Topological Quantum Numbers in Nonrelativistic Physics Thouless, 1998 Topological quantum numbers are distinguished from quantum numbers based on symmetry because they are insensitive to the imperfections of the systems in which they are observed They have become very important in precision measurements in recent years and provide the best measurements of voltage and electrical resistance This book describes the theory of such quantum numbers starting with Dirac's argument for the quantization of electric charge and continuing with discussions on the helium superfluids flux quantization and the Josephson effect in superconductors the quantum Hall effect solids and liquid crystals and topological phase transitions The accompanying reprints include some of the classic experimental and theoretical papers in this area Physicists OCo both experimental and theoretical OCo who are interested in the topic will find this book an invaluable reference **Porn** Robert J. Stoller, 1991-01-01 Bill Merlin Happy and Kay are among the porn film performers and producers who tell their stories to Dr Robert J Stoller in this psychodynamic ethnography of adult heterosexual pornography Their engrossing accounts reveal in rich detail not only the inner workings of the Industry and the fantasies and motivations

of its participants but also the relation between this most denigrated of occupations and normal human erotic behavior and attitudes Consistently nonjudgmental about the material he presents Dr Stoller nevertheless draws provocative conclusions about porn its practitioners and its effects on society Everyone at work on a porn production he says uses it as a vehicle for unloading his or her rage against something mores institutions laws parents females or males According to Dr Stoller pornography does not exist only to degrade women there is no reliable evidence that it increases the frequency of rape and with the exception of child porn it does little harm Pornography says Dr Stoller seems more the result of our changing society than a cause of change it reflects more than influences our values and mores Report of the Public Schools of the State of

comprehensive study of Indian residential schools in the North In this ground breaking book Crystal Gail Fraser draws on Dinjii Zhuh Gwich in concepts of individual and collective strength to illuminate student experiences in northern residential schools revealing the many ways Indigenous communities resisted the institutionalization of their children After 1945 federal bureaucrats and politicians increasingly sought to assimilate Indigenous northerners who had remained comparatively

outside of their control into broader Canadian society through policies that were designed to destroy Indigenous ways of life. Foremost among these was an aggressive new schooling policy that mandated the construction of Grollier and Stringer Halls, massive residential schools that opened in Inuvik in 1959, eleven years after a special joint committee of the House of Commons and the Senate recommended that all residential schools in Canada be closed. By *Strength We Are Still Here* shares the lived experiences of Indigenous northerners from 1959 until 1982 when the territorial government published a comprehensive plan for educational reform. Led by Survivor testimony, Fraser shows the roles both students and their families played in disrupting state agendas including questioning and changing the system to protect their cultures and communities. Centring the expertise of Knowledge Keepers, *By Strength We Are Still Here* makes a crucial contribution to Indigenous research methodologies and to understandings of Canadian and Indigenous histories during the second half of the twentieth century.
