recent years a growing number of scholars within the field of theological research have adopted qualitative empirical methods. The use of qualitative research is shaping the nature of theology and redefining what it means to be a theologian. Hence contemporary scholars who are undertaking empirical fieldwork across a range of theological subdisciplines require authoritative guidance and well developed frameworks of practice and theory. The Wiley Blackwell Companion to Theology and Qualitative Research outlines the challenges and possibilities for theological research that engages with qualitative methods. It reflects more than 15 years of academic research within the Ecclesiology and Ethnography Network and features an international group of scholars committed to the empirical and theological study of the Christian church. Edited by world renowned experts this unprecedented volume addresses the theological debates, methodological complexities and future directions of this emerging field. Contributions from both established and emerging scholars describe key theoretical approaches, discuss how different empirical methods are used within theology, explore the links between qualitative research and adjacent scholarly traditions and more. The companion discusses how qualitative empirical work changes the practice of theology, enabling a disciplined attention to the lived social realities of Christian religion and what theologians do. Introduces theoretical and methodological debates in the field as well as central epistemological and ontological questions. Presents different approaches to Theology and Qualitative research, highlighting important issues and developments in the last decades. Explores how empirical insights are shaping areas such as liturgics, homiletics, youth ministry and Christian education. Includes perspectives from scholars working in disciplines other than theology. The Wiley Blackwell Companion to Theology and Qualitative Research is essential reading for graduate students, postgraduates, PhD students, researchers and scholars in Christian Ethics, Systematic Theology, Practical Theology, Contemporary Worship and related disciplines such as Ecclesiology, Mission Studies, World Christianity, Pastoral Theology, Political Theology, Worship Studies and all forms of contextual theology.

**Paul's Understanding of the Church's Mission** Robert L. Plummer, 2006-06-01 Did Paul expect his churches to engage in evangelistic activity which mirrored his own? Or have modern readers of the Bible wrongly projected Paul's apostolic passion upon the communities that he founded? Such is the charge of several recent authors and if their thesis is correct, nothing could have larger implications for how the modern church engages in mission. In this book Robert L. Plummer engages in a careful study of Paul's letters to determine if the apostle expected the communities to which he wrote to engage in outward directed missionary activity. Plummer helpfully summarizes the discussion to date on the debated issue, judiciously handles contested texts and provides a way forward in addressing this critical question. While admitting that Paul rarely explicitly commands the communities he founded to evangelize, Plummer amasses significant incidental data to provide a convincing case that Paul did indeed expect his churches to engage in outward directed missionary activity. Throughout the study Plummer progressively builds a theological basis for the church's mission that is both compelling and distinctively Pauline.

**Engaging Neighbors and Nations** Tim Silberman, 2024-03-27 Evangelical

churches are widely known for their commitment to mission locally and to the ends of the earth. However in the last century there have been profound theological and sociological changes that have impacted mission practice. Church and mission leaders have encouraged Christians to respond to the need for mission locally especially as church decline accelerates in much of the Western world. Yet others are concerned that global mission involvement is being neglected in many local churches. This study explores the factors influencing local church participation in mission both locally and around the world. Through an in depth analysis of the practices and perspectives among evangelical churches in Australia the author identifies a range of theological missiological and organizational influences on mission practice. Though beliefs about the church the world and mission are important understanding organizational principles social capital and the power of relational networks provides invaluable insights into church mission practice. This book is for those who long to see local churches committed to engaging both their neighbors and the nations in mission growing our understanding of how to encourage helpful church practices for the sake of Christ.
