Chinese Senior Migrants and the Globalization of Retirement Nicole DeJong Newendorp,2020-09-08 The 21st century has seen growing numbers of seniors turning to migration in response to newfound challenges to traditional forms of retirement and old age support such as increased longevity demographically aging populations and global neoliberal trends reducing state welfare Chinese born migrants to the U S serve as an exemplary case of this trend with 30 percent of all migrants since 1990 being at least 60 years old This book tells their story arguing that they demonstrate the significance of age as a mediating factor that is fundamentally important for considering how migration is experienced The subjects of this study are situated at the crossroads of Chinese immigrant and Chinese American experiences embodying many of the ambiguities and paradoxes that complicate common understandings of each group These are older individuals who have waited their whole lives to migrate to the U S to rejoin family but often experience unanticipated family conflict when they arrive They are retirees living at the social and economic margins of American society who nonetheless find significant opportunities to achieve meaningful retired lifestyles They are members of a diaspora spanning vast regional and ideological differences yet their wellbeing hinges on everyday interactions with others in this diverse community Their stories highlight the many possibilities for mutual engagement that connect Chinese and American ways of being and belonging in the world **A**

psychology and Asian studies **China's Revolutions and Intergenerational Relations** Martin Whyte, 2020-08-06 China's Revolutions and Intergenerational Relations counters the widely accepted notion that traditional family patterns are weakened by forces such as economic development and social revolutions China has experienced wrenching changes on both the economic and the political fronts yet from the evidence presented here the tradition of filial respect and support for aging parents remains alive and well Using collaborative surveys carried out in 1994 in the middle sized industrial city of Baoding and comparative data from urban Taiwan the authors examine issues shaping the relationships between adult Chinese children and their elderly parents The continued vitality of intergenerational support and filial obligations in these samples is not simply an instance of strong Confucian tradition trumping powerful forces of change Instead and somewhat paradoxically the continued strength of filial obligations can be attributed largely to the institutions of Chinese socialism forged in the era of Mao Zedong With socialist institutions now under assault in the People's Republic of China the future of intergenerational relations in the twenty first century is once again uncertain *One Step Ahead in China* Ezra F.
