Long Postwar Peace:

The Long Peace John Lewis Gaddis, 1987 In this fascinating new interpretation of Cold War history John Lewis Gaddis focuses on how the United States and the Soviet Union have managed to get through more than four decades of Cold War confrontation without going to war with one another Using recently declassified American and British documents Gaddis argues that the postwar international system has contained previously unsuspected elements of stability This provocative reassessment of contemporary history particularly as it relates to the current status of Soviet American relations will certainly generate discussion controversy and important new perspectives on both past and present aspects of the age in which we live

The Long Postwar Peace Charles W. Kegley, 1991

Great Powers and World Order Charles W. Kegley, Gregory A. Raymond, 2020-02-12 Great Powers and World Order encourages critical thinking about the nature of world order by presenting the historical information and theoretical concepts needed to make projections about the global future Charles W. Kegley and Gregory Raymond ask students to compare retrospective cases and formulate their own hypotheses about not only the causes of war but also the consequences of peace settlements Historical case studies open a window to see what strategies for constructing world order were tried before why one course of action was chosen over another and how things turned out By moving back and forth in each case study between history and theory rather than treating them as separate topics the authors hope to situate the assumptions causal claims and policy prescriptions of different schools of thought within the temporal domains in which they took root giving the reader a better sense of why policy makers embraced a particular view of world order instead of an alternative vision

Paradigm Lost? David Jablonsky, 1993 After every momentous event there is usually a transition period in which participants in the events whether individuals or nation states attempt to chart their way into an unfamiliar future In the United States in this century there are three such transitions each focused on America's role in the international arena After World War I the American people specifically rejected the global role for the United States implicit in Woodrow Wilson's strategic vision of collective security In contrast to this return to normalcy after World War II the United States moved inexorably toward international leadership in response to the Soviet threat The result was an acceptance of George Kennan's strategic vision of containing the Soviet Union on the Eurasian landmass and the subsequent bipolar confrontation of the two superpowers in a twilight war that lasted for over 40 years Sometime in the penultimate decade of the 20th century the United States and its allies won the cold war Once again in the current transition period the primary questions revolve around the management of power and America's role in global politics Once again there are the issues of change and continuity In terms of change the cold war set in train a blend of integrative and disintegrative forces and trends that are adding to the complex tensions of the current transition The integrative force that increasingly linked global economies in the cold war for instance also holds out the spectral potential of global depression or at the very least nations more susceptible to disintegrative actions as the Iraqi invasion of Kuwait

demonstrated In a similar manner the advances in communications and transportation that have spread the results of medical and scientific discoveries around the world are countered by the malign transnational results of nuclear technology the drug trade terrorism AIDS and global warming

The Waning of Major War Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes

Paradigm Lost? David Jablonsky, 1995-03-24 This book examines major historical post war transition periods with particular emphasis on the differences and similarities of the American experience after both world wars of this century and with the post Cold War transition currently underway Jablonsky provides a strategic vision that incorporates a multilateral great power approach to the international relations of our era After every momentous event there is usually a transition period in which participants in the events whether individuals or nation states attempt to chart their way into an unfamiliar future For the United States in this century there are three such transitions each focused on America's role in the international arena After World War I the American people specifically rejected the global role for the United States implicit in Woodrow Wilson's strategic vision of collective security In contrast to this return to normalcy after World War II the United States moved inexorably toward international leadership in response to the Soviet threat The result was an acceptance of George Kennan's strategic vision of containing the Soviet Union on the Eurasian landmass and the subsequent bipolar confrontation of the two super powers in a twilight war that lasted for more than 40 years Sometime in the penultimate decade of this century the United States and its allies won the Cold War Once again the United States faces a transitional period and the primary questions revolve around the management of power and America's role in global politics In this regard the Cold War set in train a blend of integrative and disintegrative forces and trends that are adding to the complex tensions of the current transition The realist paradigm still pertains in this situation where nation states are still the primary international actors In such a world American government elites must convince an electorate increasingly conscious of the domestic threats to national security of the need to continue to exercise global leadership in the management of power The answer as Jablonsky demonstrates is a strategic vision that incorporates a multilateral great power approach to international relations

Nuclear Weapons and Conflict Transformation Saira Khan, 2008-09-09 This new volume explores what the acquisition of nuclear weapons means for the life of a protracted conflict using the case study of the conflict between India and Pakistan

Point of Attack John Yoo, 2014-03-25 *Point of Attack* calls for a new understanding of the grounds for war by defending preventive war as a valid method used by the great

powers In this book John Yoo argues that new threats to international security come not from war between the great powers but from failed states human rights catastrophes terrorist groups weapons of mass destruction proliferation and destabilizing regional powers such as Libya Syria North Korea and Iran Point of Attack offers choice tools to bear on international legal rules to develop a new international legal regime that maximizes global welfare consistent with the realities of great power politics

The Future's Back Frank P. Harvey, 1997 Arguing that previous critiques of rational choice and deterrence theory are not convincing Frank Harvey constructs a new set of empirical tests of rational deterrence theory to illuminate patterns of interaction between rival nuclear powers He analyses the crisis management techniques used by the United States and the Soviet Union in twenty eight post war crises and isolates factors that promote or inhibit escalation of these crises This crises based data set serves as the basis for identifying patterns of response when one nuclear state is threatened by another The Future's Back offers new directions for testing that emphasize a more unified approach to theory building and assesses the feasibility of alternative courses of action to prevent escalation of future disputes characterized by nuclear rivalry
