China's Development Michel Aglietta, Guo Bai, 2012-11-12 China is entering a phase where deep structural changes will arise throughout society. These multi-fold processes will be intertwined in a globalized world impacted by the transformation of capitalism in the aftermath of the financial crisis and under the threat of severe environmental damage. Focussing on sustainability this book explores the future of China in light of the successful reforms undertaken in the last thirty years. It combines Chinese economic history and up to date macroeconomic theory in order to show how economic transformations and institutional changes are intertwined in developing capitalism under state sovereignty. The book is divided into three parts. Part 1 analyses the structural changes ahead drawing on the knowledge of the causes of the demise of imperial China and of the social disruptions due to political warfare in the 20th century. Part 2 examines the reasons why the last thirty years of reform were successful and why the present growth regime will undergo a dramatic mutation in future decades. Part 3 seeks to address the question what type of political economy can support the purpose of achieving harmonious society. China's Development will be of interest to students and scholars of Chinese economics, politics, history and development.

China's objectives with the Belt and Road Initiative Sandra Schorrer, 2020-12-17 Essay from the year 2020 in the subject Politics Topic Globalization Political Economics grade 1.0 Dresden Technical University language English abstract What are the objectives behind China's promotion and development of the Belt and Road Initiative? Answering this question is the main purpose of this essay which is based on an international political economy (IPE) approach to bridge geo-economic and geopolitical perspectives. The ancient Silk Road served as vast trade network between China, other Asian countries, Europe and the Middle East for more than 2,000 years. By launching the Belt and Road Initiative (BRI) comprising the Silk Road Economic Belt, the 21st Century Maritime Silk Road and a Digital Silk Road, China has revived this concept in 2013. While some scholars and politicians welcome the BRI as China's contribution to international public goods and international development, others reject it, claiming that its objectives are not transparent or that it is a tool for China to leverage its massive economic resources for geostrategic interests and to facilitate business for its state-owned enterprises. Thus is the BRI's main objective to undermine the US-led world order? Is it driven by altruism aimed on facilitating economic growth in less developed countries? Is it the Chinese way to deal with domestic economy challenges? Or is it just an empty slogan?

The Political Economy Of China's Financial Reforms Paul Bowles, Gordon White, 2019-07-11 THIS PATHBREAKING Work analyzes the evolution of China's financial reforms since 1979. China's reformers have stressed the construction of a more diverse, flexible and competitive financial system as a crucial element of China's economic reform program. The authors assess the theory and practice of financial reform in light of China's specific characteristics as a large developing country that still claims to be pursuing the goal of establishing a new form of

socialist market economy The authors utilize two approaches First they place the overall design and trajectory of financial reform since 1979 within a broad comparative framework of alternative strategies of financial reform and financial systems Second they use a political economy perspective to explore the complex interactions among the political and economic actors individual group or institutional that affect reform outcomes Integrating these two approaches the authors conclude by assessing future directions for feasible and desirable financial reform in China
