Representing the Holocaust in Children's Literature Lydia Kokkola, 2013-10-15 Writing about the Holocaust and writing for young readers evoke two quite separate sets of concerns which are not always mutually compatible The first half of *Representing the Holocaust* focuses on how literary material can present historically verifiable material The second half examines how such materials will be perceived by young readers whether they will be able to determine any boundaries between fictionality and factuality and what motivates young readers to keep reading The work concludes by placing the study in the context of Holocaust education

Krystina Madej,2024-01-10 *Representation of Disability in Children's Video Games* looks at how children's engagement with characters and stories in video games helps create the perception of disability they have as teens and adults Drawing on child development theory supported by neuroscience the book shows how the scaffold of information the schema adults have of disability is first created at a very young age as they interact through play with characters with disabilities in narrative video games Positing that early video game play experiences should provide exposure to narrative schemas that add understanding and help create meaning about the disability represented the book presents how such representation in children's video games maps against cognitive development and the psychomotor and cognitive needs and abilities of children 3-12 Through close readings of over 40 PEGI 3 and PEGI 7 ESRB E 10 games and analysis of games as diverse as Backyard Baseball and Sly Cooper the author defines broad categories of representation representation as cosmetic providing exposure but not game play utility as incidental used as a device that provides purpose for the narrative or as more authentically representing the disability as integral to the character and their life The book provides readers with an overview of contemporary games that betters their understanding of how children's games present disability and how children create their perceptions through interaction with characters and stories This book will be of interest to academics and students of game studies in topics such as behavioural science ethics and HCI as well as in sociology communications and digital media It is pertinent in particular to game developers and to educators disability advocates parents and policy makers *Representing History, Class, and Gender in Spain and Latin America* Carolina Rocha,Georgia Seminet,2012-07-25
