Genes, Women, Equality Mary Briody Mahowald, 1999-10-14 Genetics is not gender neutral in its impact Mahowald cites a wide range of biological and psychosocial examples that reveal its different impact on men and women especially with regard to reproduction and caregiving She examines the extent to which these differences are associated with gender injustice arguing for positions that reduce inequality between the sexes The critical perspective Mahowald brings to this analysis is an egalitarian interpretation of feminism that demands attention to inequalities arising from racism

ethnocentrism ableism and classism as well as sexism Eschewing a notion of equality as sameness Mahowald defines equality as attribution of the same value to different objects Gender justice she claims imputes the same value to men and women despite their differences It can only be maximized by practical efforts to equalize the burdens and benefits associated with genetics The topics considered include participation in research allocation of genetic services cultural difference sex selection misattributed paternity prenatal and preimplantation diagnosis carrier testing genetic interventions genetic disabilities preferences for genetic ties to offspring genetic susceptibility to late onset disorders behavioral genetics genetic discrimination in employment and insurance and human cloning Cases both real and concocted are used to illustrate the questions addressed

The Ethics of Inheritable Genetic Modification John Rasko, Gabrielle O'Sullivan, Rachel Ankeny, 2006-01-26 Is inheritable genetic modification the new dividing line in gene therapy The editors of this searching investigation representing clinical medicine public health and biomedical ethics have established a distinguished team of scientists and scholars to address the issues from the perspectives of biological and social science law and ethics including an intriguing Foreword from Peter Singer Their purpose is to consider how society might deal with the ethical concerns raised by inheritable genetic modification and to re examine prevailing views about whether these procedures will ever be ethically and socially justifiable The book also provides background to define the field and discusses the biological and technological potential for inheritable genetic modification its limitations and its connection with gene therapy cloning and other reproductive interventions For scientists bioethicists clinicians counsellors and public commentators this is an essential contribution to one of the critical debates in current genetics

Responsibility, Law and the Family Jo Bridgeman, Craig Lind, 2016-04-08 Focusing on moral social and legal responsibilities as opposed to rights or obligations this volume explores the concept of responsibility in family life law and practice Divided into four parts the study considers the nature of family responsibility constructions of children s responsibilities shifting conceptions of family responsibilities and family responsibility and the law The collection brings together leading experts from the disciplines of sociology socio legal studies and law to discuss responsibilities prior to birth responsibilities for children as well as responsibilities of children and of the state towards family members The volume informs and challenges the developing conceptualization of responsibilities which arise in interdependent intimate and caring relationships and their legal regulation It will be of great interest to researchers and practitioners working in this complex field

The Impossibility of Motherhood Patrice DiQuinzio, 1999-09-13 An adequate analysis of experiences and situations specific to women especially mothering requires consideration of women s difference A focus on women s difference however jeopardizes feminism s claims of women s equal individualist subjectivity and risks recuperating the inequality and

oppression of women especially the view that all women should be mothers want to be mothers and are most happy being mothers This book considers how thinkers including Simone de Beauvoir Julia Kristeva Nancy Choderow and Adrienne Rich struggle to negotiate this dilemma of difference in analyzing mothering encompassing the paradoxes concerning embodiment gender and representation they encounter Patrice Di Quinzio shows that mothering has been and will continue to be an intractable problem for feminist theory itself and suggests the political usefulness of an explicitly paradoxical politics of mothering *The Ethics of Care* Virginia Held, 2006 The author assesses the ethics of care as a promising alternative to the familiar moral theories that serve so inadequately to guide our lives Held examines what we mean by care and focuses on caring relationships She also looks at the potential of care for dealing with social issues and global problems

Reproductive Genetics, Gender and the Body Elizabeth Ettorre, 2013-04-15 This book is all about reproductive genetics a sociological concept developed to define the use of DNA based technologies in the medical management and supervision of reproduction and pregnant women In a searching analysis Elizabeth Ettorre uncovers the hidden social processes involved in the development of these technologies Focussing on prenatal screening she explores how the key concepts of gender and the body are intertwined with the process of building genetic knowledge and some of the unintended consequences for women These include the injection of biology into social relationships and the development of a gendered discourse of shame and stigmatisation in which the perfect body becomes idealised and new conceptions of disability are shaped It becomes clear that the modernist tradition of scientific disinterestedness is being replaced by a new ethic the making of moral judgements by scientists Reproductive Genetics Gender and the Body draws on interviews with European medical legal and nursing professionals and raises important issues around the gendered female body the site of genetic capital It challenges professional and scholar alike to grapple with and think through their responsibilities in this complex field where the competing issues have yet to be resolved

Origin Stories in Political Thought Joanne Harriet Wright, 2004-01-01 Origin stories are a recurring motif in the history of political thought Presented as narratives that describe the beginnings of politics and power these stories are among the most provocative and politically contentious means by which Western society organizes and represents its experience Indeed as scripts of citizenship origin stories seek to manufacture consent to a preconceived and hierarchical political vision Joanne H Wright's *Origin Stories in Political Thought* examines Plato's *Timaeus* Hobbes's story of the state of nature and the social contract and early Second Wave feminist stories about the beginnings of patriarchal social relations Using a historically sensitive feminist methodology Wright documents and deconstructs the tradition of telling origin stories in the larger history of political thought Although individual tales have been assessed in current scholarship the motif of the origin story itself has until now escaped systematic analysis With meticulous research and convincing conclusions *Origin Stories in Political Thought* makes a groundbreaking and valuable contribution to both feminist and political studies

Without Apology Shannon Stettner, 2016-08-26 Until the late 1960s the authorities on abortion were for the most part men politicians clergy lawyers physicians all of whom had an interest in regulating women's bodies Even today when we hear women speak publicly about abortion the voices are usually those of the leaders of women's and abortion rights organizations women who hold political office and on occasion female physicians We also hear quite frequently from spokeswomen for anti-abortion groups Rarely however do we hear the voices of ordinary women women whose lives have been in some way touched by abortion Their thoughts typically owe more to human circumstance than to ideology and without them we run the risk of thinking and talking about the issue of abortion only in the abstract *Without Apology* seeks to address this issue by gathering the voices of activists feminists and scholars as well as abortion providers and clinic support staff alongside the stories of women whose experience with abortion is more personal With the particular aim of moving beyond the polarizing rhetoric that has characterized the issue of abortion and reproductive justice for so long *Without Apology* is an engrossing and arresting account that will promote both reflection and discussion

New Blood Chris Bobel, 2010-05-05 *New Blood* offers a fresh interdisciplinary look at feminism in flux For over three decades menstrual activists have questioned the safety and necessity of feminine care products while contesting menstruation as a deeply entrenched taboo Chris Bobel shows how a little known yet enduring force in the feminist health environmental and consumer rights movements lays bare tensions between second and third wave feminisms and reveals a complicated story of continuity and change within the women's movement Through her critical ethnographic lens Bobel focuses on debates central to feminist thought including the utility of the category gender and challenges to building an inclusive feminist movement Filled with personal narratives playful visuals and original humor *New Blood* reveals middle aged progressives communing in Red Tents urban punks and artists culture jamming commercial menstrual products in their zines and sketch comedy queer anarchists practicing DIY health care

African American health educators espousing holistic womb health and hopeful mothers refusing to pass on the shame to their pubescent daughters With verve and conviction Bobel illuminates today s feminism on the ground indisputably vibrant contentious and ever dynamic *Abortion Law and Politics Today* Ellie Lee,1998-11-12 Women s needs are placed at the centre of this collection The contributors discuss the extent to which the contemporary legal framework on abortion matches the needs of women faced with unwanted pregnancy The book contains sections on Britain including an account of the campaign to legalize abortion written by those centrally involved with that campaign international comparisons of abortion law with chapters on France the United States Ireland and Poland and chapters covering contemporary debates including men s rights in abortion and abortion for foetal abnormality **Technology and Values** Craig Hanks,2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics **Reconstructing Motherhood and Disability in the Age of Perfect Babies** Gail Landsman,2008-08-18 Examining mothers of newly diagnosed disabled children within the context of new reproductive technologies and the discourse of choice this book uses anthropology and disability studies to revise the concept of normal and to establish a social environment in which the expression of full lives will prevail *Genetic Morality* David Shaw,David M. Shaw,2006 Cloning embryo research and genetic modification are three of the most controversial issues of our time Is it ethical to use cloning as a means of reproduction Are embryos people Is there a difference between removing genetic disease and creating designer babies This book will attempt to show that these and other problems are ultimately resolvable given careful and unbiased application of established ethical principles many of which underlie common morality These principles when applied to the problems of the new genetic technologies form the basis of a new genetic morality This book applies established principles of biomedical ethics to the new genetic technologies and examines the ethical implications of reproductive and therapeutic cloning genetic modification and stem cell research from a deontological and a rule utilitarian perspective Finally it seeks to establish what if anything is wrong with each of these practices and why
