Routes and Radishes Mark L. Russell, Allen L. Yeh, Michelle Sanchez, Chelle Stearns, Dwight J. Friesen, 2010-11-02 Self identifying as evangelical is risky business these days What is Evangelicalism Is it a historical artifact A political philosophy A set of doctrines A litmus test for genuine faith Perhaps more important what will come to mind when future generations hear something described as evangelical The authors of Routes and Radishes approach this issue from various points of influence within evangelical organizations denominations and institutions They believe that the historical distinctiveness of Evangelicalism is too powerful and too positive to be abandoned Yet they all desire that the Evangelicalism of the future break away from common pitfalls in the task of loving people toward a vital relationship with God through Jesus Christ Each author brings a different but vital perspective to the conversation this book represents They chart a path that while not monolithic takes seriously the past and potential of the evangelical movement Furthermore they invite you to digest participate question and make the future of Evangelicalism a meaningful part of your walk of faith Morality in Everyday Life Melanie Killen, Daniel

Abeyasekera, 2021-03-12 Making the Right Choice unravels the entangled relationship between marriage morality and the desire for modernity as it plays out in the context of middle class status concerns and aspirations for upward social mobility within the Sinhala Buddhist community in urban Sri Lanka By focusing on individual life histories spanning three generations the book illuminates how narratives about a gendered self and narratives about modernity are mutually constituted and intrinsically tied to notions of agency The book uncovers how

becoming modern in urban Sri Lanka rather than causing inter generational conflict is a collective aspiration realized through the efforts of bringing up educated and independent women capable of making right choices The consequence of this collective investment is a feminist conundrum agency does not denote the right to choose but the duty to make the right choice hence agency is experienced not as a sense of freedom but rather as a burden of responsibility *Personal Relationships and Personal Networks* Malcolm R. Parks, 2017-09-25

The effort to understand personal relationships has traditionally focused on the individual characteristics of participants *Personal Relationships and Personal Networks* takes this analysis a step further focusing on research linking participants feelings and actions within a given personal relationship to the larger social context surrounding it Author Malcolm R Parks expands on the idea that the initiation development maintenance and dissolution of relationships are inextricably connected to each participant's social network a perspective that allows for a better appreciation of our connection to the world and a greater understanding of our significant power as social actors This book offers a new way to consider basic notions about how relationships form such as how particular people meet and how relationships are started Among many findings the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other's personal networks and when they believe that network members support their relationship Additional topics discussed include how this social context model is applicable to different types of relationships how participants interact with network members how social networks are involved in the deterioration of personal relationships and what drives change in relationships Students researchers and professionals in a wide variety of disciplines such as communication psychology sociology anthropology family studies clinical psychology public health nursing education and social work will find this book useful as will anyone seeking to better understand their own personal relationships *A Plant-Based Life* Micaela

Winfrey, 2018-11-09 Uncovering the psychological and sociological reasons for the gender gap in American politics this fascinating volume explores how such factors influence women and lead to their political beliefs and behaviors Based on original research with women voters of varying ages around the United States from 2008 to the present the book delves into differences between voting women and men and indeed among women themselves The gender gap the author argues exists because women s social identity is tied to their group memberships and gender role beliefs Thus rather than grouping all women into one voting bloc the book examines how gender identity influences various sub groups of women It begins with a discussion of the gender gap in voting preferences throughout history then goes on to explore the roles of feminism and women s connectedness to their gender group as a primary cause of the gender gap in voting The remaining chapters discuss how these factors influence women s political engagement policy positions and candidate preferences **The Oxford Handbook of Human Motivation** Richard M.
