Personal Daily Log W Interactive Web Sitespb2001:

Mental Capital and Wellbeing Cary L. Cooper, Usha Goswami, Barbara J. Sahakian, 2009-08-18 This major new reference presents The Foresight Mental Capital and Wellbeing Project a UK Government project in the Government Office for Science. It offers a comprehensive exploration of how mental capital and wellbeing operate over the lifespan, how experiences in the family, in school, at work, and following retirement augment or reduce mental capital and wellbeing, and the impact that this has for the individual and for the welfare and economic progress of the nation. Mental Capital and Wellbeing comprises a series of scientific reviews written by leading international scientists and social scientists in the field. The reviews undertake systematic analyses of the evidence base surrounding five key themes on which they propose future policies will have to be based. An internationally renowned team of Editors introduce each theme and draw together conclusions in terms of both policy and practice.

Section 1: Mental Capital and Wellbeing Through Life Mental capital refers to the totality of an individual's cognitive and emotional resources, including their cognitive capability, flexibility, and efficiency of learning, emotional intelligence, and resilience in the face of stress. The extent of an individual's resources reflects his or her basic endowment (e.g., genes) and early biological programming, motivation, and experiences (e.g., education) which take place throughout the life course. This section presents the very latest on the science of mental capital throughout life.

Section 2: Learning Through Life provides a coherent overview of a fast-moving and complex field of policy and practice. Educational attainment has a considerable impact on physical and mental wellbeing, both directly and indirectly, by enabling people better to achieve their goals. The ability to continue learning throughout the lifespan is critical to a successful and rewarding life in contemporary societies.

Section 3: Mental Health and Ill Health draws together the most recent evidence about positive mental health, as well as a range of mental disorders, to consider their importance to the population and economy in terms of prevalence and disability, and the wider burden on society.

Section 4: Wellbeing and Work It is estimated that 13 million working days are lost through stress each year, costing the economy over 3.7 billion per annum. This theme explores those drivers that influence the nature and structure of work, and the impact this has on employee wellbeing.

Section 5: Learning Difficulties This theme provides a cutting-edge picture of how recent insights from genetics, cognitive, and neuroscience improve our understanding of learning difficulties such as dyslexia, dyscalculia, and attention deficit hyperactivity disorder. Reviews focus on how current research can contribute to early diagnosis and improved intervention.

Basic and Clinical Toxicology of Organophosphorus Compounds Mahdi Balali-Mood, Mohammad Abdollahi, 2013-12-19 This book explains the chemistry of organophosphorus compounds (OPs), their mechanism of toxicity, and the history of OPs from their initial discovery to the development of new compounds such as Novichoks. It details the harmful effects to human health, both as a result of acute and chronic OP exposure, and the necessary clinical management of affected patients to reduce their toxic side effects. The book also explains the detrimental effect that OPs have had on the environment and the efforts being made to prevent this in the future. Finally,

the book looks at the incidents where OPs have been used as chemical warfare agents Basic and Clinical Toxicology of Organophosphorus Compounds aims to act as a comprehensive guide to all aspects of OPs and is a key resource for clinical toxicologists and related health professionals involved in the prevention diagnosis and clinical management of OP patients toxicologists and other scientists involved in research on OPs including regulatory issues and postgraduate students in Toxicology and related fields
