**European Developments in Corporate Criminal Liability** James Gobert,Ana-Maria Pascal,2011-06-10 When corporations carry on their business in a grossly negligent manner or take a cavalier approach to risk management the consequences can be catastrophic The harm may be financial as occurred when such well regarded companies as Enron Lehman Brothers Worldcom and Barings collapsed or it may be environmental as illustrated most recently by the Gulf oil spill Sometimes deaths and serious injuries on a mass scale occur as in the Bhopal gas disaster the Chernobyl nuclear explosion the Paris crash of the Concorde the capsizing of the Herald of Free Enterprise and rail crashes at Southall Paddington and Hatfield in England What role can the law play in preventing such debacles and in punishing the corporate offenders This collection of thematic papers and European country reports addresses these questions at both a theoretical and empirical level The thematic papers analyse corporate criminal liability from a range of academic disciplines including law sociology criminology economics philosophy and environmental studies whilst the country reports look at the laws of corporate crime throughout Europe highlighting both common features and

irreconcilable differences between the various jurisdictions      *A Global History of the Financial Crash of 2007-10* Johan A. Lybeck, 2011-10-13 We have just experienced the worst financial crash the world has seen since the Great Depression of the 1930s While real economies in general did not crash as they did in the 1930s the financial parts of the economy certainly did or at least came very close to doing so Hundreds of banks in the United States and Europe have been closed by their supervisory authorities forcibly merged with stronger partners nationalized or recapitalized with the tax payers money Banks and insurance companies had by mid 2010 already written off some 2000 billion dollars in credit write downs on loans and securities In this book Johan Lybeck draws on his experience as both an academic economist and a professional banker to present a detailed yet non technical analysis of the crash He describes how the crisis began in early 2007 explains why it happened and shows how it compares to earlier financial crises      **The Resilience of New Public Management** Irvine Lapsley, Peter Miller, 2024-01-12 The Resilience of New Public Management examines the role and significance of New Public Management NPM in contemporary society and explores its emergence and resilience Eminent scholars have said that NPM only existed from 1980 2000 and that we now live in a post NPM world This book tells a very different story Evidence is presented in this book of 40 years of continuous NPM in public services including government agencies universities and health care NPM has diffused across sectors and globally since the 1980s and in the process mutated to become modernization It also coexists with alternative models of managing public services including models such as digital era governance and network governance which were considered replacements for NPM The capacity of NPM to mutate has caught many of its critics by surprise This capacity for NPM to reinvent itself includes the adoption of Lean Management the Toyota Production System Early NPM adopter countries engaged with the use of Lean Management techniques but late NPM adopters did not The most recent alternative to NPM is Trust based management which has made significant advances in Scandinavian countries However Trust based management is closely linked to proto NPM and NPM practices and it has itself mutated to present itself as a friendlier and more supportive version of NPM which at the very least deserves close scrutiny The above trends are indicative of the resilience of NPM and its intuitive appeal for policymakers Its advocates argue that NPM has the capacity to deliver policy outcomes but this book shows that such claims and aspirations are not always matched by the evidence of NPM in action      **Accountability, Philosophy and the Natural Environment** Glen Lehman, 2021-02-28 Using a philosophical and interdisciplinary approach this book looks at how accountability can provide solutions to our current environmental and global political problems When a social system has external elements imposed upon it or presented to it political problems are likely to emerge This book demonstrates that what is needed are connecting social elements with a natural affinity to bring people together despite their differences This book is different from others in the field It provides new insights by critiquing the extant understandings of accountability and expands the possibilities by building on Charles Taylor s philosophies Central to the argument of the book are perspectives on authenticity and

expressivism which are found to provide a radical reworking of our understanding of being in the world and a starting point for rethinking the way individuals and communities ought to be dealing politically with accountability and ecological crises The argument builds to an accountability perspective that utilises work from interpretivism liberalism and postmodern theory The book will be of interest to researchers in environmental philosophy critical perspectives on accounting corporate governance corporate social reporting and environmental accounting

**Transaction Cost Economics and Beyond** Michael Dietrich,2008-01-28 In recent years transaction cost economics have come to dominate the discussion of the nature and organization of firms In Transaction Costs Economics and Beyond Michael Dietrich offers a critical exploration of transaction costs He argues that whilst they have much to offer they are still an inadequate basis for a general theory of the firm Drawing on theories of organizational behaviour as well as economics he concludes by offering a theory of the firm that allows for both hierarchical and creative decision making

Emissions Trading and Business Ralf Antes, Bernd Hansjürgens, Peter Letmathe, 2006-11-22 Emissions trading challenges the management of companies in an entirely new manner It does not only allow for a bigger flexibility in management decisions concerning emission issues like other market based environmental policy instruments Furthermore it changes the code by which environmental policy steers management decisions from hierarchical to monetary information But is this change transmitted and mirrored in management decisions processes and structures And how do they change When flexibility is given to the companies they

have several opportunities to react Moreover different institutional architectures of emissions trading schemes are possible and have been implemented like in the US the UK or the EU The 24 contributions discuss theoretically and empirically in four parts the following subjects 1 Institutional design decision making and innovation 2 Investment and management strategies 3 ET and business administration 4 Effects of ET schemes existing and being implemented **The Political Economy of Privatization** Thomas Clarke,Christos Pitelis,2005-08-17 This book considers the many facets of the privatization process in advanced industrialised countries along with the marketization of Eastern Europe and the pressures on developing countries to adopt privatization as the route to growth
