

301 Research Topics From Skinner's Book *Verbal Behavior*

Mark L. Sundberg
Sundberg and Associates, Concord, CA

Skinner's (1957) analysis of verbal behavior addresses some of the most important issues in human behavior. However, relatively few of the analyses presented by Skinner in *Verbal Behavior* have been subjected to an experimental analysis. The current list of topics was assembled in an effort to stimulate empirical research on verbal behavior. The list contains thirty research areas with ten topics suggested for each area. A final topic, education, is presented as a challenge to behavior analysts.

Skinner's (1957) book *Verbal Behavior* contains a conceptual analysis of the topic of language. This book has not received the abundant amount of experimental attention that Skinner's other works have, yet Skinner stated several times that this book would prove to be his most important work (e.g., 1978, p. 122). There are a variety of reasons why Skinner's analysis of verbal behavior has been slow in affecting the behavioral community (e.g., see Eshleman, 1991; Michael, 1984; Vargas, 1986). A frequently raised point is the lack of supporting data for the analysis. McPherson, Bonem, Green, and Osborne (1984) conducted a citation analysis of *Verbal Behavior* and found that of the 836 citations only 31 were of an empirical nature. These authors have made a rather pessimistic prediction concerning the book stating that "*Verbal Behavior* has not provided a conception that has led to the empirical examination and explanation of verbal behavior. If the past is a predictor of the future there is no reason to suspect that it will eventually do so" (p. 165). The current list was developed to show that the book does contain many suggestions for empirical research, and that any observed lack of research is not due to a paucity of topics, but rather to a paucity of researchers. Also, the list lends

support to Skinner's proclamation that "The formulation is inherently practical and suggests immediate technological applications at almost every step" (1957, p. 12).

The list contains thirty research areas, each containing ten suggestions for specific research topics. The suggestions are brief and at times it may be difficult to determine exactly how to conduct a research project given so little information. Unfortunately, further elaboration of each topic is beyond the scope of the present paper. Nevertheless, it is hoped that individual readers will find topics of interest to them and conduct empirical research.

1. ESTABLISHING OPERATIONS AND VERBAL BEHAVIOR

Establishing operations (Michael, 1982, 1988) play a major role in controlling verbal behaviors (as well as nonverbal behaviors). The mand, for example, is always under the control of an establishing operation (EO). Skinner (1957) defined the mand "as a verbal operant in which the response is reinforced by a characteristic consequence and is therefore under the functional control of the relevant conditions of deprivation or aversive stimulation" (pp. 35-36). Many who use this definition focus only on the specific reinforcement, and neglect the importance of "relevant conditions of deprivation or aversive stimulation" (i.e., establishing operations). These motivative variables can be strong

Portions of this paper were presented at the annual meeting of the Association for Behavior Analysis, Atlanta, GA, May, 1991. I would like to thank Cindy A. Sundberg for her comments on an earlier version of the paper. Reprints may be obtained from the author, P.O. Box 21492, Concord, CA 94521.

topics At the time the book had four goals to discuss many of the important contemporary issues in psycholinguistics to explore the different views on major theoretical controversies to provide an analysis of background literature as a framework in which to evaluate the issues and controversies and to describe interesting high quality research currently being done by the authors and some of their colleagues Today it can be read and enjoyed in its historical context with many of the chapters still relevant in psycholinguistic research today New Handbook of Methods in Nonverbal Behavior Research Jinni Harrigan,Robert Rosenthal,Klaus Scherer,2008-03-13 Now available in paperback the New Handbook of Methods in Nonverbal Behavior Research includes chapters on coding and methodological issues for a variety of areas in nonverbal behavior facial actions vocal behavior and body movement Handbook of Research Methods in Human Operant Behavior Kennon A. Hayes,Dermot Barnes-Holmes,Bryan Roche,2005-11-30 This volume goes beyond theory and gives the empirical and conceptual tools to conduct an experimental analysis of virtually every substantive topic in human language and cognition both basic and applied It challenges behavioral psychology to abandon many of the specific theoretical formulations of its most prominent historical leader in the domain of complex human behavior especially in human language and cognition and approach the field from a new direction It will be of interest to behavior theorists

Psycholinguistics brings together as one set or individual volumes a series of previously out of print titles originally published between 1970 and 1990 From a variety of academic imprints this set reflects the growth of psycholinguistics as a serious scientific discipline in its own right It provides in one place a wealth of important reference sources from a wide range of authors expert in the field Dynamic systems theory and embodiment in psychotherapy research. A new look at process and outcome Sergio Salvatore,Wolfgang Tschacher,Omar Carlo Gioacchino Gelo,Sabine C Koch,2016-04-11 In an attempt to cease from reducing the world and its emergent phenomena to linear modeling and analytic dissection Dynamic Systems Theories DST and Embodiment theories and methods aim at accounting for the complex dynamic and non linear phenomena that we constantly deal with in psychology For instance DST and Embodiment can enrich psychology s understanding of the communicative process both in clinical and non clinical settings In psychotherapy an important amount of research has shown that next to other ingredients the therapeutic relationship is the most important active factor contributing to psychotherapy outcome These findings give communication a central role in the psychotherapy process In the traditional view the underlying model of understanding psychotherapy processes is that of a number of components summatively coming together enabling us to make a linear causal prediction Yet communication is inherently dynamic A shift to viewing the communication process in psychotherapy as a field dynamic phenomenon helps us to take into account nonlinear phenomena such as feedback processes within and between persons We thus propose an embodied enactive dynamic systems view as a new theoretical and methodological perspective that can more realistically capture what happens among and between two persons in psychotherapy This view reaches beyond the current narrow model of psychotherapy research DST and Embodied Enactive Approaches can offer solutions to the loss of non linear phenomena the complex dynamics of reality and the holistic level of analysis DST and Embodied Enactive Approaches have developed not in a single discipline but in a joined movement based on various fields such as physics biology robotics anthropology philosophy linguistics neuroscience and psychology and have only recently entered clinical theorizing The two new paradigms have already triggered a rethinking of the therapeutic exchange by recognizing the embodied nature of psychological and communicative phenomena Their integration opens up a promising scenario in the field of psychotherapy research developing new profoundly transdisciplinary theoretical concepts methodologies and standards of knowledge The notion of field dynamics enables us to account for the role of the communicational context in the regulation of intra psychological processes while at the same time avoiding the pitfalls of an ontologization of the hierarchy of systemic organization Moreover the new approach implements methodological strategies
