English as a Lingua Franca Anna Mauranen, Elina Ranta, 2009-10-02 *English as a lingua franca* has become a hot topic in Applied Linguistics and English Studies While it has been a subject of controversy for some time linguistic observations on actual use have largely been missing out of the debate This is now changing fast and the study of *English as a lingua franca* has become a vibrant research field This book reflects achievements in the growing field it presents a good selection of empirical findings thus providing substance to arguments It comprises contributions from pioneers and established scholars in the field along with reports from substantial ongoing research projects The papers offer insights into the workings of *English as a lingua franca* in different contexts conversational academic professional and business situations They tackle essential theoretical issues analyse linguistic and interactional features of ELF and discuss attitudes towards ELF The studies are firmly anchored in analyses of authentic language in social interaction some also using survey and interview data Many papers also touch upon debates on language policy and linguistic ideologies This collection of papers from the key areas of current ELF research will be of interest to English linguists and applied linguists graduate and undergraduate students of English educational and language planners and teachers of English

The Linguistic Individual Barbara Johnstone, 1996-06-27 Linguists usually discuss language or dialects in terms of groups of speakers Believing that patterns can be seen more clearly in the group than the individual researchers often present group scores with no indication of the variation within the group Even though linguists acknowledge that no two individuals speak alike few study individual variation and voice Barbara Johnstone makes a case for the individual's importance and idiosyncrasies in language and linguistics Using theoretical arguments and discourse analysis along with linguistic examples from a variety of speakers and settings Johnstone illustrates how speakers draw on

linguistic models associated with class ethnicity gender and region among others to construct an individual voice In doing so Johnstone shows that certain important questions in sociolinguistics and pragmatics can only be answered with reference to individual speakers Johnstone s study is important both for the understanding of speech as expressive of self and for the study of variation and mechanisms of linguistic choice and change Dialogue Analysis: Units, relations and strategies beyond the sentence Edda Weigand,Eckhard Hauenherm,2011-07-13 The topic of this volume was discussed at a Round Table of the International Association for Dialogue Analysis IADA at the University of Bologna in March 1995 The Round Table was intended to make a scientific contribution in honour of the president s 65th birthday The topic refers on the one hand to the central problem of Dialogue Analysis which is to discover a new communicatively functioning unit after having left behind the unit of the sentence which can be considered the unit par excellence of structural linguistics On the other hand it includes the manifold units relations and strategies i e the specific problems of dialogue analysis **Narrative Performances** Alexandra Georgakopoulou,1997-01-01 Conversational narratives provide valuable resources for the discursive construction and invoking of personal and sociocultural identities As such their sociolinguistic and cultural analysis constitute a high priority in the agenda of discourse studies This book contributes to the growing line of discourse analytic research on the dynamic relations between narrative forms and functions and their immediate and wider communicative contexts The volume draws on a large corpus of spontaneous conversational stories recorded in Greece where everyday storytelling is a central mode of communication in the community s interactional contexts and thus a rich site for a meaningful enactment of social stances roles and relations The study brings to the fore the stories text constitutive mechanisms and explores the ways in which they situate the narrated experiences globally by invoking sociocultural knowledge and expectations and locally by making them sequentially and interactionally relevant to the specific conversational contexts The stories micro and macro level analysis richly illustrated with narrative transcripts throughout leads to the uncovering of a global mode of narrative performance which is based on a closed set of recurrent devices It is argued that the choice or avoidance of this mode is at the heart of the stories re constitution of a self an other and a sociocultural world The numerous cases of intergenerational narrative communication adults children shed additional light on the performance s contextualization aspects and contribute to the cross cultural understanding of the dynamics of oral performances Besides students and researchers of discourse analysis sociolinguistics anthropological linguistics narrative analysis and Greek studies this book will also appeal to all those interested in communication and cultural studies
