Delivery Technologies for Biopharmaceuticals Lene Jorgensen,Hanne Morck Nielson,2009-10-23 Advances in biotechnology have provided scientists with an increasing number of biopharmaceuticals such as novel peptide and protein drugs as well as nucleic acid based drugs for gene therapy However successful delivery of these biopharmaceuticals is a major challenge because their molecular properties lead to poor physical and chemical stability in the body and limited membrane permeability Therefore researchers are developing a range of new delivery technologies and materials to enable these new drugs to be delivered intact to their target sites Delivery Technologies for Biopharmaceuticals describes strategies to overcome the main barriers for successful delivery of therapeutic peptides proteins and nucleic acid based drugs or vaccines related to the site of administration and the target site Many of the approaches described are reported in formulations in current clinical trials as well as in marketed products Contents include challenges in delivery of biopharmaceuticals novel formulation approaches for peptide and protein injectables non viral chemical vectors and viral technology for delivery of nucleic acid based drugs immune response adjuvants and delivery systems for vaccines several examples of delivery systems for different biopharmaceuticals a critical

assessment of delivery technologies for biopharmaceuticals Delivery Technologies for Biopharmaceuticals is an essential single volume introduction to the technologies used by researchers to ensure efficient delivery of this exciting new class of drugs It will be of value to researchers and students working in drug delivery formulation biopharmaceuticals medicinal chemistry and new materials development

**Dermal Absorption Models in Toxicology and Pharmacology** Jim E. Riviere, Nancy A. Monteiro-Riviere, 2005-08-24 Many experimental methods and mathematical modeling approaches rooted in disciplines outside of toxicology can be effectively applied to estimating dermal absorption Dermal Absorption Models in Toxicology and Pharmacology explores current approaches and techniques that can be used to quantify dermal absorption with endpoints useful in both toxicology and pharmacology The book begins with a review of basic principles and the in vitro and in vivo experimental approaches available for assessing dermal absorption of drugs and chemicals This is followed by coverage of mathematical or in silico models for quantitating percutaneous absorption and the applications of these techniques to the risk assessment process The remainder of the book explores scenarios where the unique properties of the chemicals being studied or the matrix in which they are exposed must be considered and then wraps up with a comparative analysis of chemical permeability in human and animal skin Many of the books covering this subject are just too comprehensive and serve primarily as reference works This book takes a different approach Jim Riviere's editorial guidance ensures that the information is readable accessible authoritative and concise making it the perfect resource for familiarizing new researchers and students to the field and updating established scientists

**Dermatotoxicology** Klaus Peter Wilhelm, Hongbo Zhai, Howard I.
