**Persian Gardens and Pavilions** Mohammad Gharipour, 2013-04-02 From Timur's tent in Samarqand to Shah Abbas's palace in Isfahan and Humayun's tomb in Delhi the pavilion has been an integral part of Persianate gardens since its earliest appearance at the Achaemenid garden in Pasargadae in the sixth century BC Here Mohammad Gharipour places both the garden and the pavilion within their historical literary and artistic contexts emphasizing the importance of the pavilion which has hitherto been overlooked in the study of Iranian historical architecture Starting with an examination of the depictions and representations of gardens in religious texts Gharipour analyses the how the idea of the garden developed from the model of pre Islamic gardens in Achaemenid and Sassanian Persia to its mentions in the Zoroastrian text of Aban Yasht and on to its central role as paradise in the Qur'an Continuing on with an exploration of gardens and pavilions in Persian poetry Gharipour offers in depth analysis of their literal and metaphorical values It is in the poetry of major Persian poets such as Ferdowsi Naser Khosrow Sa'di Rumi and Hafez that Gharipour finds that whilst gardens are praised for their spiritual values they also contain significant symbolic worth in terms of temporal wealth and power Persian Gardens and Pavilions then goes on to examine the garden and the pavilion as reflected in Persian miniature painting sculpture and carpets as well as accounts of travelers to Persia With masters such as Bihzad representing daily life as well as the more mystical prose and poetry in for example Sa'di's *Bustan* The Orchard and *Golestan* The Rose Garden the garden and the pavilion can be seen to have crucial semiotic significances and cultural meanings But in addition to this they also point to historical patterns of patronage and ownership which were of central importance in the diplomatic and social life of the royal courts of Persia Gharipour thereby highlights the metaphorical spiritual symbolic and religious aspects of gardens as well as their more materialistic and economic functions This book reaches back through Persia's rich history to explore the material and psychological relationships between human beings pavilions and gardens and will be a valuable resource for Art History Architecture and Iranian Studies

The Art and Architecture of Islam 1250-1800 Sheila S. Blair, Jonathan M. Bloom, 1996-09-25 They discuss for example how the universal caliphs of the first six centuries gave way to regional rulers and how in this new world order Iranian forms techniques and motifs played a dominant role in the artistic life of most of the Muslim world the one exception was the Maghrib an area protected from the full brunt of the Mongol invasions where traditional models continued to inspire artists and patrons By the sixteenth century say the authors the eastern Mediterranean under the Ottomans and the area of northern India under the Mughals had become more powerful and the Iranian models of early Ottoman and Mughal art gradually gave way to distinct regional and imperial styles
