Periscope View A Professional Autobiography:

Periscope View George Walter Gillow Simpson, 1972 *Periscope View* George Walter Gillow Simpson, 1972 Friend or Foe Paul Kemp, 1993-09-14 During the Second World War there were over 100 instances of naval engagements between ships submarines and aircraft of the same side In the past there has often been a reluctance by the authorities to admit to these losses but with operational records now available it is possible for historians to explain how a good number of ships and submarines were attacked damaged or sunk by the forces of their own side **With Utmost Spirit** Barbara Tomblin, 2004-10-08 Nineteen months before the D day invasion of Normandy Allied assault forces landed in North Africa in Operation TORCH the first major amphibious operation of the war in Europe Under the direction of Gen Dwight D Eisenhower AUS Adm Andrew B Cunningham RN Admiral H Kent Hewitt USN and others the Allies kept pressure on the Axis by attacking what Winston Churchill dubbed the soft underbelly of Europe The Allies seized the island of Sicily landed at Salerno and Anzio and established a presence along the coast of southern France With Utmost Spirit takes a fresh look at this crucial naval theater of the Second World War Barbara Brooks Tomblin tells of the U S Navy s and the Royal Navy s struggles to wrest control of the Mediterranean Sea from Axis submarines and aircraft to lift the siege of Malta and to open a through convoy route to Suez while providing ships carrier air support and landing craft for five successful amphibious operations Examining official action reports diaries interviews and oral histories Tomblin describes each of these operations in terms of ship to shore movements air and naval gunfire support logistics countermine measures antisubmarine warfare and the establishment of ports and training bases in the Mediterranean Firsthand accounts from the young officers and men who manned the ships provide essential details about Mediterranean operations and draw a vivid picture of the war at sea and off the beaches Barbara Brooks Tomblin taught military history at Rutgers University and is the author of several articles and G I Nightingales The Army Nurse Corps in World War II She lives in California **The Sea and the Second World War** Marcus Faulkner, Alessio Patalano, 2019-12-10 An in depth study of World War II s naval operations Rarely does a collection of essays offer so many new and persuasive assessments Well done Professor David Snead Liberty University The sea shaped the course and conduct of World War II from the first moments of the German invasion of Poland on September 1 1939 to the Japanese surrender on September 2 1945 The impact could be felt far beyond the shoreline as the arms and armies carried across the oceans were ultimately destined to wage war ashore Populations and industries depended on the raw materials and supplies in a war that increasingly became a contest of national will and economic might Ultimately it was the war at sea that linked numerous regional conflicts and theaters of operation into a global war As the war grew in complexity and covered an increasingly larger geographical area the organization of the maritime effort and the impact it had on the formulation of national strategy also evolved This volume illustrates the impact of naval operations on the Second World War by highlighting topics previously neglected in the scholarship In doing so it provides new insights into political

strategic administrative and operational aspects of the maritime dimension of the war A fine collection of essays by some of the leading scholars in the field The book addresses comprehensively the vital importance of the sea across a range of theaters during the Second World War through a diverse selection of case studies The examinations and re examinations in this volume will be of interest to both scholars and practitioners Dr Steven Paget University of Portsmouth

Strangling the Axis Richard Hammond, 2020-06-25 This is a major reassessment of the causes of Allied victory in the Second World War in the Mediterranean region Drawing on a unique range of multinational source material Richard Hammond demonstrates how the Allies ability to gain control of the key routes across the sea and sink large quantities of enemy shipping denied the Axis forces in North Africa crucial supplies and proved vital to securing ultimate victory there Furthermore the sheer scale of attrition to Axis shipping outstripped their industrial capacity to compensate leading to the collapse of the Axis position across key territories maintained by seaborne supply such as Sardinia Corsica and the Aegean islands As such Hammond demonstrates how the anti shipping campaign in the Mediterranean was the fulcrum about which strategy in the theatre pivoted and the vital enabling factor ultimately leading to Allied victory in the region

After Jutland James V Goldrick, 2018-10-15 After Jutland analyses the naval war in Northern European waters following the critical but inconclusive Battle of Jutland A popular misconception is that Jutland marked the end of the operational career of the German High Sea Fleet and the beginning of a period of stagnation for both it and its opponent the Grand Fleet The reality is much more complex The German battle fleet was quiescent for much of the time in the North Sea but it supported an ambitious amphibious campaign in the Baltic while a bitter commerce war was waged by U Boats and the light craft fought a grueling campaign in the waters of the English Channel and the Belgian Coast After Jutland focuses primarily on the Royal Navy as the dominant maritime force but it also

analyses the struggles of the beleaguered German Navy as it sought to find ways to break the tightening stranglehold of the blockade and undermine Allied control of the world's oceans and of British home waters in particular. The continuing conflict in the Baltic will also be explored as the Germans increased the pressure on the Russian territory and the Russian fleet while the latter despite its descent into revolution still struggled to provide an effective counter to the Imperial German Navy. The Royal Navy learned much from Jutland and applied those lessons to good effect. It greatly improved the way that ships were organized for battle as well as developing new tactics. There were also great leaps in communications and in command and control while both aviation and undersea operations including mine warfare developed at breakneck pace. The Imperial German Navy made its own changes as a result of Jutland. Indeed both Germany and Russia undertook much more naval innovation in the final years of the conflict than is often realized. By 1918 all the protagonists were fighting what was in every way a multi-dimensional maritime war that was the forerunner of naval conflict for the remainder of the twentieth century. The period also saw the entry to the conflict of the United States and the increasing commitment of the United States Navy. USN units saw hard service before the Armistice of November 1918. Many of the foundations of success in the next war were laid by the USN at this time. The learning curve was steep as officers and sailors alike sought to catch up on the experience of nearly three years of conflict but they brought new methods and new applications of technology to the operational problems with which their coalition partners had been struggling. This included the Sixth Battle Squadron which was rapidly assimilated into the Grand Fleet absorbing the hard won knowledge of their British colleagues but applying some of their own ideas.

Malta and British Strategic Policy, 1925-43 Douglas Austin, 2004-08-02 major reassessment of key aspect of British strategy and defence policy post 1900 challenges widely held beliefs on significance of Malta to British of great interest to US Naval Academy and Naval War College Air Force historians

Hero of the Upholder Jim Allaway, 2004-04 This volume is Allaway's international biography of Britain's greatest ever submarine captain

From the Dardanelles to

Oran Arthur J. Marder, 2015-06-10 This collection of thought provoking essays by arguably the 20th century's greatest naval historian was first published in 1974 but their continuing relevance fully justifies this reprint. It opens with a stimulating reappraisal of the naval attack on the Dardanelles the success of which would have made the disastrous Gallipoli land campaign that followed completely unnecessary. Marder identifies a number of relatively minor issues that made a failure of what was in reality a great strategic opportunity to shorten the war. Other chapters cover what the Royal Navy did and did not learn from the Great War and Churchill's controversial time at the Admiralty before he became Prime minister in 1940 while Marder's analysis of the inter war Ethiopian Crisis asking whether military aggression can be countered by sanctions has powerful echoes of current political concerns. The final essay looks at one of the most contentious episodes of the Second World War the British pre-emptive strike on the fleet of their one time allies at Oran after the French surrender in 1940. Because Marder's view of history emphasises the human dimension over abstract forces his work is always approachable in style and of as much interest to the layman as the professional historian. This book is no exception. *From the Dardanelles to Oran* Arthur Marder, 2015-06-10 This collection of thought provoking essays by arguably the 20th century's greatest naval historian was first published in 1974 but their continuing relevance fully justifies this reprint.
