**Reproductive Seasonality in Teleosts** Angus D. Munro,Alexander P. Scott,T. J. Lam,2019-11-11 This important publication provides for the first time a comprehensive review of knowledge of reproductive seasonality in teleosts It addresses why a particular species should show such seasonality and how environmental cues act as regulators to ensure that reproductive maturation and breeding occur at the optimum time The book considers the ultimate factors responsible for the evolution of reproductive seasonality in fish It reviews salient concepts of reproductive seasonality in mammals This volume also includes a review of accumulated knowledge of the control mechanisms of salmonids gasterosteids temperate cyprinids cyprinodonts and other brackish water forms and marine and tropical freshwater teleosts This is a work of value to research scientists in the field of environmental physiology reproductive biology and comparative neuroendocrinology and endocrinology In addition it is relevant for institutions involved with aquaculture and fisheries management It is useful for post graduate as well as undergraduate courses in fish biology and various related subjects

**The Evolving Relationship between Economy and Environment** Kazuhiro Okuma,2017-03-29 This book sheds new light on the relationship between economy and the environment by approaching the issue from evolutionary and institutional economics Building a framework of theory and empirical analysis it provides an in depth perspective on how economic growth and environmental policy interact and historically evolve Orthodox environmental economics usually understands environmental issues under the rules of market economy while environmental sciences subordinate economy to physical constraints of the environment Instead of these hierarchical visions this book recognizes economy and the environment as co evolving systems The theoretical framework is elaborated based on the regulation and post Keynesian theories combined An idea of three dimensional factors capital labor and the environment leads to conceptual and mathematical models which will be applicable to wider analyses Using this framework Japanese history is analyzed as a typical example of environmental policy development Historical transformations of environmental policies and growth regimes are explained using indices and econometric analysis Experiences of strict regulations with positive economic impacts are also identified These works lead to some interesting implications which include mechanisms the possibility and conditions of green growth This book proposes a new approach by bridging the gap between evolutionary institutional economics and environmental economics which should be stimulating to them both and possibly open the door for a new research avenue

*Environment in the Lives of Children and Families* Ann Phoenix, Janet Boddy, Catherine Walker, Uma Vennam, 2017-09-27  
Available Open Access under CC BY licence. How do environmental policies link to dynamic and relational family practices for children and parents? This Policy Press Short presents innovative cross national research into how environment is understood and negotiated within families and how this plays out in everyday lives. Based on an ESRC study that involved creative qualitative work with families in India and the UK who live in different contexts, this book illuminates how environmental practices are negotiated within families and how they relate to values, identities and society. In doing so, it contributes to understanding of the ways in which families and childhood are constructed as sites for intervention in climate change debates. In an area that is increasingly of concern to governments, NGOs and the general public, this timely research is crucial for developing effective responses to climate change.
