## **Research In Social Stratification And Mobility Vol 4 Research In Social Stratification And Mobility:**

*Social Stratification in Contemporary Japan* Kenji Kosaka, 2013-09-05 First Published in 1994 The focus of this study is class and stratification in Japan There are a few papers on social stratification in Japan that are written in English and make use of the SSM research The present study uses the latest SSM data These were collected in 1985 and are themselves becoming out of date given that Japanese society has been experiencing rapid and radical change though they remain among the most recent available The authors are sociologists this book is intended for a general readership

**PISA 2012 Results: What Makes Schools Successful (Volume IV) Resources, Policies and Practices** OECD, 2013-12-03 This fourth volume of PISA 2012 results examines how student performance is associated with various characteristics of individual schools and school systems

**The Shape of Social Inequality** David Bills, 2005-08-24 This volume brings together former students colleagues and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller s many contributions to theory and research on social stratification and mobility All of the chapters respond to Haller s programmatic agenda for stratification research A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary second that we identify the individual and collective consequences of the different states and rates of change of such structures and third seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change The contributors to this Festschrift address such topics as the changing nature of stratification regimes the enduring significance of class analysis the stratifying dimensions of race ethnicity and gender and the interplay between educational systems and labor market outcomes Many of the chapters adopt an explicitly cross societal comparative perspective on processes and consequences of social stratification The volume offers both conceptually and empirically important new analyses of the shape of social stratification

*Social and Economic Policies in Korea* Dong-Myeon Shin, 2003-12-08 A unique explanation of the development of Korean social policy using the concepts of policy idea policy network and policy linkages to examine the causes patterns and consequences of state interventions in the economy and social affairs

*The China Society Yearbook, Volume 4* Xin Ru, Xueyi Lu, Peilin Li, 2010-03-25 The year 2008 marked a historical turning point for China with the 30th anniversary of the launch of China s opening and reform policy and the Olympic Games in Beijing On a negative note the year was also marked by the Sichuan earthquake and the subprime mortgage crisis in the USA China maintained a growth rate of 10% from 2003 to 2007 and began to adjust its industrial structures shift development modes and reform the urban rural duality China also increased its investment in employment education healthcare social security and public service sectors especially in rural areas The international economic crisis has however dragged down the international economic situation in response to which the Chinese government is aiming to invest RMB 4 trillion over the next two years to confront this major challenge China s economic and social development situation in 2009 will have major significance in the drafting of future

economic policy      **Class Structure in Europe** ,2003 A comparison of these two presidents and presidencies examining their legacies leadership styles and places in history      *Keio Journal of Politics* ,1984      **Social Stratification: Volume 1, Sociological Studies** J. A. Jackson,1968-11-02 All the papers in the first volume of Sociological Studies are centred round the theme of social stratification      **International Comparative Research** Manfred Niessen,Jules Peschar,Chantal Kourilsky,2013-10-22 International Comparative Research Social Structures and Public Institutions in Eastern and Western Europe is a seven chapter book prepared for the Second International Seminar on Cross National Comparative Research Chapters 1 and 2 describe developments in comparative research on social structure and comparisons of social mobility in different socio economic systems Subsequent chapters explore structural changes and mobility in a capitalist and a socialist society comparative research on public institutions a comparative perspective on social problems and the law and comparison of public institutions their organization and procedures The last chapter considers high level public officials in Eastern and Western European countries      **Recent Social Trends in Canada, 1960-2000** Lance W. Roberts,Rodney A. Clifton,Barry Ferguson,2005-08-15 The introduction summarizes and locates the major waves of change The authors then document each trend in relation to eighteen thematic groups that include age community women labour management stratification social relations the state mobilizing institutions social forces ideologies households lifestyle leisure education integration and attitudes and values      **The Colors of Poverty** Ann Chih Lin,David R. Harris,2008-08-14 Given the increasing diversity of the nation particularly with respect to its growing Hispanic and Asian populations why does racial and ethnic difference so often lead to disadvantage In *The Colors of Poverty* a multidisciplinary group of experts provides a breakthrough analysis of the complex mechanisms that connect poverty and race *The Colors of Poverty* reframes the debate over the causes of minority poverty by emphasizing the cumulative effects of disadvantage in perpetuating poverty across generations The contributors consider a kaleidoscope of factors that contribute to widening racial gaps including education racial discrimination social capital immigration and incarceration Mich le Lamont and Mario Small grapple with the theoretical ambiguities of existing cultural explanations for poverty disparities They argue that culture and structure are not competing explanations for poverty but rather collaborate to produce disparities Looking at how attitudes and beliefs exacerbate racial stratification social psychologist Heather Bullock links the rise of inequality in the United States to an increase in public tolerance for disparity She suggests that the American ethos of rugged individualism and meritocracy erodes support for antipoverty programs and reinforces the belief that people are responsible for their own poverty Sociologists Darren Wheelock and Christopher Uggen focus on the collateral consequences of incarceration in exacerbating racial disparities and are the first to propose a link between legislation that blocks former drug felons from obtaining federal aid for higher education and the black white educational attainment gap Joe Soss and Sanford Schram argue that the increasingly decentralized and discretionary nature of state welfare programs allows for different treatment of racial groups

even when such policies are touted as race neutral They find that states with more blacks and Hispanics on welfare rolls are consistently more likely to impose lifetime limits caps on benefits for mothers with children and stricter sanctions The Colors of Poverty is a comprehensive and evocative introduction to the dynamics of race and inequality The research in this landmark volume moves scholarship on inequality beyond a simple black white paradigm beyond the search for a single cause of poverty and beyond the promise of one magic bullet solution A Volume in the National Poverty Center Series on Poverty and Public Policy Women, Migration and Citizenship Alexandra Dobrowolsky,2016-02-17 Given the recent and rapid changes to migration patterns and citizenship processes this volume provides a timely compelling empirical and theoretical study of the gendered implications of such developments More specifically it draws out the multiple connections between migration and citizenship concerns and practices for women The collection features original research that examines women s diverse im migrant and refugee experiences and exposes how gender ideologies and practices organize migrant citizenship in its various dimensions at the local national and transnational levels The volume contributes to theoretical debates on gender migration and citizenship and provides new insights into their interrelation It includes rich case studies that range from the Philippines and Somalia to the Caribbean and from Australasia to Canada and Britain Designed to have a multidisciplinary appeal it is suitable for courses on migration diversity gender race ethnicity law and public policy comparative politics and international relations *Education Studies* Dave Trotman,Helen Lees,Roger Willoughby,2017-09-20 Written by educational specialists and including over fifty interdisciplinary entries this essential compendium offers accessible detailed definitions of the core concepts typically explored on undergraduate Education Studies courses Its interactive design clarifies topics at an introductory intermediate and advanced level supporting students across the three years of their undergraduate study The history and evolution of each concept is outlined with concepts practically grouped around four interrelated key educational categories the personal philosophy practice and power Key academic debates and points of contest are explored reference to real life educational examples are offered and reflective questions and further reading scaffold critical engagement Education Studies The Key Concepts is a bookshelf must have moving readers towards a coherent stance based on theory and research It is an easy to use resource for anyone looking to better understand education It is also useful for those researching education at postgraduate level to broaden their educational knowledge base outside their specific foci **Proceedings of the 2025 3rd International Conference on Language, Innovative Education and Cultural Communication (CLEC 2025)** Andrea L. Baldini,Zhonggen Yu,Xianglan Chen,Lifei Wang,2025-07-22 This is an open access book The 2025 3rd International Conference on Language Innovative Education and Cultural Communication CLEC 2025 will be held on March 28 30 2025 in Kunming China CLEC 2025 is to bring together innovative academics and industrial experts in the field ofLanguage Innovative Education and Cultural Communication The primary goal of the conference is to promote research and developmental activities inLanguage

*Work and Mental Health in Social Context* Mark Tausig, Rudy Fenwick, 2011-09-08 Anyone who has ever had a job has probably experienced work related stress at some point or another For many workers however job related stress is experienced every day and reaches more extreme levels Four in ten American workers say that their jobs are very or extremely stressful Job stress is recognized as an epidemic in the workplace and its economic and health care costs are staggering by some estimates over 1 billion per year in lost productivity absenteeism and worker turnover and at least that much in treating its health effects ranging from anxiety and psychological depression to cardiovascular disease and hypertension Why are so many American workers so stressed out by their jobs Many psychologists say stress is the result of a mismatch between the characteristics of a job and the personality of the worker Many management consultants propose reducing stress by redesigning jobs and developing better individual strategies for coping with their stress But these explanations are not the whole story They don't explain why some jobs and some occupations are more stressful than other jobs and occupations regardless of the personalities and coping strategies of individual workers Why do auto assembly line workers and air traffic controllers report more job stress than

university professors self employed business owners or corporate managers yes managers The authors of *Work and Mental Health in Social Context* take a different approach to understanding the causes of job stress Job stress is systematically created by the characteristics of the jobs themselves by the workers occupation the organizations in which they work their placements in different labor markets and by broader social economic and institutional structures processes and events And disparities in job stress are systematically determined in much the same way as are other disparities in health income and mobility opportunities In taking this approach the authors draw on the observations and insights from a diverse field of sociological and economic theories and research These go back to the nineteenth century writings of Marx Weber and Durkheim on the relationship between work and well being They also include the more contemporary work in organizational sociology structural labor market research from sociology and economics research on unemployment and economic cycles and research on institutional environments This has allowed the authors to develop a unified framework that extends sociological models of income inequality and status attainment or allocation to the explanation of non economic health related outcomes of work Using a multi level structural model this timely and comprehensive volume explores what is stressful about work and why specifically address these and questions and more What characteristics of jobs are the most stressful what characteristics reduce stress Why do work organizations structure some jobs to be highly stressful and some jobs to be much less stressful Is work in a bureaucracy really more stressful How is occupational status occupational power and authority related to the stressfulness of work How does the segmentation of labor markets by occupation industry race gender and citizenship maintain disparities in job stress Why is unemployment stressful to workers who don't lose their jobs How do public policies on employment status collective bargaining overtime affect job stress Is work in the current Post neo Fordist era of work more or less stressful than work during the Fordist era In addition to providing a new way to understand the sociological causes of job stress and mental health the model that the authors provide has broad applications to further study of this important area of research This volume will be of key interest to sociologists and other researchers studying social stratification public health political economy institutional and organizational theory

*Social Stratification and Occupations* A. Stewart, K. Prandy, R. M. Blackburn, 1980-11-20      **Status Attainment in the Netherlands, 1811-1941** Richard Lindert Zijdemann, 2010      *The Entrepreneurial Middle Class (Routledge Revivals)* Robert Goffee, Richard Scase, 2015-06-03 This book first published in 1982 is a study of the processes that shape the reproduction of the entrepreneurial middle class It identifies the major dynamics surrounding stages of business growth More particularly it focuses upon obstacles and cleavages inherent within the process of small scale capital accumulation This book is ideal for students of business and economics
