Backing Hitler Robert Gellately, 2001 The Nazis never won a majority in free elections but soon after Hitler took power most people turned away from democracy and backed the Nazi regime Hitler won growing support even as he established the secret police Gestapo and concentration camps What has been in dispute for over fifty years is what the Germans knew about these camps and in what ways were they involved in the persecution of race enemies slave workers and social outsiders To answer these questions and to explore the public sides of Nazi persecution Robert Gellately has consulted an array of primary documents He argues that the Nazis did not cloak their radical approaches to law and order in utter secrecy but played them up in the press and loudly proclaimed the superiority of their system over all others They publicized their views by drawing on popular images cherished German ideals and long held phobias and were able to win over converts to their cause The author traces the story from 1933 and shows how war and especially the prospect of defeat radicalized Nazism As the country spiralled toward defeat Germans for the most part held on stubbornly For anyone who contemplated surrender or resistance terror became the order of the day

The Fate of Nazi Germany's Jet Engineers Reiner Decher, 2024-11-30 In April 1945 American forces were sweeping eastwards toward Berlin in part advancing across territory that would eventually become part of the Soviet Occupation Zone. As they advanced US troops uncovered major parts of the manufacturing facilities and the people associated with the engines that powered Germany's last generation of military aircraft: the jet fighters and bombers. Understandably the engine technology involved in powering these aircraft such as the Messerschmitt Me 262 and the Arado Ar 234 was of great interest to the Allied nations. Among the many questions that needed to be answered was whether the Germans had made important breakthroughs in their successful use of these engines. Having made these discoveries and seizures the American authorities needed to decide exactly what they would do with them. Would they share the bounty with the other Allies? American collaboration with the British was a fact. The French, while Allies, were in American eyes militarily unimportant in realizing the defeat of Nazi Germany. Sharing technology with them was not of great interest. The Soviets were far behind but nevertheless ambitious and keen to catch up to western military capability. The Americans knew their relation to the Soviets was tense and confrontational; no sharing was likely there. From their perspective Hitler's jet engineers faced not only a lost war but the economic and intellectual realities that work in Germany would not be available. They had technical knowledge and experiences that were undeniably valuable to the Allied victors. These nations would be engaged in a new competition for control of world affairs that would be called the Cold War. While the major technical interests were atomic bombs, guided missiles and jet engines, it is the last of these that is explored here. What happened to the people and to the institutions they would staff? This is the story of some who found homes and work in the US and in France and some who were brutally abducted to the Soviet Union. This is also the story of American decisions made regarding the German jet engineers and the consequences for them as people and propulsion technology for American, French and Soviet aviation. The competitive stance between the Soviet Union and the Western Allies was one of the key elements of the Cold War that followed. It led to a brutal Russian view and execution of war reparations that elevated the Soviet Union into a powerful position to challenge the West.
