Precision And Soul Essays And Addresses:

Precision and Soul Robert Musil, 1990 We do not have too much intellect and too little soul but too little precision in matters of the soul Robert Musil Best known as author of the novel *The Man without Qualities* Robert Musil wrote these essays in Vienna and Berlin between 1911 and 1937 Offering a perspective on modern society and intellectual life they are concerned with the crisis of modern culture as it manifests itself in science and mathematics capitalism and nationalism the changing roles of women and writers and more Writing to find his way in a world where moral systems everywhere were seemingly in decay Musil strives to reconcile the ongoing conflict between functional relativism and the passionate search for ethical values Robert Musil was born in 1880 and died in 1942 His first novel *Young Tress* is available in English A new two volume translation by Burton Pike and Sophie Wilkins of *The Man without Qualities* is forthcoming from Alfred A Knopf Now we have these thirty one invaluable and entertaining pieces from an article on *The Obscene and Pathological in Art* to the equally provocative talk *On Stupidity* which with a new translation of *The Man without Qualities* forthcoming amount to a literary event for the reader of English comparable to Constance Garnett's massive translation of Chekhov's stories Joseph Coates Chicago Tribune Musil is one of the few great moderns one of the handful who ventured to confront the issues that shape and define our time He has a range and a striking capacity every bit as great as that of Mann Joyce or Beckett Boston Review These essays are crucial in understanding a writer and critic whose lifelong task was an attempt to resolve the dichotomy between the precision of scientific form and the soul the matter of life and art Choice

The Case of Literature Arne Höcker, 2020-06-15 In *The Case of Literature* Arne Höcker offers a radical reassessment of the modern European literary canon His reinterpretations of Goethe Schiller Büchner Dostoevsky Musil and Kafka show how literary and scientific narratives have determined each other over the past three centuries and he argues that modern literature not only contributed to the development of the human sciences but also established itself as the privileged medium for a modern style of case based reasoning *The Case of Literature* deftly traces the role of narrative fiction in relation to the scientific knowledge of the individual from eighteenth century psychology and pedagogy to nineteenth century sexology and criminology to twentieth century psychoanalysis Höcker demonstrates how modern authors consciously engaged casuistic forms of writing to arrive at new understandings of literary discourse that correspond to major historical transformations in the function of fiction He argues for the centrality of literature to changes in the conceptions of psychological knowledge production around 1800 legal responsibility and institutionalized forms of decision making throughout the nineteenth century and literature's own realist demands in the early twentieth century

The Novel-Essay, 1884-1947 S. Ercolino, 2014-04-08 The novel essay emerged in France in the last quarter of the nineteenth century and reached its highest formal complexity in Austria and Germany during the interwar period Here Ercolino argues that it is crucial for a renovated understating of the history of the novel in modernity

Robert Musil and the NonModern Mark M. Freed, 2011-04-28 Musil's novel *The Man Without Qualities* is

widely recognized as a monument of modernist literature alongside *Remembrance of Things Past* and *Ulysses*. But while Musil is a major scholarly industry in the German speaking world, critical attention from English speaking scholars remains disproportionately small. Moreover, there has been little engagement with Musil's contribution to cultural theory from those working outside literary studies. Freed brings Musil into dialogue with such critics of the modern as Nietzsche, Heidegger, Derrida and Lyotard and argues that Musil's theory and literary performance of essayism constitutes a strategy of nonmodernity that is an engagement with the problems of modernity that does not reinscribe the distinctions on which modernism grounded itself. This book not only offers an understanding of Musil's essayism made possible by Latour's account of modernity, it also articulates what the discursive and cultural project of nonmodernity might look like. The book thereby introduces Musil scholars and those working in the problematics of postmodernism to one another's interests. *German Cosmopolitan Social Thought and the Idea of the West* Austin Harrington, 2016-05-19

There has been considerable interest in recent years in German social thinkers of the Weimar era. Generally this has focused on reactionary and nationalist figures such as Schmitt and Heidegger. In this book Austin Harrington offers a broader account of the German intellectual legacy of the period. He explores the ideas of a circle of left liberal cosmopolitan thinkers: Troeltsch, Scheler, Tönnies, Max Weber, Alfred Weber, Mannheim, Jaspers, Curtius and Simmel, who responded to Germany's crisis by rejecting the popular appeal of nationalism. Instead, they promoted pan-European reconciliation based on notions of a shared European heritage between East and West. Harrington examines their concepts of nationhood, religion and civilization in the context of their time and in their bearing on subsequent debates about European identity and the place of the modern West in global social change. The result is a groundbreaking contribution to current questions in social, cultural and historical theory. **Force, Movement, Intensity** Ghassan Hage, Emma Kowal, 2011-01-06

Of all the scientific works that have influenced the social sciences and humanities, none has matched the profound effect of the work of Isaac Newton. In his 1687 masterpiece *Principia Mathematica*, he laid the foundation of classical mechanics in his discoveries of the laws of motion and the law of universal gravitation. He reoriented human understanding of the cosmos, thus boosting the confidence of human beings to access elements of what they saw as the divine logic behind the order of things and to have a sense of control over it. From the nineteenth century to the present day, Newton's science has inspired scholars of society in their attempts to discern the patterns of social life. For others, such a positivist project serves as a cautionary tale to be resisted by contemporary social sciences. This book considers the original and continuing legacy of Newtonian theories and imaginaries in the vast array of human attempts to understand the world. Drawing from a range of disciplines including anthropology, sociology, the history of science, literary studies, cultural studies, social theory and economics, the essays in this volume engage with Newton as a thinker and examine his legacy. Some contributions illustrate the power of physical metaphors in understanding the social world; many others point to the limits of this endeavour. Still others show how, since the eighteenth century, Newtonian

thought has influenced thinkers as diverse as Blake Marx Freud and Pierre Bourdieu This innovative collection prompts a reconsideration of the importance of Newton for the social sciences and humanities **Wittgenstein and Modernism** Michael LeMahieu, Karen Zumhagen-Yekplé, 2017 Wittgenstein and Modernism is the first collection to address the rich vexed and often contradictory relationship between modernism the 20th century's predominant cultural and artistic movement and Wittgenstein the most preeminent and enduring philosopher of the period Although Wittgenstein famously declared that philosophy ought really to be written only as a form of poetry we have yet to fully consider how Wittgenstein's philosophy relates to the poetic literary and artistic production that exemplifies the modernist era in which he lived and worked Featuring contributions from scholars of philosophy and literature the contributors put Wittgenstein's writing in dialogue with work by poets and novelists James Woolf Kafka Musil Rilke Hofmannsthal Beckett Bellow and Robinson as well as philosophers and theorists Karl Kraus John Stuart Mill Walter Benjamin Michael Fried Stanley Cavell The volume illuminates two important aspects of Wittgenstein's work related to modernism and postmodernism form and medium Each of Wittgenstein's two major works not only advanced a revolutionary conception of philosophy but also developed a revolutionary philosophical form to engage his readers in a mode of philosophical practice As a whole this volume comprises an overarching argument about the importance of Wittgenstein for understanding modernism and the importance of modernism for understanding Wittgenstein **Revolutionary Pedagogies** Peter Trifonas, 2002-06-01 First published in 2000 Routledge is an imprint of Taylor Francis an informal company **Reluctant Skeptic** Harry T. Craver, 2017-02-01 The journalist and critic Siegfried Kracauer is best remembered today for his investigations of film and other popular media and for his seminal influence on Frankfurt School thinkers like Theodor Adorno Less well known is his earlier work which offered a seismographic reading of cultural fault lines in Weimar era Germany with an eye to the confrontation between religious revival and secular modernity In this discerning study historian Harry T Craver reconstructs and richly contextualizes Kracauer's early output showing how he embodied the contradictions of modernity and identified the quasi theological impulses underlying the cultural ferment of the 1920s *Figures of Possibility* Niklaus Largier, 2022-03-15 From medieval contemplation to the early modern cosmopoetic imagination to the invention of aesthetic experience to nineteenth century decadent literature and to early twentieth century essayistic forms of writing and film Niklaus Largier shows that mystical practices have been reinvented across the centuries generating a notion of possibility with unexpected critical potential Arguing for a new understanding of mystical experience Largier foregrounds the ways in which devotion builds on experimental practices of figuration in order to shape perception emotions and thoughts anew Largier illuminates how devotional practices are invested in the creation of possibilities and this investment has been a key element in a wide range of experimental engagements in literature and art from the seventeenth to the twentieth century and most recently in forms of new materialism Read as a history of the senses and emotions the book argues that mystical and devotional practices have

long been invested in the modulating and reconfiguring of sensation affects and thoughts Read as a book about practices of figuration it questions ordinary protocols of interpretation in the humanities and the priority given to a hermeneutic understanding of texts and cultural artifacts
