Perils Of Protest:

The Perils of Protest Teresa Wright, 2001-03-01 China's student movement of 1989 ushered in an era of harsh political repression crushing the hopes of those who desired a more democratic future. Communist Party elites sealed the fate of the movement but did ill-considered choices by student leaders contribute to its tragic outcome. To answer this question, Teresa Wright centers on a critical source of information that has been largely overlooked by the dozens of works that have appeared in the past decade on the Democracy Movement: the students themselves. Drawing on interviews and little-known first-hand accounts, Wright offers the most complete and representative compilation of thoughts and opinions of the leaders of this student action. She compares this closely studied movement with one that has received less attention: Taiwan's Month of March Movement of 1990, introducing for the first time in English a narrative of Taiwan's largest student demonstration to date. Despite their different outcomes, the Taiwan action ended peacefully and resulted in the government addressing student demands; both movements similarly maintained a strict separation between student and non-student participants and were unstable and conflict-ridden. This comparison allows for a thorough assessment of the origins and impact of student behavior in 1989 and provides intriguing new insights into the growing literature on political protest in non-democratic regimes.

The Perils of Protest Wright, 19?? *Indoctrinating the Youth* Jennifer Liu, 2024-01-31 *Indoctrinating the Youth* examines how the Guomindang (GMD) or Nationalists sought to maintain control of middle school students and cultivate their political loyalty over the trajectory of the Second Sino-Japanese War, Chinese Civil War, and postwar Taiwan. During the Sino-Japanese War, the Nationalists managed middle school refugee students by merging schools, publishing and distributing updated textbooks, and assisting students as they migrated to the interior with their principals and teachers. In Taiwan, the China Youth Corps (CYC) became a symbol of the regime's successful establishment. Tracing Nationalist efforts to indoctrinate ideology and martial spirit, Jennifer Liu investigates how GMD leaders Chiang Kai-shek and his son Chiang Ching-kuo tried to build support among young people in their efforts to stabilize Taiwanese society under their rule. By comparing two key youth organizations, the Three People's Principles Youth Corps in China and the CYC on Taiwan, Liu uses education as a lens to analyze state building in modern China. Liu's careful analysis of the inner workings of GMD youth organizations also illuminates the day-to-day operations of military training in gender-segregated upper middle schools, including how the government selected instructors and the skills taught to students. According to Liu, mandatory military training contributed to preventing major protest against the government, but the policy was not without critics. Intellectuals, parents, and students voiced their dissent at what they perceived as excessive control by a repressive government and a waste of resources interfering with academics. The government-mandated civics curriculum, including government-approved textbooks and standards, reveals the characteristics and duties GMD officials believed modern citizens of the next generation should possess. Through provisions for refugee students, youth organizations, military training, and civics classes, GMD secondary education

policy played a critical role in the process of state building in both modern China and Taiwan Skillfully combining archival work in Nanjing and Taipei along with oral interviews with former students and CYC administrators instructors and members Liu offers a unique perspective toward a balanced assessment of Nationalist Party rule A Protestant's Principle in times of peril. The Earldom of Mar in Sunshine and in Shade During Five Hundred Years Alexander Crawford Lindsay Crawford, 1882 Democracies in Peril Ida Bastiaens, Nita Rudra, 2018-07-26 Globalization is triggering a revenue shock in developing economies International trade taxes once the primary source of government revenue have been cut drastically in response to trade liberalization Bastiaens and Rudra make the novel argument that regime type is a major determinant of

revenue raising capacity once free trade policies have been adopted Specifically policymakers in democracies confront greater challenges than their authoritarian counterparts when implementing tax reforms to offset liberalization s revenue shocks The repercussions are significant while the poor bear the brunt of this revenue shortfall in democracies authoritarian regimes are better off overall Paradoxically then citizens of democracies suffer precisely because their freer political culture constrains governmental ability to tax and redistribute under globalization This important contribution on the battle between open societies and the ability of governments to help their people prosper under globalization is essential reading for students and scholars of political economy development studies and comparative politics *The earldom of Mar in sunshine and in shade during five hundred years, in reply to an address to the peers of Scotland by W.H. earl of Kellie* Alexander William C.
