Long Wave Rhythms In Economic Development And Political Behavior

Phillip Anthony O'Hara

Long Wave Rhythms In Economic Development And Political Behavior:

Long-Wave Rhythms in Economic Development and Political Behavior Brian J. L. Berry, 1991 Is economic development a random walk or do underlying rhythms and cycles make it possible to anticipate long term trends Many social scientists have rejected the notion of long term periodicity in economic trends Now after extensive analysis of economic data distinguished scholar Brian J L Berry has found new evidence for the reliability and the value of long wave theory In *Long Wave Rhythms in Economic Development and Political Behavior* Berry argues that the synchronization of long waves and growth cycles is more than a figment of some overactive imagination Presenting his findings graphically he argues that there is persuasive evidence of the existence of deterministic chaos Applying his analysis of rates of change to the economic phenomena of prices Kondratiev cycles and growth Kuznets cycles he discovers that pairs of 25 year growth cycles are embedded within 55 year long waves As a result Berry concludes two different kinds of growth cycles one inflationary and the other deflationary form a complementary pattern of alternating crises with stagflation and depression Berry also explores the shifting sand of cyclical phenomena in the stock market voting behavior the incidence of wars the rise and fall of great powers and mass psychologies While avoiding dogmatic conclusions he offers a provocative discussion of the long wave context of social phenomena As he examines the American economy in long wave context Berry optimistically asserts that the bust is not inevitable Technological advances in information transfer enable leaders and organizations to anticipate and alleviate the adverse effects of economic cycles Like it or not he writes our lives appear to be embedded in a higher order of complexity collectively we are a societal organism that displays self regulating fluctuations around a path of growth

Long Waves of Growth, Hegemonic Power, and Climate Change in the World Economy Phillip Anthony O'Hara, 2025-10-02 This book investigates eras of major geopolitical and socioeconomic power development relative demise and potential renewal for four major political economies It concentrates on the Dutch Golden Age of the late 1500s and 1600s British hegemony of the 1800s Pax Americana of the 1900s and Chinese potential hegemony of the 2000s as well as long wave patterns of change over successive centuries to the present and to some degree into the future Dutch British US and Chinese economies are situated within patterns of long term successive rise and fall and fall and rise of economic growth hegemony and climate change in the world political economy including linkages between core periphery and semi periphery Patterns of multiple crises tend to appear in between hegemonic periods and climate change often undergoes complex dynamics through time while currently climate anomalies are emerging during mostly long wave downswings and polycrises in the world economy Contemporary themes of the book include the ongoing competition for world domination between the US and China the conflict over Ukraine Taiwan that some think may generate world war 3 the climate change crisis that continues to plague the world and whether the world and its major economies are likely to undergo a Golden Age into the future Chapter 7 of this book on US hegemony and long waves includes extracts of material that won the Myrdal Prize for Book of the Year Prize from

EAEPE as well as Journal Article of the Year from Curtin Business School Ideas from parts of Chapter 9 emanate from a volume that won Book of the Year Award from CBS A climate change paper that won Journal Article of the Year Awards from EAEPE and CBS informed ideas that are used in several parts of this book The book outlines key stylized facts from the analysis and presents hypotheses for further investigation on the relationship between long term growth hegemony and climate change The book uses the work of Kondratiev Schumpeter and company themes in economic history modern political economy schools and the principles of political economy contingency paradigm to reformulate long wave hegemony and climate change hypotheses and empirics

The Dog Bone Portfolio Margret Kopala, John Budden, 2015-06-01 Like so many of us Margret Kopala lost a significant portion of her life savings in the stock market crash of 2008 Unlike us however she went on a long and intense financial odyssey to find out what caused the losses and what she could do to protect herself in the future Armed with her skills as a journalist and public policy analyst fueled by equal measures of fear and determination and mentored by successful investment strategist and financial broadcaster John Budden Kopala researched and wrote this magisterial analysis of how Russian economist Nikolai Kondratieff's long wave theory is playing out in what many today describe as a financial Winter Along the way she is introduced to financial experts familiar with Kondratieff scholarship John Budden's interviews in the book with Dean LeBaron J Anthony Boeckh Ian Gordon Larry Jeddelloh Don Lindsey the late Lord William Rees Mogg Jim Rogers Eric Sprott and Ronald Peter St ferle show how investors must put a new spin on asset allocation and security of their assets like a dog that buries bones in different places we would be advised to allocate our assets to different parts of the world and to ensure that a good portion of those assets include gold the only continuous basis of wealth across history and around the world Kopala explores the global national and personal effects of overconsumption underproduction energy and innovation the printing of money to save the economy competitive devaluations deflation reflation and inflation and war the ultimate economic crisis She documents those technologies that seeded previous New Economy Spring seasons from the era of canals to those of railroads automobiles and infotech and probes today's innovations most likely to seed the Next New Economy that we desperately need if we are to escape the doldrums of the current financial Winter With trenchant explanations of how individuals can achieve portfolio strength by first preserving capital then being vigilant about the financial effects of politics economic theory culture and our own choices The Dog Bone Portfolio is a gift to investors policy makers and ultimately nations everywhere

The Waves of Time K. R. Dark, 2016-10-06 Since the end of the Cold War analysts of international politics have given much greater attention to issues of change It has become increasingly clear to specialists from many fields that any understanding of large scale political change must encompass far longer timescales than has been usual in the study of world politics and must incorporate multi disciplinary perspectives This book evaluates and draws on relevant theoretical approaches from other disciplines such as sociology economics geography history anthropology and archaeology as well as evolutionary theory and the mathematical

study of complexity Using an epistemological framework Dark sets out a theory of long term world political change the theory of Macrodynamics This is then applied to historical anthropological and archaeological data to explain the changing forms of political organization from the earliest human societies to the late twentieth century The resulting analysis is a reinterpretation of the processes of global political change in the past and present This in turn opens new areas of enquiry in the study of international relations and has profound implications for how we understand the changing world of today

Economic Cycles, Crises, and the Global Periphery Leonid Grinin, Andrey Korotayev, Arno Tausch, 2016-10-25 This thought provoking monograph analyzes long medium and short term global cycles of prosperity recession and depression plotting them against centuries of important world events Major research on economic and political cycles is integrated to clarify evolving relationships between the global center and its periphery as well as current worldwide economic upheavals and potential future developments Central to this survey are successive waves of industrial and later technological and cybernetic progress leading to the current era of globalization and the changes of the roles of both Western powers and former minors players however that will lead to the formation of the world order without a hegemon Additionally the authors predict what they term the Great Convergence the lessening of inequities between the global core and the rest of the world including the wealth gap between First and Third World nations Among the topics in this ambitious volume Why politics is often omitted from economic analysis Why economic cycles are crucial to understanding the modern geopolitical landscape How the aging of the developed world will affect world technological and economic future p The evolving technological forecast for Global North and South Where the U S is likely to stand on the future world stage Economic Cycles Crises and the Global Periphery will inspire discussion and debate among sociologists global economists demographers global historians and futurologists This expert knowledge is necessary for further research proactive response and preparedness for a new age of sociopolitical change

Kondratieff Waves, Warfare and World Security Tessaleno C. Devezas, 2006 Considerable progress has been made in understanding the underlying mechanisms driving the long wave behaviour of the world socioeconomic development A controversial mechanism discussed is the close relationship between K waves and the outbreak of major wars

Innovative Behaviour in Space and Time Cristoforo S. Bertuglia, Silvana Lombardo, Peter Nijkamp, 2012-12-06 In the past decade there has been growing recognition that economic development is not mainly exogenously determined but to a large extent is a transformation process induced and governed by economic actors who respond to competitive institutional and political challenge This challenge and response model is increasingly accepted as a valid analytical framework in modern growth theory and also explains the popularity of endogenous growth approaches to technological innovation issues However a major and as yet largely under researched topic is the question of the diffusion and adoption of new technological changes in the context of space time dynamics This diffusion and adoption pattern has obviously clear spatial and temporal variations connected with behavioural responses which may vary over time and different

locations This means that a closer analysis of spatio temporal opportunities and impediments is necessary in order to fully map the complex interactions of technology and economy in space and time This volume sets out to bring together a collection of original contributions commissioned by the editors to highlight the spatio temporal patterns and backgrounds of the diffusion and adoption of new technologies Some are in the nature of a survey others have a modelling background and again others are case studies The contributions originate from different countries and different disciplines This book is complementary to a previously published volume on technological innovation Technological Change Economic Development and Space edited by C S Bertuglia M M Fischer and G Preto and also published by Springer Verlag 1995

Globalization as Evolutionary Process George Modelski, Tessaleno Devezas, William R. Thompson, 2007-12-20 The term globalization has gained widespread popularity yet most treatments are either descriptive and or focused on changes in economic interconnectivity In this volume the concept is seen in broader terms as leading international experts from a range of disciplines develop a long term analysis to address the problems of globalization The editors and contributors develop a framework for understanding the origins and trajectory of contemporary world trends constructing testable and verifiable models of globalization They demonstrate how the evolutionary approach allows us to view globalization as an enterprise of the human species as a whole focusing on the analytical problem of global change and the rules governing those changes The emphasis is not on broad based accounts of the course of world affairs but selectively on processes that reshape the social of the human species the making of world opinion and the innovations that animate these developments Chapters are clustered into four foci One emphasizes the interpretation of globalization as an explicitly evolutionary process A second looks at historical sequences of such phenomena as population growth or imperial rise and decline as processes that can be modeled and not purely described The third cluster examines ongoing changes in economic processes especially information technology A final cluster takes on some of the challenges associated with forecasting and simulating the complexities of globalization processes This innovative and important volume will be of interest to students and scholars across the social sciences concerned with the phenomenon of
