## **Personal Coping Theory Research And Application:**

Personal Coping Bruce N. Carpenter,1992-10-13 This volume presents current models of coping describes the coping process and relates that process to environmental factors person variables and desirable outcomes Unlike most treatments of coping which are organized around stress this volume emphasizes features of the coping process that have broad relevance across many potential stressors Although each model in the book tends to emphasize different aspects of coping the organization around models gives each chapter a theoretical focus which will be attractive to researchers and to those applying current research to applied problems such as interventions The most obvious audience is made up of researchers and scholars in the broad area of stress and coping With the emerging emphasis within applied programs on more common psychological and health problems coping theory is well suited to train students in the principles and issues relevant to everyday problems and functioning This volume is well suited to assist in such training *Organizational Stress* Cary L. Cooper,Philip Dewe,Michael P. O'Driscoll,2001-02-06 The book is comprehensive thought provoking resource for Ph D students academics and professionals working to minimize or eliminate the sources of stress in the workplace Jacket

**Handbook of Research on Contemporary Theoretical Models in Information Systems** Dwivedi, Yogesh K.,Lal, Banita,Williams, Michael D.,Schneberger, Scott L.,Wade, Michael,2009-05-31 This book provides a comprehensive understanding and coverage of the various theories models and related research approaches used within IS research Provided by publisher Action Theory and Communication Research Karsten Renckstorf,2004 The action theoretical approach has already proved its value as a framework for communication research most especially in the study of media audiences and media use The approach privileges the perspective of the acting individual but offers guidelines for connecting the subjective orientation with networks of social interaction and for treating behaviour as a social process Research within this framework takes account of the wider social context and calls for a careful combination of empirical observation and interpretation with a corresponding diversity of methodologies The contributions to the volume shed light on the significance of media use in everyday experience and contribute to an understanding of communication in society *Technology and Methods in Behavioral Medicine* David S. **Chronic Diseases** Marvin Stein,Andrew S. Baum,,Andrew S. Baum,2013-05-13 Although considerable progress has been made in the understanding and treatment of a range of medical disorders it had recently been pointed out that 85 percent of the population will be stricken by chronic disorders which may be accompanied by many years of suffering This volume deals with issues of both cure and risk in chronic illnesses which are among the group of disorders associated with the leading causes of death in the United States at this time Alzheimer s disease AIDS and cancer A consideration of the role of brain and behavior in relation to the cure and prevention of these disorders is the central focus of the various chapters in this book Several chapters discuss the neuropsychological aspects of chronic illnesses including the underlying pathophysiology of changes in the brain which may be associated with both behavioral and physical signs and symptoms in these disorders

Considerable evidence suggests that a range of psychosocial or behavioral factors such as stressful life events and depression are associated with increased morbidity or mortality. Complex neurobiological pathways involving the brain neurotransmitter and neuroendocrine systems have been implicated. Other chapters consider some of the links among brain behavior and chronic illnesses as well as psychological factors such as coping and depression in relation to chronic disorders. The three leading risk factors known to be associated with both chronic illnesses and death: diet, tobacco, and alcohol are all related to behavioral choices. Sexual behavior can be added to the list in terms of HIV infection and acquired immunodeficiency disease (AIDS). Several chapters deal specifically with a consideration of sexual behavior and HIV infection which clearly highlight the need for scientific knowledge in human sexuality if effective long term preventive measures are to be developed while waiting for a vaccine or cure. The search for cures must continue to have the highest priority in the scientific and clinical struggle against disease. Nonetheless the value of psychosocial interventions on the quality of life and mental states of seriously ill persons should not be underestimated.
