**Family Functioning** John J. Schwab, Helen Gray-Ice, Florence R. Prentice, 2006-04-18 The family that most fundamental of human groups is currently perceived to be changing in response to social biological cultural and technological developments in our postmodern society While the observed changes in families have been considered by some sociologists to be evidence of adaptation and therefore normal the authors of this volume consider them maladaptive Viewing society from the point of view of clinical psychiatry they point to greatly increased numbers of children born to single mothers soaring rates of divorce a statistically confirmed increase in mental disorders increase in reported incest high rates of depression in younger people and escalation of the amount of reported family violence as evidence that the family as a social institution is in crisis and can either move toward renewed vitality or continued deterioration Perceiving a need to obtain information about family functioning that might lead to the increased stability and well being of this critically important type of system Dr John Schwab and his associates designed and carried out a research program that began with a thorough review of relevant literature beginning with LePlay's study of 300 families in the 1850s and including important recent statistical studies They found that although these studies represent advances in understanding the family system some serious problems with the research remain one of which is confounding variables such as family function and mental or substance abuse disorders so that if a family member has a problem such as drug abuse the family is

classified as dysfunctional

The Contemporary American Family Teresa Chandler Sabourin, 2003-04-07 I find the book extremely attractive The dialectical perspective provides a consistent avenue from which to address the diversity structural cultural developmental and functional in Contemporary American Families Whereas this perspective does not claim to solve the tensions in families it offers marvelous insights into the nature and changing diversities in families I believe this text is particularly well suited for reasonable discussion of serious issues and provides valuable insights into the nature of families and their functioning Vince Bloom California State University Fresno Teresa Chandler Sabourin invites students to appreciate the mystery complexity and diversity of the contemporary American family Resisting simplistic descriptions and normative descriptions Sabourin challenges us to open our minds and hearts to the rich humane variety of family connections as we search for ways to accommodate the competing demands and conflicting pressures experienced in our most cherished relationships Starting from the source of her own experience Sabourin addresses both the darker abusive side of family relationships as well as the lighter spiritual side of intimacy and love The Contemporary American Family successfully addresses the need for an accessible and teachable treatment of the dialectical perspective on close relationships This is a book that will encourage students of family communication to respect diversity question taken for granted assumptions and share the pain and joy and of their own family experiences Art Bochner University of South Florida Increasingly diverse in structure and culture contemporary families defy explanation by many traditional linear methods In order to understand the enormous impact that diversity has on the behaviors and relationships within the family scholars and students need a means to embrace rather than solve relational contradictions The Contemporary American Family A Dialectical Perspective on Communication and Relationships recognizes that families are both close and distant stable and changing amenable and uncontrollable Teresa Chandler Sabourin employs a dialectical approach acknowledging that a family's contradictions and relational tensions may be the determining factor in its interaction Writing in a direct and simple style Sabourin uses this innovative theoretical position to address four types of family diversity structural cultural developmental and functional Sure to stimulate discussion and further research this provocative volume examines The dialectic process in the context of family communication and relationships The redefined more inclusive American family Contemporary family structures Cultural diversity in the family Issues such as alcoholism domestic violence and divorce Spirituality within the family Designed as a
