The book interprets the uprising not as the start of Syria's social mobilisation but as a shift from online to offline contestation and from localised and hidden practices of digital dissent to tangible mass street protests Brownlee goes beyond the common dichotomy that frames new media as either a deus ex machina or a means of expression to demonstrate that in Syria media was a nontraditional institution that enabled resistance to digitally manifest and gestate below within and parallel to formal institutions of power To refute the idea that the population of Syria was largely apathetic and apolitical prior to the uprising Brownlee explains that social media and technology created camouflaged geographies and spaces where individuals could protest without being detected Challenging the myth of authoritarian stability New Media and Revolution uncovers the dynamics of grassroots resistance blossoming under the radar of ordinary politics Studies Panayiota Tsatsou, 2016-05-23 This book considers the lessons learnt so far from the emergence of the Internet and the development of the field of Internet studies whilst also considering possible directions for the future Examining broad media theories and emerging theorisations around the Internet specifically it explores the possibility of the development of an Internet theory in the future A comprehensive overview of the field Internet Studies considers key issues of social importance that the study of the Internet draws upon such as the role of the Internet in civic participation and democratisation the development of virtual communities digital divides and social inequality as well as Internet governance
