## Perceptions Of The Poor:

*Elite Perceptions of Poverty and Inequality* Elisa Reis, Mick Moore, 2013-07-04 The researchers who have written this volume are clear not only that mass poverty is still the leading humanitarian crisis in developing countries but that if effective policies are to be put in place the national elites who control governments and economies need to be convinced of both the reasons why reducing poverty is in their own and the national interest and that public action can make a difference Remarkably in the rapidly growing literature on poverty this volume is the first to use survey techniques to explore Third World elites attitudes to poverty Five cases intended to be broadly representative of the diversity of situations in developing countries were chosen Brazil South Africa the Philippines Bangladesh and Haiti While the authors found major differences in how national elites understand and represent poverty the classic threats that induced elites in late 19th Century Europe to be concerned with reducing poverty the fear of crime epidemics military weakness or political unrest do not feature prominently in the consciousness of most Third World elites Nor do most of them believe that there is a viable solution to poverty through public action The findings in this book throw light on one reason for the relative ineffectiveness of poverty reduction strategies hitherto and the huge importance of presenting the problem of poverty in ways that fit more closely with the ways in which national elites understand their world

*Perceptions of the Poor*, 2001 This study presents the results of a series of poverty consultations that were carried out in rural Sri Lanka from July to September 2000

**Poverty Issues Perceived by the Poor** Shirley Levine, 1969

*Poverty in the United Kingdom* Peter Townsend, 1979-01-01

Public Perceptions of Poverty in Ireland 2001, *Race, Poverty, and Domestic Policy* C. Michael Henry, 2008-10-01

div What explains the continuing hardship of so many black Americans A distinguished group of scholars analyzes the long complex structural and environmental causes of discrimination and their effects on African Americans The authors examine the impact of poverty poor health poor schools poor housing poor neighborhoods and few job opportunities and demonstrate how multiple causes reinforce each other and condemn African Americans to positions of inferiority and poverty Some of the contributors examine policies designed to correct problems while others look at the changing racial and ethnic composition in America and its implications for African Americans as other minorities surpass them in numbers and claim political economic and social attention The late James Tobin has contributed a foreword to this important collection

DIV **Poverty in Guatemala**, 2004 Available evidence suggests that poverty levels in Guatemala are higher than other Central American countries with data for 2000 showing over half of all Guatemalans about 6 4 million people living in poverty with about 16 per cent classified as living in extreme poverty This report provides a multi dimensional analysis of poverty in the country using both quantitative and qualitative data as well as examining the impact of government policies and spending on the poor Policy options and priorities for poverty reduction strategies are identified under the key challenges of building opportunities and assets reducing vulnerabilities improving institutions and empowering communities

*Perception and Prejudice* Jon Hurwitz, Mark

Peffley,1998-01-01 Based on one of the most extensive scientific surveys of race ever conducted this book investigates the relationship between racial perceptions and policy choices in America The contributors leading scholars in the fields of public opinion race relations and political behavior clarify and explore images of African Americans that white Americans hold and the complex ways that racial stereotypes shape modern political debates about such issues as affirmative action housing welfare and crime The authors make use of the largest national study of public opinion on racial issues in more than a generation the Race and Politics Study RPS conducted by the Survey Research Center at the University of California The RPS employed methodological improvements made possible by Computer Assisted Telephone Interviewing a technique that enables analysts to combine the internal validity of laboratory experiments with the external validity of probability sampling Taking full advantage of these research methods the authors offer highly nuanced analyses of subjects ranging from the sources of racial stereotypes to the racial policy preferences of Democrats and Republicans to the reasons for resistance to affirmative action Their findings indicate that while crude and explicit forms of racial prejudice may have declined in recent decades racial stereotypes persist among many whites and exert a powerful influence on the ways they view certain public policies     Attitudes of the Poor and Attitudes Toward the Poor ,1977     **Attitudes, Poverty and Agency in Russia and Ukraine**

Ann-Mari Sätre,Ildikó Asztalos Morell,2017-10-02 One of the main ideas behind this book was to trace continuities from the Soviet time to post Soviet Russia There are many similarities between Russia and Ukraine indicating such a continuation Russia and Ukraine had a lot in common in terms of culture language and history partly also because of their common origin After the dissolution of the Soviet Union however the two independent countries chose different routes of development This makes it possible to distinguish between the effects of politics reforms on the one hand and the impacts from the Soviet system on the other After some more or less chaotic development paths in the 1990s showing clear differences between the two countries and before the contemporary conflict broke out in Eastern Ukraine 2013 they had once again more similarities in terms of political leadership and policies in general The chapters in this book focus on Ukraine and on two regions in Russia Nizhny Novgorod and Archangelsk Contributors look at attitudes towards poverty and poor people strategies of the poor and policies against poverty This book was published as a special issue of the Journal of Contemporary Central and Eastern Europe     **Perceptions of the Poor** Bernice Dorothy Pomoranz Diamond,Elderia Bell

Franckeling,Suzanne Rhoda Hill,Steven Jesse London,George Adams Moriarty,Alan Martin Respler,1968     **Research Handbook on Measuring Poverty and Deprivation** Jacques Silber,2023-03-02 Encompassing chapters that address both unidimensional and multidimensional poverty this timely Research Handbook explores all aspects of poverty and deprivation measurement not only detailing broad issues but also scrutinising specific domains and aspects of poverty such as health energy and housing Its succinct and highly focussed chapters written by a diverse range of authors employ a combination of theoretical and empirical methodologies to offer well rounded explorations of complex topics     **Poverty in the Philippines**

Karin Schelzig, 2005 The report is based on a multi dimensional approach to poverty following ADB s poverty reduction strategy which defines poverty as a deprivation of essential assets The analytical framework of the country poverty analysis blends a more traditional analysis of income poverty with an assessment of access to five different types of assets Taken from the sustainable livelihoods approach these assets are human physical natural financial and social capital

**British Social Attitudes** Alison Park, John Curtice, Katarina Thomson, Miranda Phillips, Mark Johnson, Elizabeth Clery, 2009-02-24 British Social Attitudes remains a beacon of excellence It has adapted to the times providing a rich and textured guide to who we think we are what we think and how that has changed Financial Times an indispensable tool not just for governments but also for modern citizens to understand their fellows and themselves better The Times Higher Education Supplement shows what the British people really think as opposed to what journalists and politicians like to pretend they think John Pilger The annual British Social Attitudes survey is carried out by Britain s largest independent social research organisation the National Centre for Social Research It provides an indispensable guide to political and social issues in contemporary Britain This 24th Report summarises and interprets data from the most recent nationwide survey as well as drawing invaluable comparisons with the findings of previous years to provide a richer picture and deeper understanding of changing British social values The British Social Attitudes survey report is essential reading for anyone seeking a guide to the topical issues and debates of today or engaged in contemporary social and political research

**Measuring MSW Student Attitudes Toward Poverty and the Poor** Margaret Helen Whalen, 2005

[Why Americans Hate Welfare](#) Martin Gilens, 2009-05-13 Tackling one of the most volatile issues in contemporary politics Martin Gilens s work punctures myths and misconceptions about welfare policy public opinion and the role of the media in both Why Americans Hate Welfare shows that the public s views on welfare are a complex mixture of cynicism and compassion misinformed and racially charged they nevertheless reflect both a distrust of welfare recipients and a desire to do more to help the deserving poor With one out of five children currently living in poverty and more than 100

000 families with children now homeless Gilens's book is must reading if you want to understand how the mainstream media have helped justify and even produce this state of affairs Susan Douglas The Progressive Gilens's well written and logically developed argument deserves to be taken seriously Choice A provocative analysis of American attitudes towards welfare Gilens shows how racial stereotypes not white self interest or anti statism lie at the root of opposition to welfare programs Library Journal *The Perception of Poverty* A.J.M. Hagenaars, 2014-06-28 An attempt to define measure and explain poverty is presented in this volume by means of a newly developed theoretical model A combination of theory and empirical application is achieved by using the theoretical model on a sizeable data set derived from an extensive survey conducted in eight European countries The nature of poverty is thereby empirically defined and not a priori as being the income level at which households feel that their income is just between sufficient and insufficient An aggregate poverty index associated with this poverty line definition is calculated for each country and for subgroups within each country Conclusions for social policy are drawn describing which groups are at especially high risk of entering poverty and who therefore need more specific policies It is also discussed to what extent economic growth will eliminate poverty and which alternative measures are available *Africa Development Indicators 2007* World Bank, 2008 The world's demand for food is expected to double within the next 50 years while the natural resources that sustain agriculture will become increasingly scarce degraded and vulnerable to the effects of climate change In many poor countries agriculture accounts for at least 40 percent of GDP and 80 percent of employment At the same time about 70 percent of the world's poor live in rural areas and most depend on agriculture for their livelihoods World Development Report 2008 seeks to assess where when and how agriculture can be an effective instrument for economic development especially development that favors the poor It examines several broad questions How has agriculture changed in developing countries in the past 20 years What are the important new challenges and opportunities for agriculture Which new sources of agricultural growth can be captured cost effectively in particular in poor countries with large agricultural sectors as in Africa How can agricultural growth be made more effective for poverty reduction How can governments facilitate the transition of large populations out of agriculture without simply transferring the burden of rural poverty to urban areas How can the natural resource endowment for agriculture be protected How can agriculture's negative environmental effects be contained This year's report marks the 30th year the World Bank has been publishing the World Development Report Perceptions of Poverty, Income Adequacy and Living Standards in Australia Peter Saunders, George Matheson, 1992 **The Institutional Logic of Welfare Attitudes** Christian Albrekt Larsen, 2016-02-24 Why are people who live in liberal welfare regimes reluctant to support welfare policy And conversely why are people who live in social democratic welfare regimes so keen to support it These core questions lie at the heart of this intriguing book By examining how different welfare regimes influence public support for welfare policy the book explores the institutional settings of different regimes and how each produces its own support While previous studies in this field have

failed to link the macro structure of welfare regimes and the micro structure of welfare attitudes this book redresses this problem by combining welfare regime theory and literature on deservingness criteria alongside empirical evidence from national and cross national data While recent trends in welfare state development such as cuts in benefit levels and increased use of targeting combined with increased immigration might very well influence our perceptions of the deservingness of the needy this book provides a strong convincing and provoking argument that challenges the micro foundation of present comparative welfare state theory The result is an important work for all studying and working in the fields of public policy and social welfare
