*Perceptual Dialectology* Dennis Richard Preston,1989      *Politics and the Slavic Languages* Tomasz

Kamusella,2021-06-17 During the last two centuries ethnolinguistic nationalism has been the norm of nation building and state building in Central Europe The number of recognized Slavic languages in line with the normative political formula of language nation state gradually tallied with the number of the Slavic nation states especially after the breakups of Czechoslovakia the Soviet Union and Yugoslavia But in the current age of borderless cyberspace regional and minority Slavic languages are freely standardized and used even when state authorities disapprove As a result since the turn of the 19th century the number of Slavic languages has varied widely from a single Slavic language to as many as 40 Through the story of Slavic languages this timely book illustrates that decisions on what counts as a language are neither permanent nor stable arguing that the politics of language is the politics in Central Europe The monograph will prove to be an essential resource for scholars of linguistics and politics in Central Europe      **Creating Languages in Central Europe During the Last**

**Millennium** T. Kamusella,2014-12-22 After 1918 Central Europe s multiethnic empires were replaced by nation states which gave rise to an unusual ethnolinguistic kind of nationalism This book provides a detailed history and linguistic analysis of how the many languages of Central Europe have developed from the 10th century to the present day      **Books in Print** ,1991

Subject Guide to Books in Print ,1996      Handbook of Perceptual Dialectology Dennis Richard Preston,1999-01-01

Perceptual dialectology investigates what ordinary people as opposed to professional linguists believe about the distribution of language varieties in their own and surrounding speech communities and how they have arrived at and implement those beliefs It studies the beliefs of the common folk about which dialects exist and indeed about what attitudes they have to these varieties Some of this leads to discussion of what they believe about language in general or folk linguistics Surprising divergences from professional results can be found For the professional it is intriguing to find out why and whether the folk can be wrong or whether the professional has missed something Volume 1 of this handbook aims to provide for the field of perceptual dialectology a historical survey a regional survey adding to the earlier preponderance of studies in Japan the Netherlands and the United States a methodological survey showing in detail how data have been acquired and processed an interpretive survey showing how these data have been related to both linguistic and other socio cultural facts a comprehensive bibliography The results and methods of perceptual dialectical studies should be interesting not only to linguists variationists dialectologists and students of the social psychology of language but also to sociologists anthropologists folklorists and other students of culture as well as to language planners and educators      **Cityscapes and**

**Perceptual Dialectology** Jennifer Cramer,Chris Montgomery,2016-02-22 This edited collection presents papers relating to the state of the art in Perceptual Dialectology research The authors take an international view of the field of Perceptual Dialectology broadly defined to assess the similarities and contrasts in non linguists perceptions of the dialect landscape The

volume is global in focus and chapters discuss data gathered in the United States the United Kingdom the Republic of Ireland France Germany Austria and South Korea The common methods used by many of the contributors means that readers will be able to draw comparisons from the breadth of the volume The primary focus of this volume is geared toward an examination of dialect perceptions in and of cities with an additional goal of presenting empirical theoretical and methodological advancements in Perceptual Dialectology Authors contributions to the collection examine how the urban setting influences perceptions of linguistic variation and in the course of examining the connections between place and perceptions explore several interrelated themes of linguistic variation including the differences in the perception of rural and urban areas processes of perception and language change and the relationship between perception and reality *Dialectological and Folk Dialectological Concepts of Space* Sandra Hansen, Christian Schwarz, Philipp Stoeckle, Tobias Streck, 2012-10-30 In variational linguistics the concept of space has always been a central issue However different research traditions considering space coexisted for a long time separately Traditional dialectology focused primarily on the diatopic dimension of linguistic variation whereas in sociolinguistic studies diastratic and diaphasic dimensions were considered For a long time only very few linguistic investigations tried to combine both research traditions in a two dimensional design a desideratum which is meant to be compensated by the contributions of this volume The articles present findings from empirical studies which take on these different concepts and examine how they relate to one another Besides dialectological and sociolinguistic concepts also a lay perspective of linguistic space is considered a paradigm that is often referred to as folk dialectology Many of the studies in this volume make use of new computational possibilities of processing and cartographically representing large corpora of linguistic data The empirical studies incorporate findings from different linguistic communities in Europe and pursue the objective to shed light on the inter relationship between the different concepts of space and their relevance to variational linguistics *Handbook of Perceptual Dialectology*, 2002-12-20 Volume 1 Perceptual dialectology investigates what ordinary people as opposed to professional linguists believe about the distribution of language varieties in their own and surrounding speech communities and how they have arrived at and implement those beliefs It studies the beliefs of the common folk about which dialects exist and indeed about what attitudes they have to these varieties Some of this leads to discussion of what they believe about language in general or folk linguistics Surprising divergences from professional results can be found For the professional it is intriguing to find out why and whether the folk can be wrong or whether the professional has missed something Volume 1 of this handbook aims to provide for the field of perceptual dialectology a historical survey a regional survey adding to the earlier preponderance of studies in Japan the Netherlands and the United States a methodological survey showing in detail how data have been acquired and processed an interpretive survey showing how these data have been related to both linguistic and other socio cultural facts a comprehensive bibliography The results and methods of perceptual dialectical studies should be interesting not only to linguists variationists dialectologists and

students of the social psychology of language but also to sociologists anthropologists folklorists and other students of culture as well as to language planners and educators Volume 2 The Handbook of Perceptual Dialectology Volume II expands on the coverage of both regions and methodologies in the investigation of nonlinguists perceptions of language variety New areas studied include Canada anglophone and francophone Cuba Hungary Italy Korea and Mali and most prominent among the new approaches are studies of the salience of specific linguistic features in variety identification and assessment As in Volume I the reader will find in these chapters everything from the statistical treatment of the ratings of dialect attributes to studies of the actual discourses of nonlinguists discussing language variety Dialectologists sociolinguistics ethnographers and applied linguists who work in areas where language variety is a concern will appreciate the findings and methods of these studies but social scientists of every sort who want to understand the role of language in the cultural lives of ordinary people will also find much of interest here *Handbook of Perceptual Dialectology* Daniel Long, Dennis R.

Preston, 2002-12-20 The Handbook of Perceptual Dialectology Volume 2 expands on the coverage of both regions and methodologies in the investigation of nonlinguists perceptions of language variety New areas studied include Canada anglophone and francophone Cuba Hungary Italy Korea and Mali and most prominent among the new approaches are studies of the salience of specific linguistic features in variety identification and assessment As in Volume I the reader will find in these chapters everything from the statistical treatment of the ratings of dialect attributes to studies of the actual discourses of nonlinguists discussing language variety Dialectologists sociolinguistics ethnographers and applied linguists who work in areas where language variety is a concern will appreciate the findings and methods of these studies but social scientists of every sort who want to understand the role of language in the cultural lives of ordinary people will also find much of interest here **The Spatiality of Perceptual Dialectology** Benjamin Graham Jones, 2021 A criticism that has been leveled against

modern sociolinguistic research is that space has been carefully controlled out of studies and that spatial variation is not examined Britain 2010b p 3 This dissertation responds to this criticism by using the tools and theories of perceptual dialectology to reincorporate physical space into analyses of sociolinguistic data This is done through a study that uses the concept of spatiality as proposed by David Britain 2010a 2010b in the creation of a draw a map task Preston 1989 and the interpretation of the results I propose that the three components of spatiality physical social and psychological space can be used in the analysis of data collected through perceptual dialectology methods when addressing the evaluation problem of language variation and change Weinreich Labov Herzog 1968 I further explore how content analysis Krippendorff 1989 and critical discursive psychology Edley and Wetherell 2001 can aid in the analysis of qualitative data in creating aggregate maps of non linguists perceptions of linguistic variation in their communities This is accomplished by analyzing the mental maps of dialect regions collected from respondents online The results are based upon the perceived linguistic variation by individuals in the state of Maine and is analyzed with regards to the sociodemographic and physical geography of the state
