## **Research In Family Planning:**

**Research in Family Planning** J. Bonnar,R.F. Harrison,W. Thompson,2012-12-06 This volume contains the papers on family planning research which were presented at the XIth World Congress on Fertility and Sterility held in Dublin Ireland in June 1983 under the auspices of the International Federation of Fertility Societies These papers were presented during the related communications sessions of the Congress and have been brought together into a special volume which will be of major interest to those concerned with family planning Section 1 deals with the area of natural family planning determination of the fertile period and effects of lactation Steroid contraception vaginal and intrauterine contraception abortion and sterilization are included in Sections 2 4 Social aspects of fertility control are covered in Section 5 and the final section contains studies of the effects of gossypol as a male contraceptive This volume brings together important new knowledge in the area of family planning clarifies some of the problems and should stimulate research on the many unresolved issues in this vitally important area [A Five-year Plan for Family Planning Services and Population Research](#) United States.

Department of Health, Education, and Welfare,1974 [\*\*A Five-year Plan for Family Planning Services and Population Research\*\*](#) United States. Department of Health, Education, and Welfare,1973 [Improving Quality of Care in Family](#)

[Planning](#) Jay Satia,Kavita Chauhan,2018-05-09 In this book the authors review initiatives in improving the quality of care for family planning in India and bring them to the broader forum of policy level discussions The global Family Planning 2020 FP2020 framework argues for voluntary rights based family planning programmes The rights based approach builds on the bedrock of quality of care which means listening to what women want treating individuals with dignity and respect and ensuring that everyone has access to full information and high quality care Improving the quality of care in family planning services in a country like India is crucial from individual national and global considerations This book critically discusses and evaluates the various interventions undertaken so far and the reasons for success and failure It also synthesizes current research studies in India identifies gaps and presents a research agenda to bridge this gap and accelerate progress towards improving quality of care in family planning It presents a comprehensive framework that underscores the importance of health systems and community environments in creating enabling motivating and empowering roles for providers and clients The examples and perspectives presented in this book make a strong case for adoption into policy frameworks and scaling up of quality of care efforts and identifying research priorities for strengthening the response to family planning This book greatly contributes towards enhancing the quality of family planning care at the grass roots level in low resource settings and is of interest to researchers and practitioners of public health particularly community health maternal and child health and social work [\*\*Family Planning Operations Research\*\*](#) James R. Foreit,Tomaš Frejka,1998 [\*\*A Review of the HHS Family Planning Program\*\*](#) Institute of Medicine,Board on Children, Youth, and Families,Board on Health Sciences Policy,Committee on a Comprehensive Review of the HHS Office of Family Planning Title X Program,2009-09-07 A Review of

the HHS Family Planning Program provides a broad evaluation of the Title X family planning program since its establishment in 1970. The program successfully provides family planning services to its target audience of low income individuals but there is room for improvement. While the program's core goals are apparent, a secondary set of changing priorities has emerged without a clear evidence based strategic process. Also funding for the program has increased in actual dollars but has not kept pace with inflation or increased costs. Several aspects of the program's structure could be improved to increase the ability of Title X to meet the needs of its target population. At the same time, the extent to which the program meets those needs cannot be assessed without a greater capacity for long term data collection. A Review of the HHS Family Planning Program recommends several specific steps to enhance the management and improve the quality of the program as well as to demonstrate its direct contribution to important end results such as reducing rates of unintended pregnancy, cervical cancer and infertility. The book will guide the Office of Family Planning toward improving the effectiveness of the program. Other parties who will find the research and recommendations valuable include programs receiving Title X funding from the Office of Family Planning, policy makers, researchers and professional organizations.

The Global Family Planning Revolution

Warren C. Robinson, John A. Ross, 2007 The striking upsurge in population growth rates in developing countries at the close of World War II gained force during the next decade. From the 1950s to the 1970s scholars and advocacy groups publicized the trend and drew troubling conclusions about its economic and ecological implications.

Private educational and philanthropic organizations, government and international organizations joined in the struggle to reduce fertility. Three decades later this movement has seen changes beyond anyone's most optimistic dreams and global demographic stabilization is expected in this century. The Global Family Planning Revolution preserves the remarkable record of this success. Its editors and authors offer more than a historical record. They discuss important lessons for current and future initiatives of the international community. Some programs succeeded while others initially failed and the analyses provide valuable guidance for emerging health related policy objectives and responses to global challenges.

**Contraceptive Research and Development** Institute of Medicine, Committee on Contraceptive Research and Development, 1996-11-04 The contraceptive revolution of the 1960s and 1970s introduced totally new contraceptive options

and launched an era of research and product development Yet by the late 1980s conditions had changed and improvements in contraceptive products while very important in relation to improved oral contraceptives IUDs implants and injectables had become primarily incremental Is it time for a second contraceptive revolution and how might it happen Contraceptive Research and Development explores the frontiers of science where the contraceptives of the future are likely to be found and lays out criteria for deciding where to make the next R D investments The book comprehensively examines today s contraceptive needs identifies niches in those needs that seem most readily translatable into market terms and scrutinizes issues that shape the market method side effects and contraceptive failure the challenge of HIV AIDS and other sexually transmitted diseases and the implications of the women s agenda Contraceptive Research and Development analyzes the response of the pharmaceutical industry to current dynamics in regulation liability public opinion and the economics of the health sector and offers an integrated set of recommendations for public and private sector action to meet a whole new generation of demand   **Report on Family Planning** United States.
