Performance In Life And Literature:

Performance in Life and Literature Paul Havener Gray, James VanOosting, 1996 This book is about doing language It s about the performance of language in our everyday lives as well as in literature These two kinds of doing are intimately connected Words on the page of a novel in the lines of a poem or the dialogue of a play are exactly the same as those uttered by children on a playground colleagues in a workplace adversaries at debate or lovers in moments of intimacy Talkers and writers use language in the same ways listeners and readers make sense of that language by the same means The measure of our lives in Morrison s formulation is how we do language how we perform words She makes no distinction between literary art and everyday experience *Writing Performance, Identity, and Everyday Life* Ronald J. Pelias, 2018-03-13 Writing Performance Identity and Everyday Life invites the reader into Ronald J Pelias world of artistic and everyday performance Calling upon a broad range of qualitative methods these selected writings from Pelias submerge themselves in the evocative and embodied in the material and consequential often creating moving accounts of their topics The book is divided into four sections Foundational Logics Performance Identity and Everyday Life Part I addresses the methodological underpinnings of the book focusing on the touchstones that inform Pelias work performative autoethnographic poetic and narrative methods These directions push the researcher toward empathic engagement a leaning toward others using the literary to evoke the cognitive and affective aspects of experience and an ethical sensibility located in social justice Parts II IV focus on artistic and everyday life performances including discussions of the disciplinary shift from the oral interpretation of literature to the field of performance studies empathy and the actor s process conceptions of performance the performance of race gender and sexuality and performances in interpersonal relations and academic circles By the end readers will see Pelias demonstrate the power of qualitative methods to engage and to present alternative ways of being Pelias work shows us how to understand and feel the evocative strength of thinking performatively **Norwegian Life and Literature** Carl John Birch Burchardt, 1920 Post-Project Monitoring of BMP's/SUDS to Determine Performance and Whole-Life Costs L. K. Lampe, 2004-06-30 Over the past 20 years the use of Best Management Practices BMPs in the United States has been instrumental in reducing both the detrimental impacts to receiving water quality and the exacerbated flooding caused by urbanization and storm water drainage More recently Sustainable Urban Drainage Systems SUDS have started to be used in the United Kingdom Both SUDS and BMPs attempt to mimic the drainage patterns of the natural watershed and can also provide a degree of treatment needed to improve the quality of the water discharged to an acceptable level The costs of conventional stormwater collection systems are determined primarily in terms of initial capital expenditure Long term maintenance costs are absorbed by stormwater authorities that are responsible for maintaining their infrastructure as part of their asset base Currently only a few of these responsibilities exist for BMPs and SUDS which generally incorporate surface components and are often dependent on landscaping rather than on traditional construction techniques but may require

significant regular maintenance Any potential adopting organization will require guidance on the maintenance regimes of different types of systems and how such regimes translate into long term adoption costs The project is being conducted in two phases Phase 1 which is the subject of this report includes a literature review and a survey of stormwater authorities and organizations in the US and UK to identify the most commonly used BMPs and SUDS and to determine the availability of data on their cost and performance As part of Phase 2 the operation of selected BMPs and SUDS will be monitored over a one year period in terms of pollutant removal and hydrologic hydraulic efficiency and applicability of their design criteria and maintenance regime The protocols developed in Phase 1 will be used to assess BMPs SUDS performance and whole life costs

for simultaneous measurement of the individual and the institution They also show how their analytic framework can be applied to other criminal justice components such as prosecution adjudication post release supervision and policing Further they argue their framework can be used to evaluate the privatization of almost any publicly administered service They contend that the ability to meaningfully compare public and private prisons can better inform penal policy and improve prison performance and accountability
