Past, present, and future, a brief epitome of the history of this world Frank Leigh C. King, 1888

Reptiles of the World Raymond Lee Ditmars, 1910

The zoologist, 1893

Crocodiles are not a reptile. Crocodile such as birds and mammals are a separate class, which have been derived from reptiles. Ramin Amirmardfar, 2019-09 I have found this matter for the first time that Crocodiles are not a reptile Crocodile such as birds and mammals are a separate class which have been derived from reptiles Mammalian four chambered heart from a reptile like three chambered heart is extension of the septum the wall dividing the chambers lost of the right systemic arch and the left systemic arch persists In birds lost of the left systemic arch and the right systemic arch persist The lineage leading to crocodiles evolved a four chambered heart along a different pathway keeping both systemic arches Zoologists putting the land vertebrates in 4 classes amphibians reptiles birds and mammals But I came to the conclusion that their crocodile are a separate class As birds and mammals with obtaining four chambered heart have been derived from the class of reptiles and create a separate class Crocodile also have made four chambered hearts and create a new class and has been derived from the reptile class

Riparian Research and Management: Past, Present, Future: Volume 1 U.S. Department of Agriculture, 2019-04-06 Fifty years ago riparian habitats were not recognized for their extensive and critical contributions to wildlife and the ecosystem function of watersheds This changed as riparian values were identified and documented and the science of riparian ecology developed steadily Papers in this volume range from the more mesic northwestern United States to the arid Southwest and Mexico More than two dozen authors most with decades of experience review the origins of riparian science in the western United States document what is currently known about riparian ecosystems and project future needs Topics are widespread and include interactions with fire climate change and declining water impacts from exotic species unintended consequences of biological control the role of small mammals watershed response to beavers watershed and riparian changes changes below large dams water birds of the Colorado River Delta and terrestrial vertebrates of mesquite bosques
