affirmation of the merits of the approach to social work called empirical clinical practice from the Handbook of Empirical Social Work Practice Recent Developments in Alcoholism Marc Galanter, 2013-11-11 From the President of the Research Society on Alcoholism The field of alcohol research has been slowly but continuously evolving taking into its domain an ever increasing array of scientific disciplines This series is designed to fill the need for a review publication that covers the broad range of research into alcohol actions and alcoholism Research in alcohol concerns social epidemiological and legal concerns in addition to biomedical and behavioral topics to greater degree than research with many other drugs A publication devoted to alcohol research should serve the broadest existing research community but perhaps more important it should also provide a means to recruit new investigators with fresh approaches to the field We can and must demonstrate that legitimate high quality research is being done but we must also highlight the opportunity for new workers to make a real impact on the problem The Research Society on Alcoholism seeks to provide such a service not only through this publication but also through other activities Richard A Deitrich Ph D Special Report to the U.S. Congress on Alcohol & Health from the Secretary of Health, Education, and Welfare United States.
