ground for its rehabilitation as a military power and provided an entry point into southern Germany for two Allied armies Without a Mediterranean alternative the Western Allies would probably have committed to a premature cross Channel invasion in 1943 that might well have cost them the war Brilliantly argued and with vivid portraits of Churchill Montgomery FDR Rommel and Mussolini this original accessible and compelling account of a little known theater emphasizes the importance of the Mediterranean in the ultimate Allied victory in Europe during World War II

**World War II: The Mediterranean 1940-1945** Paul Collier, 2010-01-15 Discusses World War II with attention to events in the Mediterranean from Italy's declaration of war in 1940 to its surrender in 1945 [The War in North Africa, 1940-1943](#) Colin F. Baxter, 1996-03-30 Few of the major campaigns of World War II aroused as much controversy as the War in North Africa 1940-1943 Figures such as Rommel Montgomery and Eisenhower would become world famous because of the fighting in North Africa This book opens with seven historiographical essays that evaluate and critically assess the major contributions to the literature on the War in North Africa It then includes an alphabetically arranged bibliography of the 504 entries cited in the essays The material is easily accessible with cross references between the text and the bibliography and a full index The volume includes chapters on the Desert War 1940-42 the Axis Powers in North Africa Montgomery Alam Halfa and El Alamein TORCH the Landings in French North Africa and the Tunisian Campaign Full attention is given to questions and issues historians have raised on such controversies as the Auchinleck Montgomery dispute the debate over Operation TORCH and the Darlan affair Emphasis is on English language works but the

most significant Italian German and French works are cited and assessed The book has been written for use in public college university and institutional libraries and to serve general readers and military historians The Royal Navy and Maritime Power in the Twentieth Century Ian Speller,2004-08-02 This book adopts an innovative new approach to examine the role of maritime power and the utility of navies It uses a number of case studies based upon key Royal Navy operations in the twentieth century to draw out enduring principles about maritime power and to examine the strengths and limitations of maritime forces as instruments of national policy Individual chapters focus on campaigns and operations from both World Wars and a series of post 1945 crises and conflicts from the Palestine Patrol in the 1940s to Royal Navy operations in support of British policy in the 1990s Each case study demonstrates critical features of maritime power including operations during the transition to war fleet operations in narrow seas logistics submarine operations the impact of air power on maritime operations blockade maritime power projection amphibious warfare jurisdictional disputes and the law of the sea and peace support operations The contributors to this book all have considerable experience lecturing on these issues at the United Kingdom Joint Services Command and Staff College where maritime campaign analysis is used to teach the principles of maritime power to officers of the Royal Navy The book combines an authoritative examination of critical Royal Navy operations during the twentieth century with a sophisticated analysis of the nature of maritime power As such it is of both historical interest and contemporary relevance and will prove equally valuable to academic historians military professionals and the general reader **Modern Naval History** Richard Harding,2015-12-17 Specifically structured around research questions and avenues for further study and providing the historical context to enable this further research Modern Naval History is a key historiographical guide for students wishing to gain a deeper understanding of naval history and its contemporary relevance Navies play an important role in the modern world and the globalisation of economies cultures and societies has placed a premium on maritime communications Modern Naval History demonstrates the importance of naval history today showing its relevance to a number of disciplines and its role in understanding how navies relate to their host societies Richard Harding explains why naval history is still important despite slipping from the attention of policy makers and the public since 1945 and how it can illuminate answers to questions relating to economic diplomatic political social and cultural history The book explores how naval history has informed these fields and how it can produce a richer and more informed historical understanding of navies and sea power A History of the Royal Navy: World War II Duncan Redford,2014-03-27 The Royal Navy s operations in World War II started on 3 September 1939 and continued until the surrender of Japan in August 1945 there was no phoney war at sea The navy played a central role in the evacuation of the retreating British army at Dunkirk and later orchestrated the sinking of Germany s mighty battleship and Hitler s pride the Bismarck Without the Royal Navy s attention to the defence of Britain s seaborne trade especially in the struggle against German U boats in the Battle of the Atlantic there would not have been food for the country fuel for the RAF s operations or

supplies to keep the army fighting in Europe North Africa and the Far East Yet the outstanding naval contribution to Britain's survival and eventual victory came at a heavy cost in terms of ships and to the men who had to face not just the violence of the enemy but also the violence of the sea This book argues that World War II was effectively a maritime war it was the Royal Navy's war

*European Navies and the Conduct of War* Carlos Alfaro-Zaforteza, Alan James, Malcolm H Murfett, 2018-07-17

*European Navies and the Conduct of War* considers the different contexts within which European navies operated over a period of 500 years culminating in World War Two the greatest war ever fought at sea Taking a predominantly continental point of view the book moves away from the typically British centric approach taken to naval history as it considers the role of European navies in the development of modern warfare from its medieval origins to the large scale industrial total war of the twentieth century Along with this growth of navies as instruments of war the book also explores the long rise of the political and popular appeal of navies from the princes of late medieval Europe to the enthusiastic crowds that greeted the modern fleets of the great powers followed by their reassessment through their great trial by combat firmly placing the development of modern navies into the broader history of the period

Chronological in structure *European Navies and the Conduct of War* is an ideal resource for students and scholars of naval and military history

**The British Empire and the Second World War** Ashley Jackson, 2006-03-09 In 1939 Hitler went to war not just with Great Britain he also went to war with the whole of the British Empire the greatest empire that there had ever been In the years since 1945 that empire has disappeared and the crucial fact that the British Empire fought together as a whole during the war has been forgotten All the parts of the empire joined the struggle and were involved in it from the beginning undergoing huge changes and sometimes suffering great losses as a result The war in the desert the defence of Malta and the Malayan campaign and the contribution of the empire as a whole in terms of supplies communications and troops all reflect the strategic importance of Britain's imperial status Men and women not only from Australia New Zealand and India but from many parts of Africa and the Middle East all played their part Winston Churchill saw the war throughout in imperial terms The British Empire and the Second World War emphasises a central fact about the Second World War that is often forgotten

**Mers el-Kébir 1940** Ryan K. Noppen, 2024-10-24 A fascinating analysis of the World War II battle between Great Britain and France to ensure French ships were kept out of German hands during World War II Following France's armistice with the Axis powers Great Britain realized that if Germany or Italy insisted upon the transfer of battleships cruisers and destroyers from the French Navy to the control of their own navies the balance in the Mediterranean would immediately swing in their favour Churchill decided that the Marine Nationale's most powerful vessels would need to be secured through diplomacy coercion or force The French Navy commander in chief was equally eager to keep their ships out of Axis hands but he also did not want the British to have them These increasingly hostile circumstances led to Operation Catapult which began on 3 July 1940 and saw the two nations battle for the ships Expert naval historian Ryan Noppen analyses the Royal Navy Operation Catapult at Mers el K bir the follow up Operation Lever and the French retaliatory actions in the subsequent days This book examines the rapid deterioration of Anglo French relations and how the two former allies quickly fell into armed conflict Fully illustrated with detailed maps photographs and artwork that bring to life the British and French forces involved it presents an engaging treatment of an often forgotten episode early in World War II

*Strangling the Axis* Richard Hammond, 2020-06-25 This is a

major reassessment of the causes of Allied victory in the Second World War in the Mediterranean region Drawing on a unique range of multinational source material Richard Hammond demonstrates how the Allies ability to gain control of the key routes across the sea and sink large quantities of enemy shipping denied the Axis forces in North Africa crucial supplies and proved vital to securing ultimate victory there Furthermore the sheer scale of attrition to Axis shipping outstripped their industrial capacity to compensate leading to the collapse of the Axis position across key territories maintained by seaborne supply such as Sardinia Corsica and the Aegean islands As such Hammond demonstrates how the anti shipping campaign in the Mediterranean was the fulcrum about which strategy in the theatre pivoted and the vital enabling factor ultimately leading to Allied victory in the region

**The British Seaborne Empire** Jeremy Black, Professor Jeremy Black, 2004-01-01 Britain's seaborne tradition is used to throw light on the British themselves the people with whom they came into contact and the British perception of empire The oceans and their shores rather than the mysterious interiors of continents certainly dominated the English perception of the transoceanic world in the sixteenth seventeenth and eighteenth centuries climaxing in the fascination with the Pacific in the age of Captain Cook and continuing into the nineteenth century with Franklin in the Arctic and Ross in the Antarctic The oceans offered much more than fascination In England from the late sixteenth century maritime conflict and imperial strength were seen as important to national morale and reputation and without it there would have been no empire or at least not in the form it actually took

**The Black Prince And The Sea Devils** Jack Greene, Alessandro Massignani, 2009-08-05 At the beginning of World War II Prince Junio Valerio Borghese dashing Italian nobleman assembled the famous Decima MAS naval unit the first modern naval commando squad Borghese's frogmen were trained to fight undercover and underwater with small submarines and assault boats armed with a variety of destructive torpedoes The covert tactics he and the Decima MAS developed including the use of midget submarines secret nighttime operations and small teams armed with explosives have become a standard for special forces around the world to this very day After the Italian capitulation in 1943 Borghese determinedly fought on as a Fascist commando leader After the war he became a man of mystery variously said to be involved with several right wing conspiracies abortive coups and clandestine activity The Prince's death in 1974 was every bit as mysterious as his life Greene and Massignani have drawn upon official archives as well as information from Allied and Axis veterans in an unprecedented attempt to separate fact from fantasy in this detailed examination of Borghese the Decima MAS and the Italian naval special forces

*Aircraft Carrier Impero* Davide F. Jabes, Stefano Sappino, 2018-06-30 From 1941 Italy had been developing a top secret project to install guided rocket weapons aboard aircraft carriers Campini Caproni's revolutionary guided rocket weapon the DAAC which

would later become Hitler's Henschel HS 117 Schmetterling Butterfly was the selected projectile. Classified intelligence on the V 1 flying bomb and other aircraft projects were acquired and then discarded when Ansaldo's naval architect Lino Campagnoli in 1911-1915 issued plans for the Impero battleship to be transformed into a modern fleet carrier. Previously unpublished documentation reveals how the last of the four state-of-the-art Littorio class battleships, which was in advanced completion, hull components and engines installed, was destined for conversion into a modern aircraft carrier. This is an exhaustive historical review of the Impero and Regia Marina's Royal Navy developments as well as the dramatic story of the lack of co-operation and strategic insight with Regia Aeronautica before and during the war 1922-1943. Also, a final evaluation of the revolutionary Pugliese anti-torpedo system based on unpublished German and Russian documentation is assessed.
