**Metabolic Syndrome Pathophysiology** Undurti N. Das, 2010-02-23 Metabolic Syndrome Pathophysiology The Role of Essential Fatty Acids provides current research exploring the links among insulin insulin receptors polyunsaturated fatty acids brain growth and disease Specific interactions of essential fatty acids and polyunsaturated fatty acids in brain development and several disease groups are described The role of inflammation in disease and how fatty acids regulate low

systemic inflammation are examined and explained Metabolic and neurologic dynamics are presented to provide a linkage between the presence of omega 3 and omega 6 and protection against diseases and conditions such as diabetes mellitus obesity autoimmune diseases and hypertension **Molecular Basis of Health and Disease** Undurti N. Das,2011-04-02 The book describes how the balance between pro and anti inflammatory molecules is related to health and disease It is suggested that many diseases are initiated and their progress is influenced by inflammatory molecules and a decrease in the production and or action of anti inflammatory molecules and this imbalance between pro and anti inflammatory molecules seems to have been initiated in the perinatal period This implies that strategies to prevent and manage various adult diseases should start in the perinatal period An alteration in the metabolism of essential fatty acids and their anti inflammatory molecules such as lipoxins resolvins protectins maresins and nitrolipids seems to play a major role in the pathobiology of several adult diseases Based on these concepts novel therapeutic approaches in the management of insulin resistance obesity type 2 diabetes mellitus metabolic syndrome cancer lupus rheumatoid arthritis and other auto immune diseases are presented Based on all these evidences a unified concept that several adult diseases are due to an alteration in the balance between pro and anti inflammatory molecules is discussed and novel methods of their management are presented
