Stein,2013-02-11 Karen F Stein University of Rhode Island Kingston

USA Rachel Carson is the twentieth century's most significant environmentalist. Her books about the sea blend science and poetry as they invite readers to share her celebration of the ocean's wonders. *Silent Spring*, her graphic and compelling exposé of the damage caused by the widespread aerial spraying of persistent organic pesticides such as DDT, opened our eyes to the interconnectedness of all living beings and the ecological systems we inhabit. Carson's work challenges our belief that science and technology can control the natural world; it asks us to recognize our place in the world around us and inspires us to treat the earth respectfully. She calls us to rekindle our sense of wonder at nature's power and beauty and to tread lightly on the earth so that it will continue to sustain us and our descendants. This book guides readers on a journey through Carson's life and work, considers Carson's legacies, and points to some of the continuing challenges to sustainability. It provides a listing of resources for reading, learning, or teaching about the environment, about nature writing, and about Carson and the crucial issues she addressed.

Science ladders, by N. D'Anvers N. D'Anvers, 1883 **Kringle - The Story of a Young Toymaker** D.P. McWane, 2016-11-25 A young carpenter starts a new life in a small New England town where he makes toys for an unscrupulous boss. He meets a single mother and helps her sons, the Airlords, build Buck Rogers spaceships, looking sleds to race. They expose the boss's sham, and on Dec 24th he delivers toys to every child so they can feel fortunate even if it's for just one day. Along the way he earns the love of the single mother and her sons.

Life Between the Tides Adam Nicolson, 2025-08-22 Adam Nicolson explores the marine life inhabiting seashore rockpools with a scientist's curiosity and a poet's wonder in this beautifully illustrated book. The sea is not made of water. Creatures are its genes. Look down as you crouch over the shallows and you will find a periwinkle or a prawn, a claw displaying crab or a cluster of anemones ready to meet you. No need for binoculars or special stalking skills; go to the rocks and the living will say hello. Inside each rock pool, tucked into one of the infinite crevices of the tidal coastline, lies a rippling, silent, unknowable universe. Below the stillness of the surface, course different currents of endless motion: the ebb and flow of the tide, the steady forward propulsion of the passage of time, and the tiny lifetimes of the rock pool's creatures, all of which coalesce into the grand narrative of evolution. In *Life Between the Tides*, Adam Nicolson investigates one of the most revelatory habitats on earth. Under his microscope, we see a prawn's head become a medieval helmet and a group of winkles transform into a Dickensian social scene with mollusks munching on Stilton and glancing at their pocket watches. Or rather, is a winkle more like Achilles, an ancient hero throwing himself toward death for the sake of glory? For Nicolson, who writes with scientific rigor and a poet's sense of wonder, the American Scholar, the world of the rock pools is infinite and as intricate as our own. As Nicolson journeys between the tides, both in the pools he builds along the coast of Scotland and through the timeline of scientific discovery, he is accompanied by great thinkers: no one can escape the pull of the sea. We meet Virginia Woolf and her *Waves*, a young T.S. Eliot peering into his own rock pool in Massachusetts, even Nicolson's father-in-law, a classical scholar who would hunt for amethysts along the shoreline, his mind on Heraclitus and the other philosophers of ancient Greece. And of course, scientists populate the pages.

not only their discoveries but also their doubts and errors their moments of quiet observation and their thrilling realizations Everything is within the rock pools where you can look beyond your own reflection and find the miraculous an inch beneath your nose The soul wants to be wet Heraclitus said in Ephesus twenty five hundred years ago This marvelous book demonstrates why it is so Includes Color and Black and White Photographs **Indigenous Peoples, Consent and Benefit Sharing** Rachel Wynberg, Doris Schroeder, Roger Chennells, 2009-09-30 Indigenous Peoples Consent and Benefit Sharing is the first in depth account of the Hoodia bioprospecting case and use of San traditional knowledge placing it in the global context of indigenous peoples rights consent and benefit sharing It is unique as the first interdisciplinary analysis of consent and benefit sharing in which philosophers apply their minds to questions of justice in the Convention on Biological Diversity CBD lawyers interrogate the use of intellectual property rights to protect traditional knowledge environmental scientists analyse implications for national policies anthropologists grapple with the commodification of knowledge and uniquely case experts from Asia Australia and North America bring their collective expertise and experiences to bear on the San Hoodia case A Citizen's Guide to Ecology Lawrence B. Slobodkin, 2003-05-15 The earth is continuously changing and evolving yet it is unclear how environmental changes will affect us in years to come What changes are inevitable What changes if any are beneficial And what can we do as citizens of this planet to protect it and our future generations Larry Slobodkin one of the leading pioneers of modern ecology offers compelling answers to these questions in A Citizen's Guide to Ecology He provides many insights into ecology and the processes that keep the world functioning This important guide introduces observations that underlie arguments about all aspects of the natural environment including both global and local issues To clarify difficult concepts Slobodkin uses lake ocean and terrestrial ecosystems to explain ecological energy flows and relationships on a global scale The book presents a clear and current understanding of the ecological world and how individual citizens can participate in practical decisions on ecological issues It tackles such issues as global warming ecology and health organic farming species extinction and adaptation and endangered species An excellent introduction and overview A Citizen's Guide to Ecology helps us to understand what steps we as humans can take to keep our planet habitable for generations to come This beautifully written book brings together careful observation personal reflection and theoretical understanding to explain the major environmental problems that confront us Dr Slobodkin's superb and sweeping work invites us to contemplate a great many facts and a few large values to motivate a clear and compelling response to losses of biodiversity the problem of invasive species global warming and other environmental concerns Mark Sagoff School of Public Affairs University of Maryland **A Coastal Companion** Catherine Schmitt, 2023-08-15 A chronicle of changes through the seasons both above and within the sea A COASTAL COMPANION follows the arrival and departure of migrating shorebirds in spring and fall schools of fish as they move in and out of our region and the natural cycles of our bays rivers marshes and coastal forests Part field guide part almanac the book also highlights writers artists and scientists who have chosen the Gulf of Maine as

their subject matter Poems by twelve contemporary poets open each chapter and illustrations by two Maine artists Kimberleigh Martul March and Margaret Campbell are featured throughout the text This is a book to keep close at hand to be read not all at once but through the seasons one day at a time and enjoyed year after year **The New Beachcomber's Guide to the Pacific Northwest** J.
