*Diagnosis: Philosophical and Medical Perspectives* N. Laor,J. Agassi,2012-12-06 1 GENERAL The term diagnostics refers to the general theory of diagnosis not to the study of specific diagnoses but to their general framework It borrows from different sciences and from different philosophies Traditionally the general framework of diagnostics was not distinguished from the framework of medicine It was not taught in special courses in any systematic way it was not accorded special attention students absorbed it intuitively There is almost no comprehensive study of diagnostics The instruction in diagnosis provided in medical schools is exclusively specific Clinical instruction includes in addition to vital background information such as anatomy and physiology specific instruction in nosology the theory and classification of diseases and this includes information on diagnoses and prognoses of diverse diseases What is the cause of the neglect of diagnostics and of its integrated teaching The main cause may be the prevalence of the view of diagnostics as part and parcel of nosology In this book nosology is taken as a given autonomous field of study which invites almost no comments we shall freely borrow from it a few important general theses and a few examples We attempt to integrate here three studies 11 of the way nosology is used in the diagnostic process of the diagnostic process as a branch of applied ethics of the diagnostic process as a branch of social science and social technology
