Instructors considering this book for use in a course may request an examination copy here [Across the Worlds of Islam](#) Edward E. Curtis IV, 2023-07-18 Winner 2024 Choice Outstanding Academic Title Muslim people are found all over the world. Most live outside the Middle East from Asia to the Americas. The vast majority of contemporary Muslims are not fluent in Arabic and speakers of languages such as Persian, Urdu, and Turkish have made essential contributions to Islamic history and culture. However, typical courses on Islam tend to downplay areas beyond the Middle East, focusing on Arabic texts and elite theological and doctrinal arguments. This book offers an inclusive view of the diversity and complexity of the many worlds of Islam, investigating ethics and aesthetics as much as scriptures and theology. By paying attention to Muslims who are socially, culturally, doctrinally, or politically marginalized, it provides a comprehensive and all-embracing vision of the religion and its many interrelated communities. Contributors from a range of personal and intellectual backgrounds explore the capaciousness of Muslim identities, helping readers achieve a broader understanding of the past, present, and future of the Muslim world. This book includes communities such as the Nation of Islam and Alevi Muslims and it goes beyond rituals like prayer and fasting to consider a wider array of practices such as tattooing. *Across the Worlds of Islam* is at once student-friendly and cutting-edge, written with both introductory courses and general readers in mind. Examining Muslim identity and practice from the perspective of the margins, it offers nuanced portraits of Muslim life across geographic and sectarian divisions. **Population And Environment** Lourdes Arizpe, M. McKibben, Dudley L. Poston, Carol S. Walther, 2005-12-16 China's one-child population policy, first initiated in 1979, has had an enormous effect on the country's development. By reducing its fertility in the past two decades to less than two children per woman and developing a family planning program focused heavily on sterilization and abortion, China has undergone a significant transition in status to a demographically developed country. Bringing together contributions from leading academics, this book looks at the impact of the government's strict control over planning and population growth on the family, the wider society, and the country's demography. The contributors examine developments such as family planning policy and contraceptive use, biological and social determinants of fertility patterns of family and marriage, and China's future population trends. As such, it will be essential reading for academics, researchers, policy makers, and government officials with an interest in China's population policy. *Beyond the Numbers* Laurie Ann Mazur, 2013-04-16 *Beyond the Numbers*
