Permian Fusulinids of California Marcus Luther Thompson, Harry Eugene Wheeler, John Charles Hazzard, 1946 Early
Permian Fusulinids from the Owens Valley Group, East-central California Robert T. Magginetti, Calvin H. Stevens, 1988-01-01 Pennsylvanian-Permian Fusulinaceans of the Big Hatchet Mountains, New Mexico Garner L. Wilde, 2006-01-01 The Pennsylvanian-early Permian Bird Spring Carbonate Shelf, Southeastern California Calvin H. Stevens, Paul Stone, 2007-01-01 The Bird Spring Shelf in southeastern California along with coeval turbidite basins to the west records a complex history of Pennsylvanian and Early Permian sedimentation sea level changes and deformation along this part of the western North American continental margin. In this work we describe and figure the fusulinids including several new species and establish detailed correlations between deposits of the shelf and the flanking basins. We then use these correlations to reconstruct the depositional history paleogeography and deformational history of the region. This work adds significant detail to existing interpretations of the late Paleozoic as a time of major tectonic instability on the continental margin of southeastern California as it changed from a relatively passive margin which had persisted through most of the Paleozoic to an active convergent margin that would characterize the Mesozoic. Bibliographic Index of Permian Invertebrates Carl Colton Branson, 1948 *Paleozoic Perspectives: a Paleontological Tribute to G. Arthur Cooper* J. Thomas Dutro, 1971 This collection of papers was solicited from colleagues and students of G Arthur Cooper as a Festschrift in recognition of his profound influence on the study of brachiopods and their biostratigraphic application to geologic problems especially in the Paleozoic Era. Dr Cooper initiated a period of growth in both the research staff and the National Collections of Fossils that guided the Smithsonian Institution to its present position of leadership in paleontological research. His own superb studies of fossil and living brachiopods are unsurpassed in breadth and paleontological significance. Mainly through his efforts the Smithsonian has acquired an outstanding reference collection of invertebrate fossils that is the envy of the scientific community. *Special Papers*, 1934 *Memoir*, 1960 **The Guadalupian Symposium** Bruce R.
