**Becoming A Researcher: A Research Companion For The Social Sciences** Dunne, Mairead, Pryor, John, Yates, Paul, 2005-07-01 This innovative book combines what most books separate research as practical activity and research as intellectual engagement It clarifies and makes explicit the methodological issues that underlie the journey from initial research idea to the finished report and beyond The text moves the researcher logically through the research process and provides insights into methodology through an in depth discussion of methods It presents the research process as an

engagement with text This theme moves through the construction of text in the form of data and the deconstruction of text in analysis Finally the focus moves to the reconstruction of text through the re presentation of the research in the report Following through each of these stages in turn the chapters consider either a practical issue or a group of methods and interrogate the associated methodological concerns In addition the book also addresses the rarely explored issues of the researcher as writer and researcher identity as core elements of the research process The book provides a range of insights and original perspectives These successfully combine practical guidance with the invitation to consider the problematic nature of research as social practice It is an ideal reference for those embarking on research for the first time and provides a new methodological agenda for established researchers *Interpreting Quantitative Data with SPSS* Rachad
