Burrowes, 2010 A small and extremely poor Islamic country Yemen is located on the edge of the Arab world in the southernmost corner of the Arabian Peninsula It was the product of the unification of the Yemen Arab Republic and the People's Democratic Republic of Yemen in May 1990 The location of the two Yemens on the world's busiest sea lane at the southern end of the Red Sea where Asia almost meets Africa gave them strategic significance from the start of the age of imperialism through the Cold War More vital today is the fact that Yemen shares a long border with oil rich Saudi Arabia and is a key to efforts both to spread and to end global revolutionary Islam and its use of terror The second edition of the *Historical Dictionary of Yemen* has been thoroughly updated and greatly expanded Through its list of acronyms and abbreviations a chronology an introductory essay a bibliography and over 800 cross referenced dictionary entries greater attention has been given to foreign affairs economic institutions and policies social issues religion and politics **An Ethnography of Fragrance** Dinah Jung, 2022-06-08 The perfumery arts in Asia have traditionally been presented as exotic or in recent decades mainly ignored The ethnographic report in hand recalibrates the character and meaning of perfumery in the Islamic world illustrated by the local example of Adan La j By retelling the stories which have become associated with specific fragrances there the author simultaneously introduces the reader to the history and culture of Islam and the southern edge of Yemen The cultural exchange along the Indian Ocean Rim and within the colonial empires supported the spread and refinement of aromatics The result is a new and fascinating portrayal and explanation of perfumery in general as well as of its tradition and special features in West Asia up to recent times *A Dictionary of Post-classical Yemeni Arabic: alif-shīu* Moshe Piamenta, 1990 747 is the thrilling story behind the Queen of the Skies the Boeing 747 as told by Joe Sutter one of the most celebrated engineers of the twentieth century who spearheaded its design and construction Sutter's vivid narrative takes us back to a time when American technology was cutting edge and jet travel was still glamorous and new With wit and warmth he gives an insider's sense of the larger than life size personalities and the tensions in the aeronautical world Subject Index of the Modern Books Acquired by the British Museum in the Years ... **Understanding Life in the Borderlands** I. William Zartman,2010-01-25 The past two decades have seen an intense interdisciplinary interest in the border areas between states inhabited territories located on the margins of a power center or between power centers This timely and highly original collection of essays edited by noted scholar I William Zartman is an attempt to begin to understand both these areas and the interactions that occur within and across them that is to understand how borders affect the groups living along them and the nature of the land and people abutting on and divided by boundaries These essays highlight three defining features of border areas borderlanders constitute an experiential and culturally identifiable unit borderlands are characterized by constant movement in time space and activity and in their mobility borderlands always prepare for the next move at the same time that they respond to the last one The ten case studies presented range over four millennia and provide windows for observing the dynamics of life in borderlands They also have policy relevance especially in creating an awareness of borderlands as dynamic social spheres and of the need to anticipate the changes that given policies will engender changes that will in turn require their own solutions Contrary to what one would expect in this age of globalization says Zartman borderlands maintain their own dynamics and identities and indeed spread beyond the fringes of the border and reach deep into the hinterland itself
