Perioperative Management Of Pacemaker Patients:

Perioperative Management of Pacemaker Patients J.L. Atlee III, H. Gombotz, K.H. Tscheliessnigg, 2012-12-06 A symposium Perioperative Management of Pacemaker Patients was held in May 1990 at the Karl Franzens Universität Landeskrankenhaus Graz Austria The purpose of the symposium organized by the Departments of Anesthesiology and Surgery was to discuss the current status of permanent pacemaker technology emerging developments in this field legal issues indications and methods for temporary perioperative pacing and the potential for pacemaker malfunction and adverse patient pacemaker interactions in perioperative and other medical settings It was hoped that participants would come to some consensus concerning recommendations for satisfactory perioperative management of pacemaker patients This symposium was probably the first occasion ever that brought together representatives of the pacemaker industry implanting physicians and physicians responsible for the management of pacemaker patients in perioperative and other hospital settings to discuss these important matters Certainly it was recognized by all who attended that there existed at the time little in the way of substantial knowledge of how to best manage pacemaker patients or patients with possible indications for temporary pacing in unique hospital settings especially with exposure to electromagnetic and other potential interference but in the absence of professional persons with direct knowledge of pacemakers and related devices Much new information was presented and useful ideas exchanged so that three symposium participants were of the opinion that papers presented at this meeting should be published as a collective work
