Revisiting the Entrepreneurial Mind Malin Brännback, Alan L. Carsrud, 2017-02-08 The book explores various aspects of cognitive and motivational psychology as they impact entrepreneurial behavior Building upon the 2009 volume *Understanding the Entrepreneurial Mind* the editors and contributors explore the cognitions motivations passions intentions perceptions and emotions associated with entrepreneurial behaviors in each case preserving their original chapters and enhancing them with thoughtful and targeted updates reflecting on the most recent developments in theory and practice telling the story of what has transpired in the last decade in the field of entrepreneurial psychology The volume addresses such questions as Why do some people start business and others do not Is entrepreneurship a natural quality or can it be taught Do entrepreneurs think differently from others While there is a great deal of literature exploring the dynamics of new firm creation policies to promote innovation and technology transfer and the psychology of creativity research on entrepreneurial mindset or cognition is relatively new and draws largely from such related fields as organizational behavior cognitive and social psychology career development and consumer research In this book editors Brännback and Carsrud have reassembled the contributors to *Understanding the Entrepreneurial Mind* to discuss new research paradigms given their vantage point years after the original volume was published Featuring the most current literature references *Revisiting the Entrepreneurial Mind* continues to challenge conventional approaches to entrepreneurship and articulate an agenda for future research

Understanding the Entrepreneurial Mind Alan L. Carsrud, Malin Brännback, 2009-07-30 Interest in the functioning of the human mind can certainly be traced to Plato and Aristotle who often dealt with issues of perceptions and motivations While the Greeks may have contemplated the human condition the modern study of the human mind can be traced back to Sigmund Freud 1900 and the psychoanalytic movement He began the exploration of both conscious and unconscious factors that propelled humans to engage in a variety of behaviors While Freud's focus may have been on repressed sexuality our focus in this volume lies elsewhere We are concerned herein with the expression of the cognitions motivations passions intentions perceptions and emotions associated with entrepreneurial behaviors We are attempting in this volume to expand on the work of why entrepreneurs think differently from other people Baron 1998 2004 During the decade of the 1990s the field of entrepreneurship research seemingly abandoned the study of the entrepreneur This was the result of earlier research not being able to demonstrate some unique entrepreneurial personality trait or characteristic Brockhaus and Horwitz 1986 It was both a naive and simplistic search for the holy grail of what made entrepreneurs the way they are However many of the researchers in this volume have never given up the belief that a better understanding of the mind of the entrepreneur would give us a better understanding of the processes that lead to the creation of new ventures
