Flight Identification of Raptors of Europe, North Africa and the Middle East Dick Forsman, 2016-02-25 This book is the ultimate flight identification guide for the raptors of the Western Palearctic covering Europe North Africa the Middle East including Arabia to Central Asia Raptors are notoriously hard to identify even if seen well and represent perhaps the toughest of all ID challenges for birders This guide provides identification information for all 60 species that regularly occur in the region to subspecific level The text covers every plumage and age in detail with each species account accompanied by a range of photographs covering all the principal plumages Based on this stunning photographic coverage most of which has never been published before this book represents a landmark in bird identification books and a major work for all raptor enthusiasts

The History of the European Fauna Robert Francis Scharff, 1899

Biodiversity Hotspots Frank E. Zachos, Jan Christian Habel, 2011-09-15 Biodiversity and its conservation are among the main global topics in science and politics and perhaps the major challenge for the present and coming generations This book written by international experts from different disciplines comprises general chapters on diversity and its measurement human impacts on biodiversity hotspots on a global scale human diversity itself and various geographic regions exhibiting high levels of diversity The areas covered range from genetics and taxonomy to evolutionary biology biogeography and the social sciences In addition to the classic hotspots in the tropics the book also highlights various other ecosystems harbouring unique species communities including coral reefs and the Southern Ocean The approach taken considers but is not limited to the original hotspot definition *sensu stricto* and presents a chapter introducing the 35th hotspot the forests of East Australia While due to a bias in data availability the majority of contributions on particular taxa deal with vertebrates and plants some also deal with the less studied invertebrates This book will be essential reading for anyone involved with biodiversity particularly researchers and practitioners in the fields of conservation biology ecology and evolution
