Robinson, 2019-01-29 We live in a digital age where the mediums of art are inextricably bound to the binary code and painting and photography are redefined in their interconnected relationship through digital reconfiguration As digitisation unmoors these mediums from their traditional supports their modes of production display and dissemination shift These changes bring about new ways of creating and engaging with artworks Through this the innate qualities of the mediums previously anchored in their analogue nature are re-evaluated through their connection with the digital Born out of the PaintingDigitalPhotography conference held at QUAD Derby UK in May 2017 this anthology of essays investigates aspects of interconnectivity between painting digital and photography in contemporary art practices It contributes to critical discourses around networks of associations by examining where syntheses occur and differences remain between these mediums at the beginning of the twenty first century The Primacy of the Image in Northern European Art, 1400-1700 Debra

Verrocchio worked in an extraordinarily wide array of media and used unusual practices of making to express ideas **The Signature Style of Frans Hals** Christopher D.M. Atkins, 2025-10-01 This richly illustrated study is the first to consider the manifold functions and meanings of Hals's distinctive handling of paint Atkins explores the uniqueness of Hals's approach to

painting and the relationship of his manner to seventeenth century aesthetics He also investigates the economic motivations and advantages of his methods the operation of the style as a personal and workshop brand and the apparent modernity of the artist s style The book seeks to understand the multiple levels on which Hals s consciously cultivated manner of painting operated for himself his pupils and assistants his clients and succeeding generations of viewers As a result the book offers a wholly new understanding of one of the leading artists of the Dutch Golden Age and one of the most formative painters in the history of art in the Western tradition It also provides a much needed interrogation of the interrelationships of subjectivity style authorship methods of artistic and commercial production economic consumption and art theory in early modernity

The Modeller Frits Scholten,2025-06-30 In these days the most famous modeller this is how the Dutch sculptor Adriaen de Vries 1556 1626 was characterised in 1621 A virtuoso modeller De Vries explored new ways to enliven his art His bronze sculptures were made in a radically new sketchy style with free figure compositions and a vigorous treatment of human anatomy often balancing on the border between realism and distortion This book explores how and why a Late Renaissance sculptor broke so drastically with the prevailing stylistic paradigm of his time in search of *vivezza* natural liveliness and the *viva figura* the statue on the brink of coming to life Adriaen de Vries aimed to create sculptures that move in the metaphorical no man s land between death and life back and forth from inert bronze to apparent vitality as this study will argue

Nature's Experiments and the Search for Symbolist Form Allison Morehead,2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis douard Vuillard August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature s experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists solutions to the problem of symbolist form and provided a ready made methodology for fin de si cle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation automatism the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism Nature s Experiments and the Search for Symbolist Form demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism

Renaissance Theory James Elkins,Robert Williams,2008-04-01 Renaissance Theory presents an animated conversation among art historians about the optimal ways of conceptualizing Renaissance art and the links between Renaissance art and contemporary art and theory This is the first discussion of its kind involving not only questions within Renaissance scholarship but issues of concern to art

historians and critics in all fields Organized as a virtual roundtable discussion the contributors discuss rifts and disagreements about how to understand the Renaissance and debate the principal texts and authors of the last thirty years who have sought to reconceptualize the period They then turn to the issue of the relation between modern art and the Renaissance Why do modern art historians and critics so seldom refer to the Renaissance Is the Renaissance our indispensable heritage or are we cut off from it by the revolution of modernism The volume includes an introduction by Rebecca Zorach and two final synoptic essays as well as contributions from some of the most prominent thinkers on Renaissance art including Stephen Campbell Michael Cole Frederika Jakobs Claire Farago and Matt Kavalier *Inadvertent Images* Peter Geimer, 2018-03-14 As an artistic medium photography is uniquely subject to accidents or disruptions that can occur in the making of an artwork Though rarely considered seriously those accidents can offer fascinating insights about the nature of the medium and how it works With *Inadvertent Images* Peter Geimer explores all kinds of photographic irritation from throughout the history of the medium as well as accidental images that occur through photo like means such as the image of Christ on the Shroud of Turin brought into high resolution through photography Geimer's investigations complement the history of photographic images by cataloging a corresponding history of their symptoms their precarious visibility and the disruptions threatened by image noise Interwoven with the familiar history of photography is a secret history of photographic artifacts spots and hazes that historians have typically dismissed as spurious phenomena parasites or enemies of the photographer With such photographs it is virtually impossible to tell where a picture has been disrupted where the representation ends and the image noise begins We must Geimer argues seek to keep both in sight the technical making and the necessary unpredictability of what is made the intentional and the accidental aspects representation and its potential disruption **The Hand on the Shakespearean Stage** Farah Karim Cooper, 2016-04-21 This ground breaking new book uncovers the way Shakespeare draws upon the available literature and visual representations of the hand to inform his drama Providing an analysis of gesture touch skill and dismemberment in a range of Shakespeare's works it shows how the hand was perceived in Shakespeare's time as an indicator of human agency emotion social and personal identity It demonstrates how the hand and its activities are described and embedded in Shakespeare's texts and about its role on the Shakespearean stage as part of the actor's body in the language as metaphor and as a morbid stage prop Understanding the cultural signifiers that lie behind the early modern understanding of the hand and gesture opens up new and sometimes disturbing ways of reading and seeing Shakespeare's plays **From Ancient to Modern** Chi, Jennifer Y., and Pedro Azara, eds. , 2015-03-22 Catalog of an exhibition held at the Institute for the Study of the Ancient World at New York University New York February 12 June 7 2015 [Intercultural China](#) Francesco Pellizzi, 1999 *Res* is a journal of anthropology and comparative aesthetics dedicated to the study of the object in particular cult and belief objects and objects of art The journal presents contributions by philosophers art historians archaeologists critics linguists architects artists and others Its field of

essays brings together an international team of scholars whose research offers English readers a rich and complex overview of the place of France and French artists in the visual arts since 1945 Addressing a wide range of artistic practices spanning over seven decades and using different methodologies their contributions cover ground charted and unknown They introduce greater depth and specificity to familiar artists and movements such as Lettrism Situationist International or Nouveau Ralisme while bringing to the fore lesser known artists and groups including GRAPUS the Sociological Art Collective and Nicolas Schffer Collectively they stress the political dimensions and social ambitions of the art produced in France at the time deconstruct the traditional geography of the French art world and highlight the multiculturalism of the French art scene that resulted from its colonial past and the constant flux of artistic travels and migrations Ultimately the book contributes to a story of postwar art in which France can be inscribed not as a main or sub chapter but rather as a vector in the wider constellation of modern and contemporary art

The Brush and the Pen Dario Gamboni, 2011 French symbolist artist Odilon Redon 1840 1916 seemed to thrive at the intersection of literature and art Known as the painter writer he drew on the works of Poe Baudelaire Flaubert and Mallarmé for his subject matter And yet he concluded that visual art has nothing to do with literature Examining this apparent contradiction *The Brush and the Pen* transforms the way we understand Redon's career and brings to life the interaction between writers and artists in fin de siècle Paris Dario Gamboni tracks Redon's evolution from collaboration with the writers of symbolism and decadence to a defense of the autonomy of the visual arts He argues that Redon's conversion was the symptom of a mounting crisis in the relationship between artists and writers provoked at the turn of the century by the growing power of art criticism that foreshadowed the modernist separation of the arts into intractable fields In addition to being a distinguished study of this provocative artist *The Brush and the Pen* offers a critical reappraisal of the interaction of art writing criticism and government institutions in late nineteenth century France
