## **Perceptual Assurance And The Reality Of The World:**

**Perceptual assurance and the reality of the world** Errol E. Harris, 1974      **Perceptual Assurance and the Reality of the World** Errol E. Harris, Derek Gregory, 1974      Formal, Transcendental, and Dialectical Thinking Errol E. Harris, 1987-01-01 This is a critical examination of the three types of logic advocated by current philosophical schools Harris shows that certain basic presuppositions underlying the techniques of symbolic logic have resulted in intellectual stultification moral dilemma and practical sterility These presuppositions are shown to be at variance with those of contemporary scientific method Critical consideration is given to alternatives and a more appropriate logic of science is proposed providing an escape from crippling relativism and promising objective validation of value judgments This approach offers some prospect of solutions to the major problems now troubling our civilization      **Philosophies of Nature: The Human Dimension** Robert S. Cohen, A.I. Tauber, 2013-04-17 Philosophical understandings of Nature and Human Nature Classical Greek and modern West Christian Buddhist Taoist by 14 authors including Robert Neville Stanley Rosen David Eckel Livia Kohn Tienyu Cao Abner Shimoney Alfred Tauber Krzysztof Michalski Lawrence Cahoon Stephen Scully Alan Olson and Alfred Ferrarin Dedicated to the phenomenological ecology of Erasm Koh with 10 of his essays and a full bibliography Overall theme on the question of the moral sense of nature      *Dictionary of Modern American Philosophers* John R. Shook, 2005-01-01 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are represented the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought      *On Truth and the Representation of Reality* Dan Neshet, 2002 In *On Truth and the Representation of Reality* Dan Neshet develops a new theory of truth in the framework of pragmatist theory of representation Using the pragmatist theory of perception for the basis of his epistemological explanation of our confrontation with external Reality and how it is represented Neshet shows that in our perceptual operations we quasi prove the truth of our perceptual judgments      *Truth and the End of Inquiry* Cheryl J. Misak, 2004 Cheryl Misak presents a pragmatic account of truth C S Peirce the founder of pragmatism argued that truth is what we would agree upon were inquiry to be pursued as far as it could fruitfully go In the course of the past century pragmatism has remained one of the most significant movements in

American philosophy Misak's book is one of the landmark publications in recent pragmatist thought. She pays attention both to Peirce's texts and to the requirements for a suitable account of truth. This new paperback edition includes a brand new additional chapter along with a new preface and revision. *The Roles of Representation in Visual Perception* Robert French, Berit Brogaard, 2024-05-30. This volume contains new papers addressing a number of new and traditional issues pertaining to the roles of representations in visual perception. Among these issues is the one concerning the nature of the perceptual state itself, e.g. on the issue of whether the perceptual state like its distal objects is structured for instance by possessing a spatial character. Other issues include those of whether at least aspects of the distal object are presented immediately to us visually, whether representation plays any interesting role in disjunctivist and naïve realist accounts of visual experience and the relationship among visual perception, attention and representation. The anthology includes a wide variety of positions on the subject of the roles of representations in visual perception which would help to close the literature gap and will be of interest to scholars from all schools and trends of philosophy of mind. *The Bloomsbury Encyclopedia of Philosophers in America* John R. Shook, 2016-02-11. For scholars working on almost any aspect of American thought. The Bloomsbury Encyclopedia to Philosophers in America presents an indispensable reference work. Selecting over 700 figures from the Dictionary of Early American Philosophers and the Dictionary of Modern American Philosophers, this condensed edition includes key contributors to philosophical thought. From 1600 to the present day, entries cover psychology, pedagogy, sociology, anthropology, education, theology, and political science, before these disciplines came to be considered distinct from philosophy. Clear and accessible, each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. Featuring a new preface by the editor and a comprehensive introduction, *The Bloomsbury Encyclopedia to Philosophers in America* includes 30 new entries on twenty-first century thinkers including Martha Nussbaum and Patricia Churchland. With in-depth overviews of Waldo Emerson, Margaret Fuller, Noah Porter, Frederick Rauch, Benjamin Franklin, Thomas Paine, and Thomas Jefferson, this is an invaluable one-stop research volume to understanding leading figures in American thought and the development of American intellectual history. **Truth, Politics, Morality** Cheryl Misak, 2002-02-07. Cheryl Misak argues that truth ought to be reinstated to a central position in moral and political philosophy. She argues that the correct account of truth is one found in a certain kind of pragmatism: a true belief is one upon which inquiry could not improve; a belief which would not be defeated by experience and argument. This account is not only an improvement on the views of central figures such as Rawls and Habermas, but it can also make sense of the idea that despite conflict, pluralism, and the expression of difference, our moral and political beliefs aim at truth and can be subject to criticism. Anyone interested in a fresh discussion of political theory and philosophy will find this a fascinating read. **Contemporary Implications of Vygotsky and Luria** Michael Cole, 1996. *The Human Mind* James Sully, 1892. **The Problems of Perception** R. J. Hirst, 2014-03-18. First published in 2002.

Written in 1959 this volume looks at the philosophical problems of perception that arise mainly because our traditional common sense notions clash with the factual evidence concerning not only the occurrence of illusions and hallucinations but also the essential role played by complex causal and psychological processes in perceiving *The Teilhard Review and Journal of Creative Evolution*, 1982 **Essays in Phenomenology** Maurice Natanson, 2012-12-06 Fifteen years ago Dorion Cairns concluded an article on phenomenology with a cautious appraisal of its influence in America Thus far he wrote it continues to be an exotic The situation today has changed translations of the writings of Husserl Heidegger Marcel Sartre and Merleau Ponty have appeared and commentaries on these and related thinkers are not uncommon Moreover discussion of phenomenological problems is increasingly becoming part of the American if not the British philosophical scene Phenomenology is in danger of domestication Signs of its accommodation include a willingness to pay tribute to Husserl's Logical Investigations by those who find relatively little to interest them in his later work a location of what are taken to be common themes and underlying convergences of emphasis in Continental phenomenology and Anglo American philosophy of the more nearly Wittgensteinian and Austinian varieties and a growing impatience shared by some phenomenologists with expositions explications and interpretations of Husserl's work at the expense of original applications of phenomenology Most bluntly put the attitude is Don't talk about it do it It would seem that we have arrived at a point where introductions to phenomenology are of doubtful value if not superfluous The present collection of essays is based on different assumptions and points to an alternative conception of the role of both methodology and originality in phenomenological work
