## **Person To Person Rhetoric Reality And Change:**

Person to Person Irving Deer,1973      The Modern Satiric Grotesque and Its Traditions John R. Clark,2014-07-15

Thomas Mann predicted that no manner or mode in literature would be so typical or so pervasive in the twentieth century as the grotesque. Assuredly he was correct. The subjects and methods of our comic literature and much of our other literature are regularly disturbing and often repulsive no laughing matter. In this ambitious study John R. Clark seeks to elucidate the major tactics and topics deployed in modern literary dark humor. In Part I he explores the satiric strategies of authors of the grotesque strategies that undercut conventional usage and form the de basement of heroes the denigration of language and style the disruption of normative narrative technique and even the debunking of authors themselves. Part II surveys major recurrent themes of grotesquerie tedium scatology cannibalism dystopia and Armageddon or the end of the world. Clearly the literature of the grotesque is obtrusive and ugly its effect morbid and disquieting and deliberately meant to be so. Grotesque literature may be unpleasant but it is patently insightful. Indeed as Clark shows all of the strategies and topics employed by this literature stem from age old and spirited traditions. Critics have complained about this grim satiric literature asserting that it is dank cheerless unsavory and negative. But such an interpretation is far too simplistic. On the contrary as Clark demonstrates such grotesque writing in its power and its prevalence in the past and present is in fact conventional controlled imaginative and vigorous no mean achievements for any body of art.

Psychology of Change Katherine J. Reynolds, Nyla R. Branscombe, 2014-11-20. Choice Recommended Read. This volume tackles the critical question of whether people change or whether they remain relatively constant across the lifespan. Much existing literature in psychology has largely endorsed the concept of stability. Indeed in many people's minds the person is understood to be set in stone as a function of early socialization and reaching a particular stage of development evolutionary processes or traits that are hard wired from the beginning by genes and biology. However in recent years important scientific developments in theory and research concerning the psychology of change have emerged. In contrast to the commonly held conception of the individual as fixed this research illustrates how malleable people are showing much behavioral plasticity. The chapters in this volume written by scholars at the cutting edge of research into the psychology of change showcase these developments with the aim of advancing knowledge of the field and encouraging further research. Topics addressed include brain function cognitive performance personality psychological well being collective action to achieve social change responses to life stressors and political change. The message is clear the culture we live in what happens to us along the way and who we think we are and want to be can all change people.
