Eastwood,1993 This book contains refereed papers presented at the AMS IMS SIAM Summer Research Conference on the Penrose Transform and Analytic Cohomology in Representation Theory held in the summer of 1992 at Mount Holyoke College The conference brought together some of the top experts in representation theory and differential geometry One of the issues explored at the conference was the fact that various integral transforms from representation theory complex integral geometry and mathematical physics appear to be instances of the same general construction which is sometimes called the Penrose transform There is considerable scope for further research in this area and this book would serve as an excellent introduction   **Harmonic Analysis on Reductive Groups** W. Barker,P. Sally,2012-12-06 A conference on Harmonic Analysis on Reductive Groups was held at Bowdoin College in Brunswick Maine from July 31 to August 11 1989 The stated goal of the conference was to explore recent advances in harmonic analysis on both real and p adic groups It was the first conference since the AMS Summer Sym posium on Harmonic Analysis on Homogeneous Spaces held at Williamstown Massachusetts in 1972 to cover local harmonic analysis on reductive groups in such detail and to such an extent While the Williamstown conference was longer three weeks and somewhat broader nilpotent groups solvable groups as well as semisimple and reductive groups the structure and timeliness of the two meetings was remarkably similar The program of the Bowdoin Conference consisted of two parts First there were six major lecture series each consisting of several talks addressing those topics in harmonic analysis on real and p adic groups which were the focus of intensive research during the previous decade These lectures began at an introductory level and advanced to the current state of research Sec ond there was a series of single lectures in which the speakers presented an overview of their latest research   **Conformal Field Theory and Solvable Lattice Models** M Jimbo,2012-12-02 Advanced Studies in Pure Mathematics 16 Conformal Field Theory and Solvable Lattice Models contains nine papers based on the symposium Conformal field theory and solvable lattice models held at RIMS Kyoto May 1986 These papers cover the following active areas in mathematical physics conformal field theory solvable lattice models affine and Virasoro algebra and KP equations The volume begins with an analysis of 1 and 2 point correlation functions of the Gibbs measure of random matrices This is followed by separate chapters on solvable solid on solid SOS models lectures on conformal field theory the construction of Fermion variables for the 3D Ising Model and vertex operator construction of null fields singular vertex operators based on the oscillator representation of conformal and superconformal algebras with central charge extention Subsequent chapters deal with Hecke algebra representations of braid groups and classical Yang Baxter equations the relationship between the conformal field theories and the soliton equations KdV MKdV and Sine Gordon etc at both quantum and classical levels and a supersymmetric extension of the Kadomtsev Petviashvili hierarchy   <u>Geometric and Harmonic Analysis on Homogeneous Spaces</u> Ali Baklouti,Takaaki Nomura,2019-08-31 This book presents a number of important contributions focusing on harmonic analysis and

representation theory of Lie groups All were originally presented at the 5th Tunisian Japanese conference Geometric and Harmonic Analysis on Homogeneous Spaces and Applications which was held at Mahdia in Tunisia from 17 to 21 December 2017 and was dedicated to the memory of the brilliant Tunisian mathematician Majdi Ben Halima The peer reviewed contributions selected for publication have been modified and are without exception of a standard equivalent to that in leading mathematical periodicals Highlighting the close links between group representation theory and harmonic analysis on homogeneous spaces and numerous mathematical areas such as number theory algebraic geometry differential geometry operator algebra partial differential equations and mathematical physics the book is intended for researchers and students working in the area of commutative and non commutative harmonic analysis as well as group representations
