Embodied Injustice Mary Crossley, 2022-08-25 Black people and people with disabilities in the United States are distinctively disadvantaged in their encounters with the health care system These groups also share harsh histories of medical experimentation eugenic sterilizations and health care discrimination Yet the similarities in inequities experienced by Black people and disabled people and the harms endured by people who are both Black and disabled have been largely unexplored To fill this gap *Embodied Injustice* uses an interdisciplinary approach weaving health research with social science critical approaches and personal stories to portray the devastating effects of health injustice in America Author Mary Crossley takes stock of the sometimes vexed relationship between racial justice and disability rights advocates and interrogates how higher disability prevalence among Black Americans reflects unjust social structures By suggesting reforms to advance health equity for disabled people Black people and disabled Black people this book lays a crucial foundation for intersectional cross movement advocacy to advance health justice in America *Medicine, Power, and the Law* Anne Zimmerman, 2023-11-25 *Medicine Power and the Law* demonstrates that criminal and civil justice interact with medicine and public health more than is presently understood The book focuses on the role of healthcare practitioners and an array of other professionals across industries in identifying wrongdoers reporting behavior and testifying on behalf of the state or government agencies It also covers circumstances in which law enforcement relies on medicine for evidence or support in ways that compromise medical ethics By reporting or testifying as experts a range of people from specialist pediatricians to flight attendants can have a life changing impact on individuals in the name of public health or medicine People who work in hospitals social work settings and even airlines often contribute to wrongful and aggressive criminal and civil actions against society s most vulnerable people including parents older adults and people living with poverty The book explores a number of examples including police use of medicine as a restraint or the collection of blood as evidence and the risks of opting out of certain scientific discoveries such as pharmaceuticals It describes the harms that may come to those who engage in suboptimal but generally heretofore legal child raising behaviors and people opting to live independently as older adults

These can lead to civil and criminal charges when noticed by those in a position of power Medicine Power and the Law is an important contribution for researchers and practitioners in medicine the law and the expanding field of bioethics
