A Rhetoric of Style Barry Brummett,2008-07-07 Exploring style in a global culture In A Rhetoric of Style Barry Brummett illustrates how style is increasingly a global system of communication as people around the world understand what it means to dress a certain way to dance a certain way to decorate a certain way to speak a certain way He locates style at the heart of popular culture and asserts that it is the basis for social life and politics in the twenty first century Brummett sees style as a system of signification grounded largely in image aesthetics and extrarational modes of thinking He discusses three important aspects of this system its social and commercial structuring its political consequences and its role as the chief rhetorical system of the modern world He argues that aesthetics and style are merging into a major engine of the global economy and that style is becoming a way to construct individual identity as well as social and political

structures of alliance and opposition It is through style that we stereotype or make assumptions about others political identities their sexuality their culture and their economic standing To facilitate theoretical and critical analysis Brummett develops a systematic rhetoric of style and then demonstrates its use through an in depth exploration of gun culture in the United States Armed with an understanding of how this rhetoric of style works methodologically students and scholars alike will have the tools to do their own analyses Written in clear and engaging prose A Rhetoric of Style presents a novel discussion of the workings of style and sheds new light on a venerable and sometimes misunderstood rhetorical concept by illustrating how style is the key to constructing a rhetoric for the twenty first century

Handbook of Gender Research in Psychology Joan C. Chrisler, Donald R. McCreary, 2010-03-12 Donald R McCreary and Joan C Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the eld of psychology and they have been conducted in every sub eld of the discipline There are probably many reasons for the popularity of these studies but three reasons seem to be most prominent First social psychological studies of person perception show that sex is especially salient in social groups It is the rst thing people notice about others and it is one of the things we remember best Fiske Haslam Stangor Lynch Duan Glass 1992 For example people may not remember who uttered a witty remark but they are likely to remember whether the quip came from a woman or a man Second many people hold rm beliefs that aspects of physiology suit men and women for particular social roles Men s greater upper body strength makes them better candidates for manual labor and their greater height gives the impression that they would make good leaders i e people we look up to Women s reproductive capacity and the caretaking tasks e g breastfeeding baby minding that accompany it make them seem suitable for other roles that require gentleness and nurturance Third the logic that underlies hypothesis testing in the sciences is focused on difference Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ
