Representations of Algebras P. Webb, 1986-01-08 The latest developments in representation theory with emphasis on the representation type of finite dimensional algebras *Homotopy Theory: Proceedings of the Durham Symposium 1985* E. Rees, J. D. S. Jones, 1987-10-29 This 1987 volume presents a collection of papers given at the 1985 Durham Symposium on homotopy theory They survey recent developments in the subject including localisation and periodicity computational complexity and the algebraic K theory of spaces *Representations of Finite Dimensional Algebras* Hiroyuki Tachikawa, Vlastimil Dlab, Canadian Mathematical Society, 1991 This volume contains the proceedings of the Tsukuba International Conference on Representations of Algebras and Related Topics fifth ICRA held at the University of Tsukuba August 13 18 1990 The conference focused on the rapid development of research on representations of finite dimensional algebras and group representations A subset of the fifty seven lectures are collected here together with a number of other papers not originally presented at the conference With contributions by some of the world s leading experts in this area this book provides a valuable overview of the frontier of research in representations of algebras **Group Representations** Gregory Karpilovsky, 2016-06-06 This volume is divided into three parts Part I provides the foundations of the theory of modular representations Special attention is drawn to the Brauer Swan theory and the theory of Brauer characters A detailed investigation of quadratic symplectic and symmetric modules is also provided Part II is devoted entirely to the Green theory vertices and sources the Green correspondence the Green ring etc In Part III permutation modules are investigated with an emphasis on the study of p permutation modules and Burnside rings The material is developed with sufficient attention to detail so that it can easily be read by the novice although its chief appeal will be to specialists A number of the results presented in this volume have almost certainly never been published before **Algebras, Rings and Modules** Michiel Hazewinkel, Nadiya Gubarenko, V.V. Kirichenko, 2007-09-08 As a natural continuation of the first volume of Algebras Rings and Modules this book provides both the classical aspects of the theory of groups and their representations as well as a general introduction to the modern theory of representations including the representations of quivers and finite partially ordered sets and their applications to finite dimensional algebras Detailed attention is given to special classes of algebras and rings including Frobenius quasi Frobenius right serial rings and tiled orders using the technique of quivers The most important recent developments in the theory of these rings are examined The Cartan Determinant Conjecture and some properties of global dimensions of different classes of rings are also given The last chapters of this volume provide the theory of semiprime Noetherian semiperfect and semidistributive rings Of course this book is mainly aimed at researchers in the theory of rings and algebras but graduate and postgraduate students especially those using algebraic techniques should also find this book of interest [Bibliographic Guide to Conference Publications](#) New York Public Library. Representation Theory of Finite Groups and Finite-Dimensional Algebras Michler, Ringel, 2012-12-06 From April 1 1984 until March 31 1991 the Deutsche Forschungsgemeinschaft has sponsored the project Representation Theory of Finite Groups and Finite Dimensional Algebras The proposal for this project was submitted by B Huppert Mainz B Fischer Bielefeld G Michler Essen H Pahlings Aachen and C M Ringel Bielefeld in order to strengthen the interaction between the different research areas in representation theory The Deutsche Forschungsgemeinschaft has given many research positions and fellowships for young algebraists enabling them to do research at their own universities or as visitors at well known research institutions in America Australia England and France The whole project benefitted very much from an extensive exchange programme between German and American scientists sponsored by the Deutsche Forschungsgemeinschaft and by the

National Science Foundation of the United States This volume presents lectures given in a final conference and reports by members of the project It is divided into two parts The first part contains seven survey articles describing recent advances in different areas of representation theory These articles do not only concentrate on the work done by the German research groups but also inform on major developments of the subject at all The volume omits those topics already treated in book form In particular it does not contain a survey on K **Paperbound Books in Print** ,1991 Books in Series ,1985 Vols for 1980 issued in three parts Series Authors and Titles **Annales scientifiques de l'École normale supérieure** École normale supérieure (France),2005 **The British Library General Catalogue of Printed Books, 1986 to 1987** British Library,1988 **Subject Guide to Books in Print** ,1997 **Scientific and Technical Books and Serials in Print** ,1989

Homotopy Theoretic Methods in Group Cohomology William G. Dwyer,Hans-Werner Henn,2012-12-06 This book consists essentially of notes which were written for an Advanced Course on Classifying Spaces and Cohomology of Groups The course took place at the Centre de Recerca Matemàtica CRM in Bellaterra from May 27 to June 2 1998 and was part of an emphasis semester on Algebraic Topology It consisted of two parallel series of 6 lectures of 90 minutes each and was intended as an introduction to new homotopy theoretic methods in group cohomology The first part of the book is concerned with methods of decomposing the classifying space of a finite group into pieces made of classifying spaces of appropriate subgroups Such decompositions have been used with great success in the last 10 15 years in the homotopy theory of classifying spaces of compact Lie groups and p compact groups in the sense of Dwyer and Wilkerson For simplicity the emphasis here is on finite groups and on homological properties of various decompositions known as centralizer resp normalizer resp subgroup decomposition A unified treatment of the various decompositions is given and the relations between them are explored This is preceded by a detailed discussion of basic notions such as classifying spaces simplicial complexes and homotopy colimits
